## Executive Summary

This report summarizes the Asian Infrastructure Investment Bank's (AIIB or the Bank) information disclosure practices during the period from January 1, 2023, to March 31, 2023 (Q1 2023).

It is divided into two sections. First, it looks at AIIB's practices in proactive disclosure. Second, it provides an overview of AIIB's responses to information requests.

During Q1 2023, the Bank's proactive disclosure of information is mostly in compliance with the Bank's requirements:

- All institutional information was disclosed in a timely manner in line with the requirements set out in the Policy on Public Information (PPI).
- This report tracks operational information including the initial Project Summary Information (PSI) document, project document (PD) and the Client's draft environmental and social documentation. During this reporting period, there was only one case of late disclosure, where the PD of a sovereign-backed financing project was disclosed 29 working days after the Financing Approval; the Project's initial PSI document, however, was disclosed timely following its Concept Review three years ago. As part of our continuous and ongoing efforts to strengthen awareness on disclosure requirements, we will collectively explore using multiple channels to enhance compliance.
- AIIB's Environmental and Social Framework (ESF) as amended through November 2022 replaced the May 2021 ESF and entered into force on November 22, 2022. However, Management, in its discretion may continue to apply the ESF, as amended through February 2019, to Projects that entered the pipeline prior to October 1, 2021. Most projects covered in this report are governed by the 2022 ESF, except for a few projects that were included in AIIB's investment pipeline before October 1, 2021. This report indicates which Environmental and Social Policy (ESP) applies to which projects. The initial PSI, PD and Client's ES documentation should be in line with such requirements.

The Bank received 90 requests from the [Public Information Request portal](#), up 39 percent from the previous quarter. All requests were closed within the required 30 working days upon their receipt. Project and career opportunities were the top request categories. China, USA and United Kingdom were the top three origins of requests.

## 1. Proactive Disclosure

AllIB proactively discloses information according to the [Directive on Public Information](#) on:

### 1.3. Operational Information

#### 1.3.1. Regular Projects

##### Non-sovereign-backed Financings

Figure 1 illustrates the approval process for Projects supported by Non-sovereign-backed Financings (NSBF) and when key project information is disclosed.

**Figure 1.** Project Approval Process for Projects supported by NSBF

AIIB's Environmental and Social Framework (ESF), as amended through November 2022, replaced the May 2021 ESF and entered into force on November 22, 2022. However, Management, in its discretion may continue to apply the ESF, as amended through February 2019, to Projects that entered the pipeline prior to October 1, 2021.

For Projects governed by the 2019 Environmental and Social Policy (ESP), the timing of disclosure of the Project Summary Information (PSI) and environmental and social (ES) information is linked to Management decision points and not to approval. Whereas, for Projects governed by the 2022 ESP, the timing of disclosure of ES information is linked to approval and varies depending on the Project's ES Categorization.

For Financial Intermediary (FI) Projects, the focus is on disclosure of ES information for subprojects financed by AIIB under the Project. Under the 2022 ESP, a summary of the FI's ES policy and management system is disclosed early during Project preparation; and ES information on Category A subprojects is normally disclosed 60 calendar days prior to final approval by AIIB of the activity for inclusion in the Project, while the ES information for Category B subprojects is normally disclosed on an annual basis. Thus, the timing of disclosure of ES information for subprojects is not linked to the date of approval of the Project by AIIB, but rather to the date of approval by AIIB of the subproject for inclusion in the financing. (See, ESS 1, Sec. 21.)

Table 2 shows the events in Q1 2023 that required proactive public disclosure of operational information by the Bank and the resulting disclosure. All projects except for the Bangladesh: Rampura-Amulia-Demra (RAD) Expressway Project (000466) in Table 3 are covered by the 2022 ESP.

### Sovereign-backed Financings

Figure 2 illustrates the project approval process for Projects supported by Sovereign-backed Financings (SBF) and when key project information is disclosed.

