

RESETTLEMENT ACTION PLAN (RAP) UPDATED

RSAB Harapan Kita Building Construction Project and Area Arrangement of 3 Berlian Hospitals (RSAB Harapan Kita, RSJPD Harapan Kita, and RS Kanker Dharmais)

Letjen S. Parman Street, Kav. 87, Sub District Slipi, District. Palmerah, West Jakarta,
Special Capital Region of Jakarta 11420

November 7th, 2025

FOREWORD

The Resettlement Action Plan (RAP) document was prepared in response to the arrangement of street vendors (PKL) affected by RSAB Harapan Kita Construction Project and Area Arrangement of the 3 Berlian Hospitals.

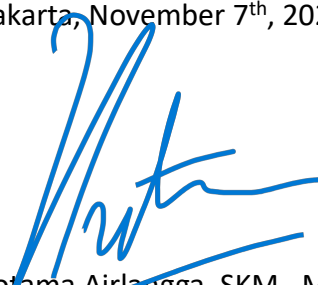

We express our gratitude to God Almighty, as well as appreciation and gratitude, to all parties who have been involved and supported the preparation of this RAP document. In the preparation of this document, we admit that it is far from perfect. For this reason, we accept suggestions and constructive criticism towards the improvement of this document with open arms. We hope that this document can be useful and serve as a guide for all parties involved in the project.

DISCLAIMER

This Resettlement Action Plan (RAP) is a living document. The contents of this document may be updated, revised, or supplemented as necessary to reflect new information, changing circumstances, or evolving regulatory or project requirements. Any such updates will be made in consultation with relevant stakeholders and in accordance with applicable procedures.

On behalf of the Project Management Unit (PMU) and the Ministry of Health, we extend our sincere appreciation to all partners and stakeholders who contributed to the preparation of this document, including community representatives, technical consultants, hospital personnel, and government institutions. With your continued collaboration, we are confident that this project will help pave the way for a healthier, greener, and more resilient future for the people of Jakarta.

Jakarta, November 7th, 2025

Ghotama Airlangga, SKM., MKM
PMU Director

RSAB HARAPAN KITA BUILDING CONSTRUCTION PROJECT AND AREA ARRANGEMENT OF 3 BERLIAN HOSPITALS (RSAB HARAPAN KITA, RSJPD HARAPAN KITA, AND RS KANKER DHARMAIS) RESETTLEMENT ACTION PLAN (RAP)

Updated, November 7th, 2025

Executive Summary

The Resettlement Action Plan (RAP) was prepared in response to improve the possible new places of street vendors affected ongoing construction carried out by RSJPD Harapan Kita and RSKD (Dharmais Cancer Hospital). The area vacated by street vendors will be used by RSAB Harapan Kita to develop a plaza for public use. RSAB Harapan Kita Building Construction Project and Area Arrangement of the 3 Berlian Hospitals along with ongoing construction by RSJPD Harapan Kita and RSKD is aimed at improving healthcare services, which necessitates the possible new places of the street vendors operating around the hospital site.

The main objective of this RAP is to ensure that affected vendors receive appropriate support, minimize economic disruption, and provided with alternative livelihood. This RAP document has been prepared through a consultation process with reference to the laws and regulations of the Republic of Indonesia and International good practices and (AIIB) policies and requirements on resettlement. The implementation of the RAP will be regularly monitored through an open feedback and grievance mechanism.

This document is an updated RAP from the one that was approved and disclosed on May 14, 2025. This updated RAP includes information on consultation processes and results with the 41 vendors that took place on September 3, 2025 and September 29, 2025 as well as complaint handling. The updates are included in Section 6, Appendix 8 and 9.

Ringkasan Eksekutif

Resettlement Action Plan (RAP) ini disusun sebagai upaya untuk meningkatkan penataan kemungkinan tempat baru PKL yang terkena dampak pembangunan yang sedang berlangsung yang dilakukan oleh RSJPD Harapan Kita dan RSKD (Rumah Sakit Kanker Dharmais). Area yang dikosongkan oleh PKL akan digunakan oleh RSAB Harapan Kita untuk membangun plaza yang dapat digunakan oleh masyarakat umum. Proyek Pembangunan Gedung RSAB Harapan Kita dan Penataan Kawasan Tiga Rumah Sakit Berlian serta pembangunan yang sedang berlangsung oleh RSJPD Harapan Kita dan RSKD bertujuan untuk meningkatkan layanan kesehatan, yang mengharuskan relokasi pedagang kaki lima yang beroperasi di sekitar lokasi rumah sakit.

Tujuan utama dari RAP ini adalah untuk memastikan bahwa para pedagang kaki lima yang terkena dampak menerima dukungan yang sesuai, meminimalkan gangguan ekonomi, dan menyediakan mata pencaharian alternatif. Dokumen RAP ini telah disusun melalui proses konsultasi dengan mengacu pada peraturan perundang-undangan Republik Indonesia dan praktik-praktik yang baik serta kebijakan dan persyaratan internasional tentang pemukiman kembali. Pelaksanaan RAP akan dipantau secara teratur melalui mekanisme umpan balik dan pengaduan yang terbuka.

Dokumen ini merupakan pembaruan dari RAP yang telah disetujui dan diumumkan pada tanggal 14 Mei 2025. RAP yang diperbarui ini mencakup informasi mengenai proses dan hasil konsultasi dengan 41 vendor yang dilaksanakan pada tanggal 3 September 2025 dan 29 September 2025, serta penanganan keluhan. Pembaruan tersebut tercantum dalam Bagian 6, Lampiran 8, dan Lampiran 9.

