

Project Summary Information

Date of Document Preparation: July 15, 2025	
Project Name	Cross-border Livestock Health and Value-chain Infrastructure Improvement Project
Project Number	P000707
AIIB member	Kingdom of Cambodia
Sector/Subsector	Health Infrastructure
Alignment with AIIB's thematic priorities	Green infrastructure; Connectivity and Regional Cooperation; Technology-enabled Infrastructure
Status of Financing	Approved
Objective	The Project aims to strengthen animal and human health safety and promote cross-board livestock trading among countries in the Greater Mekong Subregion (GMS) including Cambodia, Lao PDR, Viet Nam, Thailand, and China.
Project Description	<p>The Project will support, based on the One Health approach: (i) construction of a vaccine center and establishment of disease control zones to strengthen the prevention and monitoring systems of animal and zoonotic diseases; (ii) refurbishment of the national animal health research institute, provincial animal health laboratories and relevant facilities to upgrade diagnosis and control functions of the diseases; (iii) establishment of livestock value chain infrastructure with high standards of hygiene and sanitation; (iv) enhancement of policies and regulations for better health, safety, supply and trade in livestock and livestock products; and (v) operation and management of the Project.</p> <p>The recent outbreak of coronavirus disease (COVID-19) pandemic and monkeypox underscores the need for a One Health approach that broadens disease surveillance beyond the human to cover the zoonotic sphere. The integration of the knowledge and technical know-how found in veterinary practice in human health is essential to prepare for future health crises. However, the practical implementation of the One Health approach remains challenging and very limited, and the proposed Project is a significant step forward especially in the countries in the GMS with rapidly expanding livestock trade.</p>
Expected Results	The main outcomes of the Project will be improved livestock, human and environmental health, and productive value chain infrastructure. This will lead to increased cross-border trade in livestock and livestock products. The Project will also help

	concerned government agencies respond timely in preparation for emerging zoonotic disease outbreaks, and food safety incidents, including antimicrobial resistance transgressions.
Environmental and Social Category	B
Environmental and Social Information	<p>The Project's environmental and social (ES) risks and impacts will be assessed in accordance with the Asian Development Bank (ADB)'s Safeguard Policy Statement (SPS) as ADB is a lead co-financier. To ensure a harmonized approach to addressing the ES risks and impacts of the Project, and as permitted under AIIB's Environmental and Social Policy (ESP), ADB's SPS will apply to the Project in lieu of AIIB's ESP. AIIB has reviewed ADB's SPS and is satisfied that: (a) it is consistent with AIIB's Articles of Agreement and materially consistent with the provisions of AIIB's ESP, including the Environmental and Social Exclusion List and the relevant ES Standards; and (b) the monitoring procedures will be put in place for the Project. ADB has categorized the ES risks of the project as Category B for Environment, B for Involuntary Resettlement and B for Indigenous Peoples, as it is likely to have ES impacts that are site-specific, few if any of them are irreversible, and in most cases, mitigation measures can be designed and implemented. This is equivalent to Category B if AIIB's ESP were applicable.</p> <p>The main and more complex adverse impacts of the Project will come from operation phase versus construction phase. Activities at the project site during construction stage may generate solid waste, wastewater, noise, air emission and soil erosion, and disturbance to nearby residents and potentially pollute water bodies, disturbing local ecology, and local physical cultural resources. The potential risks include (i) wastewater and the adequate treatment and slurry discharge/use; (ii) solid and hazardous wastes, their management and disposal; (iii) odor and air emissions; and (iv) health and safety including biosafety risks. These impacts have been assessed and corresponding mitigation plans include operation and maintenance of properly designed waste treatment facilities, monitoring of wastewater discharges, and implementation of generally accepted procedures for handling and disposal of solid and hazardous wastes. These were incorporated in the Environmental Management and Monitoring Plan.</p> <p>A Resettlement Framework (RF) was prepared to outline potential adverse impacts relating to permanent and temporary, physical, and economic displacement of both titleholders and non-titleholders and to propose mitigation measures. RF has been disclosed and it outlines the resettlement policy principles, procedures, and institutional arrangements to mitigate risks and offer sustainable livelihood and development opportunities to the people affected by the Project. ADB has categorized this project as effective gender mainstreaming. The gender analysis carried out as part of project preparation has identified</p>

