#### **Executive Summary**

This report summarizes the information disclosure practices of the Asian Infrastructure Investment Bank (AIIB or the Bank) under its <u>Policy on Public Information</u> (PPI) and related Bank policies from Jan. 1 to March 31, 2025.

It is divided into two sections. The first examines AIIB's practices in proactive disclosure and the second provides an overview of AIIB's responses to information requests.

During Q1 2025, the Bank's proactive disclosure of information tracked was generally in compliance with AIIB's requirements:

- 99% of institutional information was disclosed in a timely manner in line with the requirements set out in the PPI. There was one instance of delayed disclosure, concerning an updated Directive that had not been published when it was revised. AIIB will strengthen the monitoring of the disclosure of updated Directives as it implements the Directive on the Internal Legal Framework, which establishes a framework for developing and managing rules, processes, procedures and guidelines related to the conduct of activities within and by the Bank.
- This report tracks operational information, including the initial Project Summary Information (PSI) document and the Client's draft environmental and social (ES) documentation for both Nonsovereign-backed Financing (NSBF) and Sovereign-backed Financing (SBF), as well as the full Project Document (PD) for SBF. Apart from two projects, where the initial PSI documents were delayed in disclosure, the initial PSI, PD and Client's ES draft documentation in Q1 2025 were all in line with relevant requirements.

An update to AIIB's Environmental and Social Framework (ESF) was approved on June 26, 2024 (2024 ESF), introducing provisions for the new Climate Policy-based Financing instrument. In addition to that update, three other versions of the ESF are posted on AIIB's website, one as amended through February 2019 (2019 ESF), one as amended through May 2021 (2021 ESF) and one as amended through November 2022 (2022 ESF). The version applicable to a given AIIB-financed project depends on when the project enters AIIB's investment pipeline. Most projects covered in this report are governed by the 2024 ESF, except for one project included in AIIB's investment pipeline before Oct. 1, 2021. This report indicates which Environmental and Social Policy (ESP) applies to which projects.

The Bank received 119 requests from the <u>Public Information Request portal</u>, up 72% from the previous quarter and down 6% from Q1 2024. All requests were closed within the required deadline of 30 working days upon receipt. We declined one request for a list of AIIB projects identified as private capital mobilization (PCM). While AIIB provides publicly available data on the total number of projects, we do not disclose the disaggregated, project-level data in line with the reporting practice of the Joint MDB Working Group on PCM.