1. Introduction

1.1 Background

RSAB Harapan Kita Building Construction Project and Area Arrangement of the 3 Berlian Hospitals (RSAB Harapan Kita, RSJPD Harapan Kita, and RSKD) are designed to support Golden Indonesia 2045 and the 2025–2045 National Long-Term Development Plan (RPJPN) through improvements in accessibility, service quality, and healthcare service infrastructure. The proposed project has been included in the revised List of Medium-Term Planned External Loans (DRPLN) 2020–2024 to finance priority activities focused on economic infrastructure with a high leverage effect and aligned with the focus of foreign loan utilization plans. The goal of RSAB Harapan Kita Building Construction Project and Area Arrangement of the 3 Berlian Hospitals is to improve the availability, accessibility, and quality of healthcare services in the 3 national referral hospitals specializing in women and child health, cardiovascular care, and cancer treatment.

The Ministry of Health requests financing from AIIB for the construction of RSAB Harapan Kita to improve the quality of health services and increase service capacity so that it can meet the increase in patients due to rapid urbanization in Jakarta, Indonesia. The AIIB undertook a first field mission between December 18-19, 2024. The project concept has been confirmed and subsequently an Appraisal Mission was carried out by AIIB during April 14-17, 2025. The implementation of the project will be carried out from 2025 to 2030.

The Ministry of Health has set up a Project Management Unit (PMU), established within the Directorate General of Advanced Health (DGAH), responsible for the overall coordination and management of the project. The management of environmental and social aspects is specifically vested in the Working Group for Legal, Environment, and Social Affairs under the PMU. This team is tasked with the responsibility of coordinating the mitigation and management of all environmental and social impacts that may emerge. Figure 1 illustrates the relationship between the Ministry of Health (i.e. the Project Executing Agency) and the key stakeholders of the project, while Figure 2 illustrates the organizational structure of PMU, and Figure 3 illustrates Project Implementation Unit (PIU). Each PIU is responsible for daily project operations under the RSAB Harapan Kita, RSJPD Harapan Kita, and RSKD. The Legal, Environmental & Social focal point working team is established under each PIU, to support the implementation of the E&S management. This RAP is prepared by the PIUs with the support of PMU.

