Viet Nam: Dak Lak Wind Power Project, Phase 2

Corrective Environmental and Social Action Plan (CESAP)

China Huadian Engineering Co., Ltd (CHEC) is developing the Huadian Dak Lak Wind Power Project (hereinafter as "the Project"), with a total installed capacity of 200MW, located in Krong Buk District, Dak Lak Province. The Project comprises two phases: (i) Phase 1 is comprised of three 50MW sub-projects namely Krong Buk 1 (KB1), Krong Buk2 (KB2), Cu Ne 1 (CN1); and (ii) Phase 2 is to develop the 50MW Cu Ne 2 (CN2) sub-project.

The Corrective Environmental and Social Action Plan (CESAP) describes the environmental and social mitigation, monitoring, and organizational measures to be implemented during the operation of the Project by CHEC. In addition, the CESAP will address outstanding issues at the time of the approval of the financing, in a timely and appropriate manner. Furthermore, the CESAP facilitates the implementation of AIIB's Environment and Social Policy (ESP), Environment and Social Standards (ESS), and Environment and Social Exclusion List (ESEL), as well as applicable local laws and regulations and good industry practice. As required, CHEC and its contractors (if any) will regularly review and update the CESAP in coordination with AIIB to reflect any changes in the project implementation and/or organization.

Dak Lak Wind Power Project, Phase 2 - Corrective Environmental and Social Action Plan

No	Topic	Action	AIIB ESP	Deliverables ¹
1	Mandatory Licenses	Submit to AIIB all permits/licenses/documents in relation to the Completion of administrative procedures on land allocation and land lease.		1.Issuance of Land Compensation Plan for the land needed for Phase 2.2.Issuance of land lease decision, signing of land lease agreement3.Issuance of Land Use Right Certificates (LURC)

¹ All the deliverables below are in connection with the Phase 2 only.

-

2	Stakeholder engagement	Prepare and implement a Communication Plan - to be included in the Stakeholder Engagement Plan (SEP) - to manage the environment and social information disclosure to relevant stakeholders including ethnic minorities and CSOs/NGOs. Stakeholder engagement will involve meaningful consultation with ethnic minorities and will provide an avenue through which ethnic minorities can obtain information regarding project design and implementation, risks, impacts, mitigation measures, culturally appropriate development benefits, raise their concerns and aspirations. Consultation needs to be carried out in the language(s) used by the ethnic minorities.	ESS1	Communication Plan included in the updated SEP. The communication plan will include targeted strategies to engage with ethnic minorities and vulnerable groups. The strategies will be culturally appropriate and gender and intergenerationally inclusive. Implement the SEP. Deliverables will also include records of disclosure of SEP, records of stakeholder engagement activities, meeting notes and summaries of meetings and training on the use of GRMs.
3	Land Acquisition, Involuntary Resettlement and Community Development Plan	Complete the Land Acquisition Audit and Census of Project Affected People (PAP) and update the socioeconomic assessment section of the ESIA Additional Comments: Land Acquisition Audit: Review the land acquired through "willing seller-willing buyer" and government-led processes followed for acquiring the land. i. Document and provide evidence of the "willing seller willing buyer" approach, specifically identify evidence of the ability of the sellers to refuse the sale of land, confirm no	ESS2	1.TOR for carrying out the Land Acquisition Audit, Socioeconomic Census of PAPs 2.Consultant identified and issued a letter of intent for carrying out the Land Acquisition Audit and the Socioeconomic Census of the PAPs 3.Appointment of Consultant for carrying out the Land Acquisition Audit and Socioeconomic Census contingent upon IC approval. 4.Land acquisition audit, and socioeconomic census are completed and reviewed by the AIIB.

- coercion was used for sale of land, and evidence of consultations held and their documentation.
- ii. Review all cases of involuntary land acquisition (i.e., land acquired through government led processes) and document the process followed to evaluate the replacement cost/value of land and identify gaps with ESS2 requirements.
- iii. Assess the gap between the compensation paid and replacement cost.
- iv. Review the status of compensation payment to the PAPs.

Setback zones

Define the setback zones to manage the impacts from potential blade throws, shadow flickering, and noise from turbine operations. The setback zones for each individual tower are outlined in the ESIA.