**Figure 2.** Project Approval Process for Projects supported by Sovereign-backed Financings (SBF)

AIIB's Environmental and Social Framework (ESF), as amended through November 2022 replaced the May 2021 ESF and entered into force on November 22, 2022. However, Management, in its discretion may continue to apply the ESF, as amended through February 2019, to Projects that entered the pipeline prior to October 1, 2021.

For Projects governed by the 2019 ESP, the timing of disclosure of the PSI and ES information is linked to Management decision points and not to Board/President approval, whereas for Projects governed by the 2022 ESP, the disclosure timing of the ES information is linked to approval and varies depending on the Project's ES categorization.

For FI Projects, the focus is on disclosure of ES information for subprojects financed by AIIB under the Project. Under the 2022 ESP, a summary of the FI's ES policy and management system is disclosed early during Project preparation; and ES information on Category A subprojects is normally disclosed 60 calendar days prior to final approval by AIIB of the activity for inclusion in the Project, while the ES information for Category B subprojects is normally disclosed on an annual basis. Thus, the timing of disclosure of ES information

for subprojects is not linked to the date of approval of the Project by AIIB, but rather to the date of approval by AIIB of the subproject for inclusion in the financing. (See, *ESS 1, Section 21.*)

Table 3 shows the events in Q1 2023 that required proactive public disclosure of operational information by the Bank, and the resulting disclosure. The Bangladesh: Bangladesh Integrated Solid Waste Management Improvement Project (000387) is governed by the 2019 ESP.

Table 4 shows the length of disclosure of the initial PSI and draft environmental and social (ES) information before Board/President approval. Table 4 indicates which ESP applies to which projects.

For FI Projects, the focus is on disclosure of ES information for subprojects financed by AIIB under the Project. Under the 2021 and the 2022 ESP, a summary of the FI's ES policy and management system is disclosed early during Project preparation; and ES information on Category A subprojects is normally disclosed 60 calendar days prior to final approval by AIIB of the activity for inclusion in the Project, while the ES information for Category B subprojects is normally disclosed on an annual basis. Thus, the timing of disclosure of ES information for subprojects is not linked to the date of approval of the Project by AIIB, but rather to the date of approval by AIIB of the subproject for inclusion in the financing. (See, *ESS 1, Section 21.*) Nevertheless, the table includes calculation of the disclosure of an overview of the FI's ES policy and management system before Board/President's Approval for the FI projects.

### 1.3.2. Projects under the AIIB COVID–19 Crisis Recovery Facility

AIIB discloses information on investment projects that fall under its COVID-19 Crisis Recovery Facility (Facility) in accordance with the Paper on the Decisions to Support the Facility.

In some cases, a nondisclosed Memorandum and Recommendation of the President (MoP) is used in place of a Project Document (PD), in which case AIIB discloses information on the operation via the PSI. A MoP is used instead of a PD for policy-based lending (PBL), development policy financing (DPF) and vaccine supply operations co-financed under the Facility with the Asian Development Bank (ADB) or the World Bank (WB).

In addition, Client environmental and social documentation disclosure requirements for Projects processed under the Facility may, pursuant to the ESP’s provisions on “Projects in Situations of Urgent Need of Assistance” (in both 2019 and 2021 versions), be deferred beyond the date of approval of the Project. Finally, the environmental and social disclosure requirements do not apply to PBLs and

DPFs that support policy actions taken by the beneficiary government and are not targeted to specific investments. Environmental and social aspects under co-financed vaccine supply operations are addressed in the Project documentation of the co-financier.

### Sovereign-backed Financing

Table 5 shows the events in Q1 2023 that required proactive public disclosure of operational information by the Bank, and the resulting disclosure.

Jordan: Additional Financing for Inclusive, Transparent and Climate Responsive Investments Program (000746) is governed by 2022 ESP and Philippines: Post-Covid-19 Business and Employment Recovery Program - Subprogram 1 (000697) was governed by 2021 ESP.