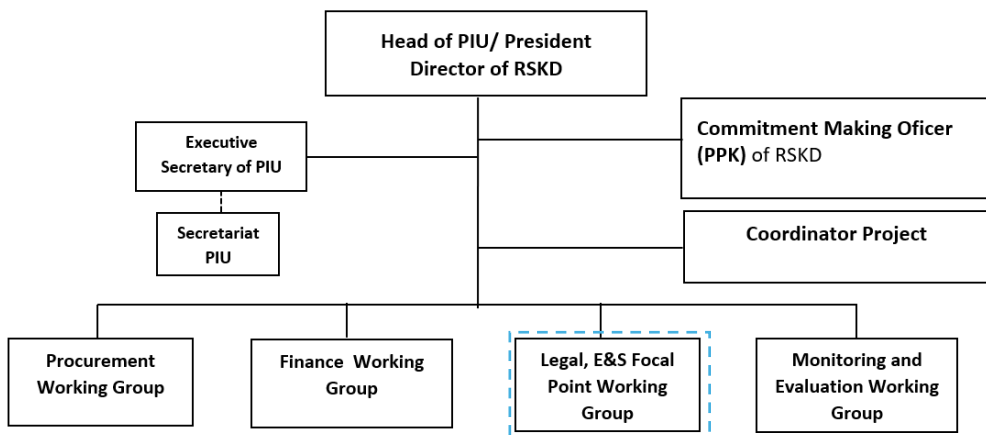

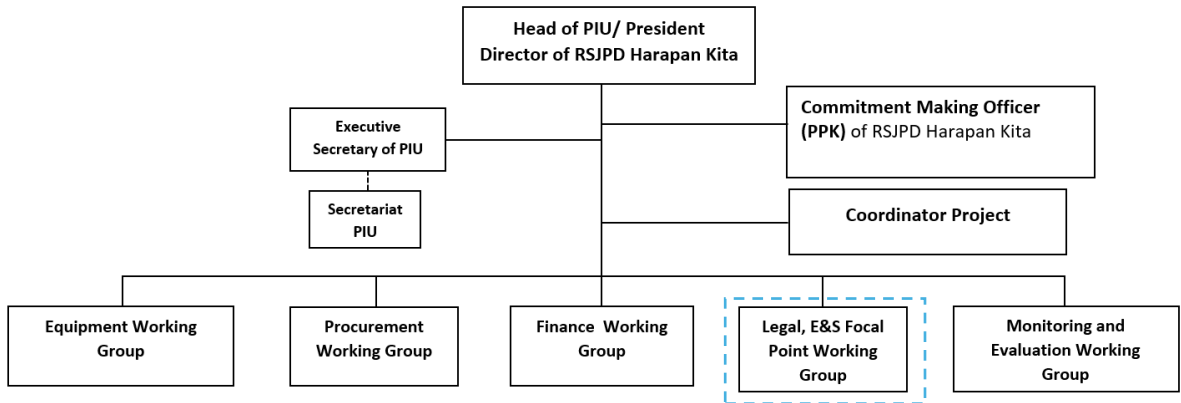

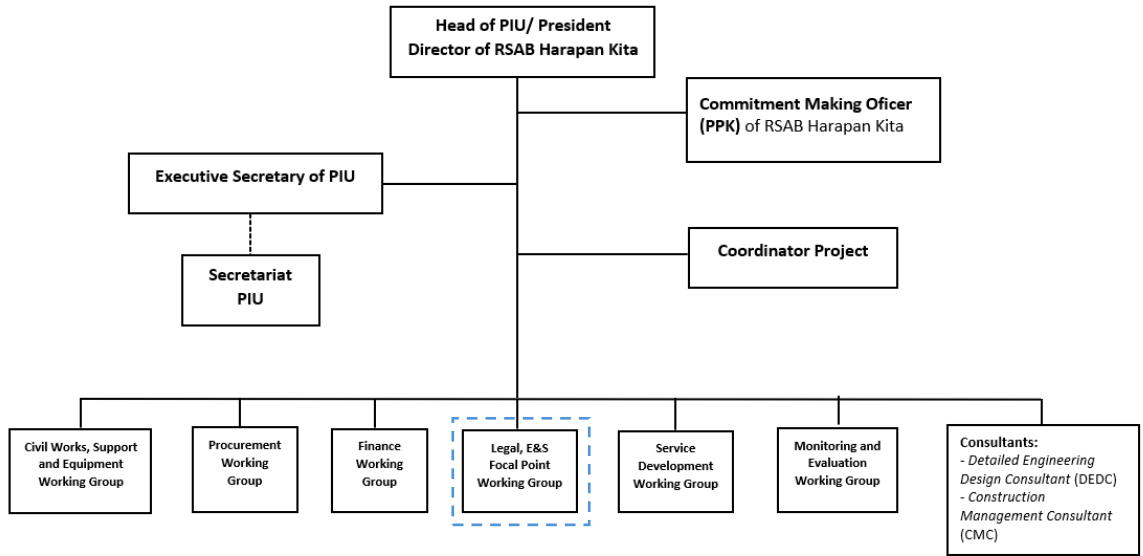

Figure 3. PIUs Structure at RSAB Harapan Kita, RSJPD Harapan Kita, and RSK Dharmais

1.2 Project Components and Activities

The Project (i.e., RSAB Harapan Kita Building Construction Project and Area Arrangement of the 3 Berlian Hospitals) aims to support the development of infrastructure facilities, regional planning, medical and supporting equipment, development of IT system integration, human resource capacity building, and research. The Project will consist of the following five main components, as follows:

- **Component A:** Infrastructure (Civil Works) with a total construction area of approximately 141,688 square meters, this component focuses on RSAB Harapan Kita Building Construction and Area Arrangement of the 3 Berlian Hospitals at the existing location to strengthen the provision of health services.
- **Component B:** Medical and Non-Medical Equipment. This component aims to increase the capacity of hospitals in providing advanced medical services.
- **Component C:** IT system development (including consulting services). This component aims to increase the IT capacity of hospitals to provide more effective services.
- **Component D:** Human Resource Development. This component emphasizes capacity building for healthcare and non-healthcare staff with the aim of ensuring the effective operation of enhanced facilities.
- **Component E:** Project Management. This component ensures effective planning, execution, and monitoring of the Project.

The Project will also provide specialized medical equipment and integrate (physically, digitally, and operationally) the three hospitals – into an integrated healthcare complex to improve the overall coordination of patient services and care, thereby introducing digital infrastructure, which will support the digitization of hospital operations and enable the adoption of cutting-edge medical technologies, such as telemedicine. The integration of medical equipment and enhanced services will enable hospitals to adapt to shifting demographics and emerging disease patterns, including aging populations, non-communicable diseases (NCDs), and climate-sensitive health conditions as tertiary care and national-level referral hospitals. Construction and infrastructure upgrades will follow a green healthcare model that combines climate mitigation and adaptation measures while prioritizing energy efficiency. In addition, the structural design will incorporate measures that reduce the risk of damage from future earthquakes to save lives and ensure the continuation of its operations.

These three hospitals are located next to each other in one large site complex, and there is a street (Kota Bambu Selatan – KBS street) between the RSJPD Harapan Kita and RSKD complexes. The footprint of the RSAB Harapan Kita is next to the RSJPD Harapan Kita on the other side and is situated in a distance from the street, i.e. not bordering with the street. The AIIB financing though will be used to construct a plaza over the street however it should be noted that most of the funds from AIIB financing will go towards construction of RSAB Harapan Kita, increasing the total bed capacity – from the existing 271 beds to 550 beds and provision of medical equipment to RSAB Harapan Kita and RSJPD Harapan Kita (see image below for area arrangement).

Figure 4. Existing RSAB Hospital and new RSAB

1.3 Project Scope and Impact of the Resettlement

At the beginning of the Project Identification (July 2024), it was agreed that the Project would finance the construction of RSAB Harapan Kita on existing land owned by RSAB Harapan Kita. No land acquisition is required. For the two hospitals (RSJPD Harapan Kita and RSKD), the Project will finance the provision of medical and IT equipment to improve IT connectivity between the three hospitals. AIIB will not finance any physical construction in these two hospitals.

