Executive Summary

This report is made under Section 12 of the Policy on Public Information (PPI) of the Asian Infrastructure Investment Bank (AIIB or the Bank).

The report summarizes the AIIB’s information disclosure practices as required by the PPI and the Directive on Public Information during the period from Oct. 1 to Dec. 31, 2021 (Q4, 2021).

The report is divided into two sections. First, it looks at AIIB’s practices in proactive disclosure. Second, it provides an overview of AIIB’s responses to information requests.

AIIB’s revised Environmental and Social Policy (ESP) entered into effect during Q4 on Oct. 1, 2021. As the disclosure requirements for environmental and social information under the 2019 ESP changed with the introduction of the 2021 Environmental and Social Framework (ESF), this report indicates which projects are subject to which ESF.

During Q4 2021, AIIB’s proactive disclosure was mostly in line with the requirements set by the PPI and those referred to in its Directive. The Bank in general maintained a good record of promptly disclosing project summary information (PSI) and Project Documents (PD) following their respective event triggers. However, there were a couple of cases where disclosure of PSI and PD took more than 10 working days following the event triggers. This coincided with Bank’s transition to an internal IT system for project team leaders to submit project information for clearance and disclosure. Historically, institutional documents have had very strong compliance with the disclosure requirements set in the Directive. However, in Q4 2021 three out of five, or 60% of these documents did not meet the requirement. Upon investigation, the root cause was determined to be a lack of training and understanding among document owners.

To provide for timely proactive disclosure, AIIB will continue to strengthen the training on the PPI among its staff and make more efforts to help the staff better adapt to the new internal IT system and facilitate project information submission.

The Bank received 90 requests from the public information request portal, all responded within 30 working days following receipt.

AIIB will continue to maintain high compliance in responding to external requests for information and improve quality and efficiency with a customer-centric approach.

1. Proactive Disclosure

AIIB proactively discloses information according to the Directive on Public Information on:

1.3. Proactive Disclosure - Operational Information

1.3.1 Regular Projects

Non-sovereign-backed Financings

Figure 1 illustrates the approval process for Projects supported by Non-sovereign-backed Financings (NSBF) and when key project information is disclosed.

Figure 1. Project Approval Process for Projects supported by NSBF

Unless otherwise approved by the Investment Committee (IC) pursuant to the Environmental and Social Policy (ESP), its associated Directive and the Directive on Sovereign- and Non-sovereign-backed Financings:

Under the 2019 ESP: Initial Project Summary Information (PSI), including environmental and social (ES) information, is disclosed on the working day following the Final Review. Draft environmental and social (ES) documents are disclosed during AIIB’s assessment of the project and no later than on the working day immediately following the date of the Final Review.

Under the 2021 ESP (which applies to all projects entering the Bank’s investment pipeline on or after Oct 1, 2021, and at Management’s discretion, selected projects entering before then): Initial PSI, including ES information is disclosed as follows: 60 days (in the case of Category A projects) or 30 days (in the case of Category B projects) prior to consideration of the Bank’s financing for approval.
Table 3 shows the events in Q4 2021 that required proactive public disclosure of operational information by the Bank, and the resulting disclosure. All projects listed in Table 3 are governed by the 2019 ESP.

Table 5 shows the length of disclosure of the initial PSI and draft environmental and social (ES) information before Board/President approval. During this period of transition, most projects entering the Bank’s investment pipeline prior to October 2021 are governed by the 2019 ESP, while all those entering the pipeline thereafter are governed by the 2021 ESP. For Projects governed by the 2019 ESP, the timing of disclosure of the PSI and ES information is linked to Management decision points and not to approval, whereas for
newer Projects governed by the 2021 ESP, the disclosure timing of the PSI and ES information is linked to approval, and varies depending on the Project’s ES Categorization.

For FI Projects, the focus is on disclosure of ES information for subprojects financed by AIIB under the Project. Under the 2021 ESP, a summary of the FI’s ES policy and management system is disclosed early during Project preparation; and ES information on Category A subprojects is normally disclosed 60 calendar days prior to final approval of the activity for inclusion in the Project, while the ES information for Category B subprojects is normally disclosed on an annual basis. Thus, the timing of disclosure of ES information for subprojects is not linked to the date of approval of the Project by AIIB, but rather to the date of approval of the subproject for inclusion in the financing. (See, ESS 1, Sec. 21.)