	<p>and assessed (i) strengths and weaknesses with regard to gender and social inclusion issues in the Cambodian livestock subsector; (ii) gender context in livestock value chain; and (iii) gender dynamics in the livestock value chain. A gender equality and social inclusion action plan inclusive of a monitoring plan has been prepared to manage the challenges identified during the gender analysis and disclosed at: https://www.adb.org/projects/documents/cam-53240-003-gap.</p> <p>Prepared ES documents have been disclosed on ADB’s website at: https://www.adb.org/projects/53240-003/main, AIIB’s website at: Cambodia: Cross-border Livestock Health and Value-chain Infrastructure Improvement Project - Projects - AIIB, and the Government’s website at: អគ្គនាយកដ្ឋានសុខភាពសត្វ និងផលិតកម្មសត្វ Facebook. Moreover, semi-annual ES monitoring reports will be provided by the client to AIIB for review, and the Bank retains rights to conduct field supervision in the course of the Project implementation along with ADB.</p> <p>A Project-specific Grievance Redress Mechanism (GRM) has been established to receive, acknowledge, evaluate and facilitate the resolution of the complaints relating to environment and social issues with corrective actions proposed. This applies understandable and transparent processes that are gender-responsive, culturally appropriate, and readily accessible to all segments of the affected people. In addition, the GRM has been established in each target province and each Project site. Records of grievances received, corrective actions taken, and their outcomes shall be properly maintained. In the upcoming mission, AIIB will assess whether the GRM that has been established is functional, including whether the information on Project-specific GRM has been properly disclosed. As part of the disclosure of ES instruments, ADB’s independent accountability mechanism (IAM) has been disclosed to local stakeholders and the Project-affected people in an appropriate and timely manner.</p>																			
Cost and Financing Plan	<p>The indicative total cost is USD128.78 million.</p> <table><tr><th colspan="2">Modality and Sources</th><th>Amount (\$ million)</th></tr><tr><td colspan="2">ADB</td><td>62.90</td></tr><tr><td rowspan="2">AIIB</td><td>Sovereign-Backed Financing Loan</td><td>33.00</td></tr><tr><td>Grant from the Pandemic Prevention, Preparedness and Response Financial Intermediary Fund</td><td>10.00</td></tr><tr><td colspan="2">Government</td><td>22.88</td></tr><tr><td colspan="2">Total</td><td>128.78</td></tr></table>			Modality and Sources		Amount (\$ million)	ADB		62.90	AIIB	Sovereign-Backed Financing Loan	33.00	Grant from the Pandemic Prevention, Preparedness and Response Financial Intermediary Fund	10.00	Government		22.88	Total		128.78

Borrower/Investee Company/Counter	Kingdom of Cambodia																			

party/Guaranteed entity				
Implementing Entity	General Directorate of Animal Health and Production, Ministry of Agriculture, Forestry and Fisheries			
Estimated date of loan closing	June 2030			
Contact Points:	AIIB	ADB	Borrower	Implementation Organization
Name	Mari Shimizu	Chanthou Hem	H.E. Pen Thirong	H.E. Dr. Tan Phannara
Title	Investment Officer	Lead Project Officer	Under Secretary of State	Director General, General Directorate of Animal Health and Production, Ministry of Agriculture, Forestry and Fisheries
Email Address	mari.shimizu@aiib.org	chem@adb.org	gdicdm@mef.gov.kh	tan.phannara@gmail.com
Date of Concept Decision	Oct. 26, 2022			
Date of Appraisal Decision	Nov. 16, 2022			
Date of Financing Approval	Sep. 8, 2023			

Independent Accountability Mechanism	As noted above, the ADB's SPS will apply to this Project instead of AIIB's ESP. The Bank has further agreed with ADB that it will rely on that institution's IAM to handle submissions relating to ES issues under the Project. Consequently, in accordance with the Bank's Policy on Project-affected People's Mechanism (PPM), submissions to the PPM under this Project will not be eligible for consideration by the PPM. Information on ADB's IAM is available at: Accountability Mechanism Asian Development Bank .