While the scope and activities of the AIIB-funded Project are being defined, two neighboring hospitals (RSJPD Harapan Kita and RSKD) are in the process of renovating/constructing their respective hospitals, which are funded by different financing sources. These ongoing civil works are not part of the scope of the Project. The reconstruction of the RSJPD Harapan Kita was financed by Tokushukai Medical Group (Japan). To reconstruct the hospital, the RSJPD Harapan Kita needs to relocate around 26 street vendors who are currently running small businesses and foods with 35 kiosks/stalls on the sidewalk along the Street (Kota Bambu Selatan - KBS Street) outside its premise. Similarly, the renovation of the RSKD, which is funded by various financing sources, will need to relocate about 15 street vendors who run 27 food kiosks/stalls and other small businesses on the sidewalks next to the hospital land plot. These 41 vendors have set up kiosks/stalls on the sidewalk which is part of the street under the management of the DKI Jakarta government. The vendors of these kiosks/stalls live in the vicinity of the hospital area and come to the kiosk/stalls during their working hours.

Figure 5. Site and Street Vendors' Activities in KBS Street

The RSJPD Harapan Kita and the RSKD have been planning to relocate the affected vendors since 2022. These two hospitals in collaboration with the West DKI Jakarta City Government have held a series of public meetings with these 41 vendors to inform them about the hospital redevelopment plans. Later, the meetings include the plan of the landscaping improvements to transform this street (where the 62 kiosks/stalls are located) to a plaza (see the image below for the location of the existing street where the vendors run their businesses which will be converted into a plaza).

Figure 6. Street that will be Converted into Plaza

The 3 Berlian hospitals management and the Ministry of Health in consultation with the West DKI Jakarta City Government agreed to convert part of the KBS Street (where the 41 vendors are located) into a plaza for public use¹. The Ministry of Health plans to use the AIIB financing for the plaza development.

The scope of the Project then includes the construction of a public plaza, which will be located on the same street section (KBS Street) between the two hospitals, i.e., RSJPD and RSKD. Therefore, the impact related to the relocation of the street vendors is also considered in the Project. These two hospitals and local authorities (West DKI Jakarta City Government) have started the relocation process for the 41 vendors since 2022.

Various consultation meetings with affected vendors have been held in 2023 and 2024 prior to the AIIB Project Identification. The construction of the Project at RSJPD Harapan Kita and RSKD will use cranes (tower cranes), heavy equipment, trucks for materials and Project equipment. The contractor conveyed information that the area around the Project that is still being used by the vendors is to be cleared to maintain their safety and provide access particularly during construction. For this process, it has been agreed between the contractor and the vendors facilitated by the West DKI City Government (local authority) regarding the mechanism for the affected vendors by providing grant support² given to the vendors, because they are responsible for their kiosks/stalls and do their business directly without tenants. All affected street vendors confirmed their agreement to do self-relocation in April 2025 (Appendix 7).

The relocation of the affected vendors is necessary to provide access to the ongoing civil works at both hospitals and to ensure the safety of the affected vendors from the movement of heavy and hazardous equipment and given that an agreement on the relocation between the two hospitals, the local authority and the affected vendors is expected shortly. It has been agreed between the AIIB and the Three Diamond Hospital Management that the two hospitals (RSJPD Harapan Kita and the RSKD) will continue completing the process including consultation and relocation.

1.4 Objectives of RAP and Methods of Collecting Information

1.4.1 Objectives of RAP

As the construction of the plaza is an activity to be financed by AIIB involving the street where vendors are being relocated, the PMU has prepared a RAP aimed at:

- (1) Documenting the processes and outcomes of consultations, grant support, and resettlement** carried out by both hospitals, i.e., RSJKD Harapan Kita and RSKD in collaboration with local authorities. This process includes assessment if there are any complaints, grievance resolution, and relocation processes and outcomes, for 41 vendors.

¹ The West DKI City Government plans to relocate all street vendors along the whole Kota Bambu Selatan Street

² Commercially sensitive information not disclosed

- (2) Conduct a review of the above processes and outcomes (from 2022 to April 30, 2025). This review will be conducted vis-a vis a) the principles and requirements of relevant Indonesian laws and regulations and b) the objectives of the AIIB Environmental and Social Framework (ESF) to inform the process and results of the Project Assessment.**
- (3) An action plan to address the gap between the resettlement process and outcomes (carried out by both hospitals) and the objectives and requirements of relevant national laws and regulations and the objectives of AIIB Environmental and Social Standard 2 – Land Acquisition and Resettlement.**

1.4.2 Methods of Collecting Information

The legal, environment, and social working group of the PMU has collected information through survey and interviews with vendors as well as coordinators, and local authorities. The collected information mainly comprises of:

- (1) Demographics of street vendors
- (2) Asset of the vendors
- (3) Income
- (4) Information related to social organization of street vendors
- (5) Survey conducted with all 41 affected vendors and in-depth interviews with 19 street vendors, followed by focused group discussions with them

2. Documentation: Resettlement Process until May 2025

Based on the nature, scope and scale of resettlement associated with the 41 vendors, the following aspects were summarized: a) socio-economic profile of street vendors associated with the two hospitals (RSJPD Harapan Kita and RSKD), b) potentially impacted vendors' assets, c) documentation of the consultation process – focusing on 1) Consultation method, 2) Relocation date, 3) Grant support, 4) Complaint handling mechanism currently used by both hospitals, 5) Consultation process, 6) Next step that will be taken by the two hospitals.