One SBF-supported Project approved in Q4 and listed in Table 5 is governed by the 2021 ESP: the India: Gujarat Education Infrastructure and Technology Modernization Program, a PforR operation cofinanced with the World Bank, which Management decided warranted being covered by the 2021 ESF even though it entered the pipeline prior to Oct. 1, 2021. All other projects approved in Q4 and listed in Table 5 are governed by 2019 ESP. Nevertheless, this table shows disclosure of their PSI and ES information all these Projects measured against approval.

**These projects passed Concept Review and Appraisal Review prior to Q4 2021. See their PSI and ES disclosure statuses in previous reports.

*** This operation is a USD 100 million additional financing for the original project. The original project was approved in November 2019; the additional financing was approved October 13, 2021. The original PSI, including ES information, was disclosed in July 2018 and updated in April 2020 and again October 2021; the updated PSI, in which there were no changes to the ES information, was disclosed with the new financing amounts following approval of the additional financing.

1.3.2. Projects under the AIIB COVID-19 Crisis Recovery Facility

AIIB discloses information on investment projects that fall under its COVID-19 Crisis Recovery Facility (CRF) in accordance with the Paper on the Decision to Support the CRF.

In some cases, a nondisclosed Memorandum of the President (MoP) is used in place of a Project Document (PD), in which case AIIB discloses information on the operation via the PSI. A MoP is used instead of a PD for policy-based lending (PBL), development policy financing (DPF) and vaccine supply operations co-financed under the CRF with the Asian Development Bank (ADB) or the World Bank.

In addition, Client environmental and social documentation disclosure requirements for Projects processed under the CRF may, pursuant to the ESP’s provisions on “Projects in Situations of Urgent Need of Assistance” (in both 2019 and 2021 versions), be deferred beyond the date of approval of the Project. Finally, the environmental and social disclosure requirements do not apply to PBLs and DPFs that support policy actions taken by the beneficiary government and are not targeted to specific investments. Environmental and social aspects under co-financed vaccine supply operations are addressed in the Project documentation of the co-financier.
Sovereign-backed Financing

Table 6 shows the events in Q4 2021 that required proactive public disclosure of operational information by the Bank, and the resulting disclosure. The disclosure days vary from project to project because some major parameters of the project were not fixed at the time of screening, given the project’s emergency nature. One SBF-supported Project covered in Table 6 is governed by the 2021 ESP: the Côte d’Ivoire: Strengthening of Vaccination and Health Systems under the COVID-19 Strategic Preparedness and Response Project (000560), which entered the Bank’s investment pipeline after Oct. 1, 2021.

| Eight Project Implementation Monitoring Reports were ready for publication. | Sovereign-backed Financing Project Implementation Monitoring Report (SBF PIMR) | Disclosed.  
Table 7 shows the length of disclosure of the initial PSI and draft environmental and social (ES) information before Board/President approval.

During this period of transition, most projects entering the Bank’s investment pipeline prior to October 2021 are governed by the 2019 ESP, while all those entering the pipeline thereafter are governed by the 2021 ESP. For Projects governed by the 2019 ESP, the timing of disclosure of the PSI and ES information is linked to Management decision points and not to approval, whereas for the newer Projects governed by the 2021 ESP, this disclosure timing is linked to approval, and varies depending on the Project’s ES Categorization.

For FI Projects, the focus is on disclosure of ES information for subprojects financed by AIIB under the Project. Under the 2021 ESP, a summary of the FI’s ES policy and management system is disclosed early during Project preparation; and ES information on Category A subprojects is normally disclosed 60 calendar days prior to final approval of the activity for inclusion in the Project, while the ES information for Category B subprojects is normally disclosed on an annual basis. Thus, the timing of disclosure of ES information for subprojects is not linked to the date of approval of the Project by AIIB, but rather to the date of approval of the subproject for inclusion in the financing. (See, *ESS 1, Sec. 21*.)

Finally, as noted above, for Projects processed under the CRF, the ES information may, pursuant to the ESP’s provisions on “Projects in Situations of Urgent Need of Assistance” (in both 2019 and 2021 versions), be deferred beyond the date of approval of the Project. In addition, the environmental and social disclosure requirements do not apply to PBLs and DPFs that support policy actions taken by the beneficiary government and are not targeted to specific investments.
All Projects approved in Q4 are governed by 2019 ESP. Nevertheless, this table shows disclosure of their PSI and ES information measured against approval.

**Table 7. Disclosure Measured Against Board/President Approval, Q4 2021**
