Rejected Bidder(s):

Name: China Road & Bridge Co., Ltd.
Reasons for rejection: C1 percentage excluding Emergency Works after application of discount is over 80%.

Discount proposed by China Road & Bridge Co., Ltd (50% discount on the cost of maintenance services a total of $3,290,000 US) had reduced the amount of Maintenance Works from 20.09% to approximately 11.17% of the total contract price. The Maintenance Works had to constitute at least 20% of the total contract price, which was originally so (before discount), but then dropped after the discount has been applied.

ITB Clause 34.4 of the RFB clearly says: The price of the Rehabilitation and Improvement Works included in each Bid shall not be higher than the threshold indicated in the BDS (80%). If the Bidder estimates that its costs for the Rehabilitation and Improvement Works are higher than the threshold indicated in the BDS, it shall include the portion above the threshold in its price for the Maintenance Services. If the Bid price in the Most Advantageous Bid is above the 80% threshold for the Rehabilitation and Improvement Works, the Employer may reject the Bid.

The requirement of $C1 \leq 80\%$ (where C1 is works and C2 is maintenance service) is also explained in the Section IV of the RFB, Bill of Quantities and Unit Prices for Maintenance Services. Therefore, despite the fact that the $C1/C2$ ratio ($\leq 80\% / \geq 20\%$) has initially been met by China Road & Bridge Co., Ltd this ratio had changed after application of the proposed discount. The idea of this criterion $C1 / (C1+C2) \leq 80\%$ was to engage the Bidders in the higher responsibility for maintenance period. If the contract was awarded based on the discounted price, then the idea of having sufficient funds for maintenance would be undermined, because the ratio of the rehabilitation cost (C1) would increase above the 80%.

Thus the EC considered that the discount on the bid price was only applied on the maintenance phase, and the share of rehabilitation versus maintenance after applying the discount represented 88.83% for C1 and 11.17% for C2, not in compliance with the RFB and, therefore, the effect of the discount on these percentages should result in the rejection of bid. The approach taken by the Bidder to reduce his cost for the maintenance phase entails a distortion of the stipulations of the RFB.