2.1 Socio-economic conditions of stakeholders and vendors

Along the KBS Street (total length approximately 450 meters), there are informal economic activities including 41 vendors occupying part of the KBS Street (approximately 150 meters) who are affected by the Project, as this part of the street will be developed as a plaza, to be financed by the AIB. They have been running street food kiosks/stalls and other businesses for many years. These vendors established kiosks/stalls and other businesses along the roadside of the KBS Street where businesses are not allowed. Of the 41 vendors, there are 26 vendors who have 35 kiosks/stalls located on the side of RSJPD Harapan Kita and 15 other vendors have 27 food kiosks/stalls and other businesses on the roadside of RSKD (Detail Information: Appendix 1: Survey Result on Affected Assets). On average, vendors' monthly income ranges from IDR 3,000,000 to IDR 30,000,000

Based on consultations with local authorities, and vendors, it was identified that the vendors are organized under a structure group led by coordinators. The coordinators are responsible for overseeing vendors' activities, including managing location and facilities. The coordinators act as representatives of the street vendors in conducting consultations and negotiations with the two hospitals, contractor and local authorities related to the continuity of street vendors' businesses. The coordinators are two persons who are entrusted by the street vendors because they have managed business activities on the KBS Street. For the management of premise and provision of services each street vendor pays IDR 600,000/month to the coordinators.

2.2 Consultations and Meetings

2.2.1 Consultations

Both hospitals (RSJPD Harapan Kita and RSKD) and local governments have consulted with the affected vendors through their representatives (coordinators), through a) face-to-face community meetings and b) focused group discussions (with female vendors). Information provided to the vendors/coordinators in the consultation meetings were:

- The construction plans of the two respective hospitals.
- The potential impact of construction on existing vendors' businesses.
- Potential relocation plans, planning processes, and potential rights that vendors are entitled to if they are required to move out to other location.
- Solicit feedback from consulted vendors about construction plans and their concerns about potential relocation processes and payments
- They will be invited to future consultation meetings (as relocation plans and rights are reinforced) to discuss grant support and the relocation process.

Based on interviews with street vendors, the following types of impacts were identified if these vendors needed to move to other areas:

- Loss of affected structures (kiosks/stalls)
- Issues related to relocation (e.g. demolition, transportation, re-establishment in a new location)
- Loss of revenue (during closure and transition periods)
- Loss of some revenue (during the initial period in the new location)
- Concerns on business continuation

Since the start of the vendor relocation plan, consultation meetings have been held as many as 6 (six) meetings with:

- (1) Mayor of West DKI Jakarta City Government on December 24 and 30, 2024
- (2) Street vendor representatives on January 3 and 10 and February 4, 2025, at the Kota Bambu Utara village office
- (3) Street vendor representatives on March 21, 2025, at the KBS Village office with various stakeholders: affected vendors and local authorities.

During the meeting, participants were informed about the hospital construction plans, and the need to relocate vendors to improve the hospital's operations and future landscape. Affected vendors are notified of the potential impacts on their existing kiosks/stalls operations and are encouraged to ask questions and provide advice for the grant support and possible new places, and revenue recovery planning process for affected vendors.

It is noted that during a meeting with the affected vendors on March 21, 2025, vendors were informed of options that affected vendors can choose from - at their own discretion. Vendors were also asked if they had any expectations. Based on the consultation meeting, all the street vendors confirmed that they prefer to move to another area where they could continue/maintain their existing jobs/income activities. Further the vendors have confirmed their satisfaction with the consultation and the relocation process and the grant support provided, as provided in appendix 7.

In addition to large group meetings, focused group discussions were also conducted with female participants, especially those who were the heads of vendor families. The main concerns and expectations raised by vendors are summarized below:

- It is important that the vendors' current business activities/revenue need to be continued at possible new place location to be agreed between the vendors and the hospital management;
- In the possible new place, the vendors expect to have the same level of customer access, with disruption in business as minimal as possible.
- There should be clarity on where vendors can continue their businesses after the construction of the hospital is completed (see Appendix 4 for detailed feedbacks from vendors attending the consultation meeting on March 21, 2025).

2.2.2 Results of the Recent Meetings with the West DKI Jakarta City Government and the Two Hospital³ Management

- The West DKI Jakarta City Government has issued the first warning letter to district and sub-district offices for the cleaning of street vendors in the KBS Street, starting April 17, 2025. This warning letter is valid for 7 days.
- On April 25, 2025, the West DKI Jakarta City Government has issued a second warning letter instructing street vendors to immediately vacate the area of KBS Street, with a deadline of April 30, 2025. This warning letter is valid for 3 days.
- The target date for the clearance of KBS street is May 15, 2025.
- The West DKI Jakarta City Government's warning was conveyed to the coordinators to be forwarded to the street vendors. Based on the information that had been conveyed by the coordinators, the street vendors had understood the warning. They have asked for the opportunity to prepare for the demolition of their stalls. This was conveyed by the coordinators in a meeting with the West DKI Jakarta City Government and contractors on April 2 and 3, 2025.

2.3 Grant Support

The coordinators have received all grant support amount from the contractor of RSJPD Harapan Kita and contractor of RSKD on April 24th, 2025. The coordinators are required to distribute the received grant support to each vendor before she/he moves out from the site. The vendors are expected to move out from the site on May 14, 2025, and voluntarily dismantle the kiosks/stalls and take the usable or valuable materials with them. Appendix 7 provides statement letter from the street vendors confirming voluntary relocation.