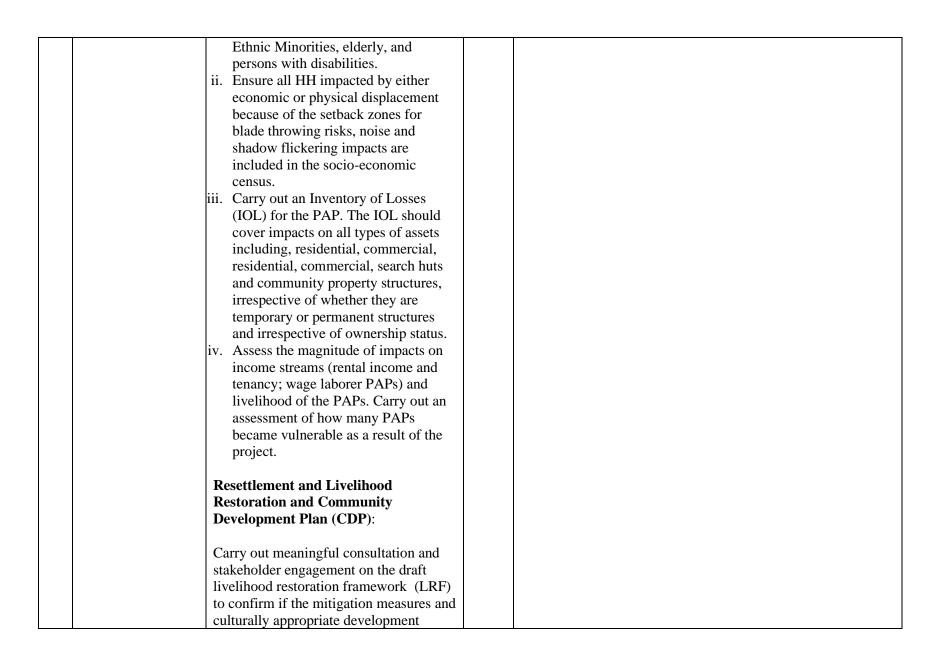

Socio-Economic Census

i. Enumerate all (100 %) physically and economically displaced Households (HH), businesses, and community properties, irrespective of whether the PAP are titleholders or nontitleholders and nature of impact (temporary or permanent). Identify vulnerable groups who face differentiated impacts including HH below the poverty line, women,

Note: Findings and recommendations of the audit and the socioeconomic survey be delivered as standalone reports instead of including in the ESIA.

1. Resettlement and Livelihood Restoration and CDP prepared.

2. Implement the approved Resettlement and Livelihood Restoration and CDP plan.

		benefits are culturally appropriate for ethnic minorities (Indigenous Peoples). Meaningful consultation should be culturally appropriate and should be implemented in a gender and intergenerationally inclusive manner. Inputs and concerns raised during consultation with various groups of PAPs including ethnic minorities and vulnerable groups should be used to design mitigation measures and culturally appropriate development benefits in the Resettlement and Livelihood Restoration and CDP. Identify constraints that may limit the ability of vulnerable groups including ethnic minorities to access the mitigation measures and culturally appropriate development benefits outlined in the Resettlement and Livelihood Restoration and CDP. Update the LRF and prepare a Resettlement and Livelihood Restoration		
4	Biodiversity Impacts	Update the ESIA including the relevant ESMPs (Biodiversity Management Plan and Birds Adaptive Management Plan)	ESS1	1.Consultant identified and issued a letter of intent for carrying out the BMP and Birds Adaptive Management Plan. 2.Appointment of Consultant for carrying out the BMP and Birds Adaptive Management Plan upon IC approval.

				3.Draft BMP and Birds Adaptive Management Plan for AIIB's review. 4. Updated ESMP incorporating the final approved BMP and Birds Adaptive Management Plan for AIIB's review.
5	Noise Impacts	Prepare a Noise Management Plan including mitigation measures related to turbine design; turbine operation procedures based on wind speed monitoring system; and based on grievances, complaints received from PAPs.	ESS1	1.Consultant identified and issued a letter of intent for carrying out the Draft Noise Management Plan for AIIB's review. 2.Appointment of Consultant for carrying out the Draft Noise Management Plan. 3.Updated ESMP incorporating the final approved Noise Management Plan, including revised noise monitoring, and reporting arrangements, for AIIB's review. Note: Improved GRM to capture grievances related to noise impacts during the operational phase.
6	Shadow Flickering Impacts	Develop a Shadow Flickering Management Plan to mitigate the impacts.	ESS1	Updated ESMP with Shadow Flickering Management Plan, including revised shadow flickering monitoring and reporting arrangements. Improved GRM to capture grievances related to shadow flickering impacts during the operational phase.

7	GRM	 Assign dedicated personnel to manage the GRM processes. Disseminate information on AIIB PPM among the PAPs. Improve the GRM process for PAPs. Establish and operationalize a worker's GRM. Engage third party review of existing GRM focusing on: responsiveness of the GRM; adequateness of technical solutions provided; and close of outstanding complaints. 	ESP	 1.Dedicated personnel to manage the GRM processes assigned. 2.Information on AIIB PPM is disseminated. 3.Improved GRM for PAPs is functional. 4.Worker's GRM is established and functional. 5.Third-Party Review Report
8	Monitoring and Reporting	Prepare quarterly monitoring reports on the implementation status of ESMP and CESAP.	ESP	Quarterly monitoring reports for review by AIIB.
9	Disclosure	Disclose the following revised drafts: - ESIA – Non-Technical Summary and CESAP in English and Vietnamese. - ESIA Main Report and Annexes - in English. - Resettlement and Livelihood and CDIP Executive Summary and	ESS1	1.Documents disclosed on the AIIB website and the Project Sponsor's website. 2.Hard copies are also to be made available in the Project areas.
