2. Project Summary and Objectives

The Objective of this Project is to improve the connectivity, safety and climate resilience of the secondary road network in project districts of Assam and enhance the institutional capacity of the state's Public Works Roads Department (PWRD).

The project has three components:

A. Road Improvement. Two subcomponents are included in this component: (1) upgrading about 250 kilometers (km) of state highways and major district roads (MDRs); and (2) retrofitting road safety engineering measures on about 750 km of state highways and MDRs.

B. Modernization of PWRD's road asset management system and computerization.

Reporting Period From 2023/04 To 2023/09

C. Project management support and institutional capacity building.

3. Key Dates

Approval:	Jun. 29, 2022	Signing:	Sep. 19, 2022
Effective:	Dec. 02, 2022	Restructured (if any):

5. Project Implementation Update

The Project implementation is progressing well. The loan has been effective for about 10 months, and till now total value of the awarded contracts reached to around USD 287million, which is about 90% of the loan. In Component A, all 8 large civil works contracts of road upgrading were awarded, including one EPC contract. The AIIB team conducted two physical missions during March and August 2023 to Assam and visited the sites. 7 out of 8 road packages are currently under construction, and the contractor of the remaining one is under mobilization. It is reported 6% of physical progress has been achieved to date (considering the past six months are part of monsoon season in Assam). For Component B, the PMU and AIIB team are actively discussing on the scope and terms of reference of the sub-components, and some of the activities will be procured in the second half of 2023. For Component C, key project implementation support consultants have been hired. The construction supervision consultants have been hired and working with the contractors now. The consultant for Resettlement implementation (RP consultant) support has been hired, which is working with local governments to support the RP process. It is reported contractors have lands to work on (mainly government lands), and it is envisaged the contracts will be completed on time.

6. Status of the Grievance Redress Mechanism (GRM)

Project-specific Grievance Redress Committees have been established at PMU(state level) & district level. To date, 35 grievances were received. 21 of them have been resolved, and 14 of them are under process.

7. Results Monitoring (please refer to the full RMF, which can be found on the last page of this PIMR)

The actual results of 2023 will be updated in the next PIMR.