³ RSJPD Harapan Kita and RSKD

2.4 Demolition Plan

The deadline for the dismantling of street vendor kiosks/stalls on KBS Street is May 14, 2025, in accordance with the Joint Agreement between the coordinators of the vendors as representatives of them and the West DKI Jakarta City Government. The dismantling of vendors' structures/assets is to be carried out by the vendors themselves. They are encouraged to collect the materials such as iron frames, galvalume roofs and GRC boards of the stalls that can still be used to rebuild their kiosks/stalls in the new place. The remaining uncollected materials will be cleaned up by the West DKI Jakarta City Government

2.5 Complaint Handling Mechanisms

Complaint Handling Mechanisms through the WhatsApp Application with a Number +62-0821-2143-8182 is managed by the Public Relations of the Tokushukai Building Construction Project and the RSKD Parking Building construction Project. The number has been published in the RSJPD Harapan Kita and RSKD Project areas since April 19, 2025 (photo attached: Appendix 8 – Handling Mechanism Photo).

Complaint Handling Procedures:

1. The officer will check incoming messages through the WhatsApp Application at any time, no later than every 2 (two) hours.
2. The officer will provide a response to each incoming message, no later than 120 minutes after the message is received through the WhatsApp application.
3. The responses to complaints given are as follows:
 - a. The officer will respond to the message of public complaints with the following answer:
 - apologies for the inconvenience felt by the sender of the message
 - submit a response to the complaint filed in the case that in there is a standard procedure for resolving the problem in the matter complained of
 - declare a commitment to promptly follow up with the relevant person responsible for the complaint filed
 - expressing gratitude and commitment to contact the sender of the message to follow up on the submitted complaints
 - b. The officer will reply to the community's input message with the following answer:
 - expressing gratitude for the input that has been given
 - declare a commitment to immediately follow up with the person in charge of the input provided
4. Every day the officer records and documents all incoming messages through the WhatsApp Application to discuss every incoming complaint.
5. Any complaints or inputs received are recorded and reported to the person in charge of the Project for follow-up plans with relevant parties.
6. The Project Public Relations Team provides a Report on Non-Conformity and Its Resolution (*Laporan Ketidaksesuaian dan Penyelesaiannya/LKP*) to the relevant person in charge in accordance with complaints and inputs received from the community.

7. The person in charge of complaints or public inputs makes improvement plans and targets implementation times.
8. The Project Public Relations Team verifies the implementation of the improvement plan at the set time target; The Project Public Relations Team conveys the results of identification, analysis and discussion at the regular meeting of the Project.
9. Since the publication of the complaint number, **no complaints have been received to date.**

3. Gap Analysis: Analysis of Principles and Requirements of AIIB ESF and Relevant National Laws and Regulations

3.1 National Laws and Regulations

- Relevant Government of Indonesia regulations related to handling social impacts for affected communities that utilize, occupy and/or control public land Presidential Regulation Number 62 of 2018 concerning Community Social Impact Management in the Context of Land Provision for National Development
- Presidential Regulation Number 78 of 2023 concerning Amendments to Presidential Regulation Number 62 of 2018 concerning Community Social Impact Management in the Context of Land Provision for National Development

3.2 AIIB's ESF Requirements

ESS 2 in the ESF (Land Acquisition and Involuntary Resettlement) of AIIB aims to address the impacts of Project-related land acquisitions, including restrictions on land use and access to natural assets and resources, which may lead to physical displacement (relocation, loss of land or residence), and/or economic displacement (loss of land or assets, or restrictions on land use, assets and natural resources that lead to loss of sources of income or points other livelihoods).

The objectives of ESS 2 are to:

- Avoid involuntary resettlement if possible;
- Minimizing Involuntary Resettlement by exploring Project alternatives;
- If the avoidance of Involuntary Resettlements is not feasible, to enhance, or at least restore, the livelihoods of all affected people in real terms relative to pre-Project levels and to provide resettlement assistance;
- Understand and address the gender-related risks and differential impacts of Involuntary Resettlement.
- Improving the overall socioeconomic status of the displaced poor and other vulnerable groups; and
- Understand and implement resettlement activities as a sustainable development program, providing sufficient resources to enable people displaced by the Project to share the benefits of the Project.

Under AIIB-financed projects, ESS 2 applies if the Project will or may involve a resettlement (including past or future Involuntary Resettlement determined by the Bank directly related to the Project).

3.3 Comparative Analysis of Principles and Requirements of AIIB ESF, Relevant National Laws and Regulations and Project Practices

In this section, current and applicable national laws and requirements related to the Project's impact on informal vendors are reviewed in reference to the key policy requirements of the AIIB's ESS 2. If there are gaps in terms of policy requirements, mitigation measures are proposed to address the policy gaps. Comparative assessment is presented in the Table 2 below.

Table 1. Comparative Analysis Between AIB's ESF 2, National Regulations, and Project Practices

Key principles/ requirements	ESS 2 AIB	Presidential Decrees 62/2018 and 78/2023	Project Practice to date	Proposed Mitigation Measures
CONSULTATION	Conduct meaningful consultations with people who will be displaced by the Project, host communities and non-governmental organizations, and facilitate their participation in consultations	Consultation with affected stakeholders is required.	Meetings that have been held by RSJPD & RSKD contractors Meeting in Kota Bambu Selatan & Kota Bambu Utara Urban Village	This project will ensure that affected people will be meaningfully consulted.
	Consult with all persons to be relocated about their rights in the resettlement process, resettlement rights and options , and the further participation process.	Consultation is necessary to ensure affected people understand their rights, resettlement, and rights, as well as resettlement options.	Meeting in Kota Bambu Selatan Urban Village	Future consultations will be carried out after the moving out of the vendors from the KBS Street
	Hold women-only meetings if necessary.	Not specified in relevant laws and regulations but recommended as good practice	Meeting in Kota Bambu Selatan Urban Village	Future consultations will be carried out after the moving out of the vendors from the KBS Street
	Pay special attention to the needs of vulnerable groups, people with disabilities, especially those below the poverty line, homelessness, the elderly, women and children	Not specified in relevant laws and regulations	Meeting in Kota Bambu Selatan Urban Village	The project will ensure vulnerable vendors, if any, are consulted in the future consultations This will be done after the moving out of the vendors (refer to Consultation Plan)

Key principles/ requirements	ESS 2 AIIB	Presidential Decrees 62/2018 and 78/2023	Project Practice to date	Proposed Mitigation Measures
GRIEVANCE REDRESS MECHANISM AND DISCLOSURE	Establish appropriate Project-level grievance redress (GRM) mechanisms to receive and facilitate the resolution of the affected peoples' concerns by the Project and inform them of their availability	Project-level grievance redress mechanism is not specifically required	Has coordinated with the coordinators to convey information on the RSJPD & RSKD project to the vendors Number of contact for complaints is available but not yet widely disseminated to public	The Project has set up a Project-level grievance redress mechanism to address the risks identified in the ESIA/ESMP As part of the Disclosure Plan, venues for getting information and complaints will be announced to public particularly the vendors
	Design GRM that is gender-sensitive, culturally appropriate, and easily accessible to everyone affected	Gender-sensitive and culturally appropriate GRMs are not specifically mentioned	Not yet specified for vendors	The project has set up a Project-level grievance redress mechanism to address gender-related risks (Gender-Based Violence risks) among a) project workers (especially workers recruited by contractors), and b) community members (including hospital staff, patients, visitors) and community members living around the hospital
ELIGIBILITY & RIGHTS	<ul style="list-style-type: none"> Eligibility for compensation A clear cut-off date for eligibility needs to be set and to prevent encroachment. 	<ul style="list-style-type: none"> Those who occupy, utilize, or control government land, public land and state-owned companies' land are eligible for 	Communication has been carried out to determine grant support that will be managed collectively through the coordinators in the form of grant support.	The Project will facilitate the relocation of the vendors to the possible new places in the three hospitals' area; the Project will facilitate the vendors to get job opportunities in the

Key principles/ requirements	ESS 2 AIIB	Presidential Decrees 62/2018 and 78/2023	Project Practice to date	Proposed Mitigation Measures
		grant support and/or resettlement. <ul style="list-style-type: none"> ▪ Eligible persons are those who have occupies, utilized and/or controlled such land for 10 years or else decided by the governor. 	Deadline for no more street vendor activities in the Project area: May 15, 2025	construction activities, especially during the transition period
SOCIAL SUPPORT	Support the social and cultural institutions of people displaced by the Project and their host populations as part of the RAP	<ul style="list-style-type: none"> ▪ Not specified in the documents 	Blood donation activities and basic life support training, for the surrounding community including street vendors	The current regular social programs for public of the Three Diamond Hospitals will be continued and in the future will focus more on targeting the vendors. The project will carry out consultations with affected vendors on the training supports needed
ASSESSMENT OF COMPENSATION OR SUPPORT	Resettlement assistance, compensation for non-land assets at replacement costs, and consultations	<ul style="list-style-type: none"> ▪ Loss of assets, livelihood 	Grant support	After moving out from the KBS Street, the Project plans to facilitate the vendors finding new possible places to continue their businesses
LIVELIHOOD RECOVERY	Improving, or at least restore, the livelihoods of all affected persons by the project	<ul style="list-style-type: none"> ▪ In the guidelines of the Indonesian Appraisal Society, livelihood restoration is part of the valuation of assets and related income generating activities 	Affected street vendors are given grant support to be used as future business capital and provided opportunity to dismantle their own kiosks/stalls and take the usable materials.	The livelihood recovery in the new possible places will be monitored and supported, as needed, to ensure affected vendors recover their income to pre-projected levels, at least, or better.

Key principles/ requirements	ESS 2 AIIB	Presidential Decrees 62/2018 and 78/2023	Project Practice to date	Proposed Mitigation Measures
RESETTLEMENT ASSISTANCE	Provide the necessary assistance to the affected persons, including the following, as applicable: (a) in the case of relocation, security of ownership (with the refugee's ownership rights at least as strong as the refugee's rights to the land or other assets to which they are transferred) of the relocation land (and/or other assets, as applicable), adequate housing at the resettlement site with adequate access to the resettlement site. comparable to employment and production opportunities, economic and social integration of resettled people to their host communities and the extension of Project benefits to host communities to facilitate the resettlement process; (b) transition support and development assistance, such as land development, credit facilities, training or employment opportunities; (c) civil infrastructure and community services, as required; and (d) special assistance for women-headed households and vulnerable households	Presidential Regulation No. 78 Article 6 specify that affected communities that meet the criteria and requirements shall be given compensation in the form of money and/or resettlement.	There is no sufficient information on the affected vendors regarding their length of time they have been doing businesses in the site. Cash compensation was agreed by the affected vendors (represented by their coordinators) to cover loss of assets, and to start doing business in the new places obtained by the vendors themselves.	The Project will facilitate the vendors to facilitation to have new places
STANDARD OF LIVING	Improve the living standards of the poor and other vulnerable groups displaced by the Project , including women, children and persons with disabilities, at least by national minimum standards , including access to social protection systems.	Not specified in the regulation as mentioned under Section 5.1 Presidential Regulation No. 78/2023 but feasible as required	No efforts have been made yet	The project will monitor the revenue/income recovery process of affected vendors to ensure affected vendors recover their revenues to pre-Project levels (at least) within a reasonable period of time
THIRD PARTY LIABILITY	In Projects where the settlement of an involuntary involves the responsibility of the host government – as a third party, the Client: (a) engages the responsible government agency early in the Project preparation process to explore ways and means to achieve compliance with this ESS 2 ; and (b) collaborate with and support the responsible government agency , to the extent permitted by the institutions, to achieve outcomes consistent with the objectives of ESS 2	Not specified in the regulation as mentioned under Section 5.1 Presidential Regulation No. 78/2023 but feasible as required	Relocation processes to date has been carried out by the RSJPD and RSKD Hospitals in coordination with the West DKI Jakarta City Government/local authorities	Future process of relocation through facilitation of the vendors to find new places will involve the Management of the Three Diamond Hospitals and the contractors

4. Strategy and Action Plan

4.1 Entitlement Matrix

Table 2. Entitlement Matrix

Yes	Category	Number of Vendors	Type of Loss	Entitlements	Responsible Parties
1	Street vendors with kiosks/stalls	41 vendors or 62 kiosks/stalls	Building, location and income	Replacement cost for loss assets	Provided by the contractor of the RSJPD & RSKD with grant support.
				Self-demolition and take usable or valuable materials	Contractors of RSJPD & contractor of RSKD

				Facilitation to trade in possible new places	<p>Short term: New places within the Three Diamond Hospitals' area for the 41 vendors and prepare the site plans and designs of the places and kiosks/stalls and facilities</p> <p>Medium/long terms: Eligible vendors who meet the requirements (type of business, hygiene, management scheme and willingness to pay retribution fees according to the provisions) have the priority to move to the skybridge location Three Diamond Hospitals facilitate access if it meets the requirements after approval of AIIB Project.</p>
				Receive capacity strengthening to do business	Three Diamond Hospitals
2	Coordinators	2	Income	Right of access to income-generating work	Facilitation of access to work by contractors

4.2 Strategy

Promote sustainability by maintaining the continuity of street vendors' businesses:

A. Short-term Strategy (0-6 Months After Loan Signing)

- Invite eligible vendors to possible new places in the Three Diamond Hospitals' complex to carry out small businesses. Potential places would be in the premise of RSAB Harapan Kita and in the Canteen of RSKD
- Assist the affected street vendors with capacity strengthening to be eligible for doing business in the hospitals' complex

B. Medium-term Strategy (7-24 Months After Loan Signing)

- Provide hygiene and service excellence training to vendors
- Prioritize 3-Diamond Hospitals' social programs such as free mass circumcision, blood donation, etc., for the vendors
- Open opportunities for vendors to work during construction according to the contractors' job opportunity available and skills.

C. Long-term Strategy (25-60 Months After Loan Signing)

- Eligible vendors who meet the requirements of type of business, hygiene, willingness to pay of the venue, and places management, priority will be given to them to carry out businesses at the Skybridges
- Provide hygiene and excellent service training to vendors (among other for them to meet the requirements)
- Priority for the vendors to be included in the Three Diamond Hospitals' social programs such as free mass circumcision, blood donation, etc.

6. Implementation of Action Plan (June-October 2025)

This section outlines the progress and milestones achieved in the execution of the Resettlement Action Plan (RAP) within the reporting period of June to October 2025. All activities described herein are directly linked to the implementation framework established in Chapter 4 of the approved RAP, which served as the operational guide for this phase. The report not only provides a chronological and thematic update on each planned activity but also highlights tangible achievements, identifies variances from the original plan whether in scope, schedule, or resource allocation, and details the corrective and mitigating actions taken to address these deviations. This structured approach ensures transparency, accountability, and alignment with both the project's objectives and the commitments made to stakeholders, particularly the affected vendors and relevant government authorities. The implementation of the Action Plan and Monitoring Plan was supported by the PMU and PIUs.

6.1. Collect Additional Information

During this reporting period, additional socio-economic information was collected from the affected vendors to refine the livelihood recovery strategy. The data collection covered income levels, skill profiles, preferred work opportunities, and their plan or expectation regarding relocation facilities. This updated information enabled the PMU and PIU to validate the eligibility list and better tailor the livelihood support programs. Minor delays occurred due to the unavailability of some vendors during scheduled interviews; however, these were mitigated through follow-up visits and phone surveys.

Additional data on 41 vendors had been successfully collected, including their names, business types, ages, and addresses, thus providing a verified list of affected vendors. Subsequently, further data were obtained as well as other qualitative insights gathered during focus group discussions (FGDs) and consultation sessions with the vendors. These discussions provided a deeper understanding of the vendors' livelihood challenges, adaptation strategies, and expectations regarding post-relocation support.

One of the primary challenges during the implementation of the Action Plan was the difficulty in obtaining complete personal data from all 41 vendors, particularly sensitive information such as contact numbers and income details. This limitation initially hindered the ability to conduct a comprehensive socio-economic profiling, which is essential for designing tailored livelihood recovery interventions. To address this issue, the project team adopted a multi-pronged strategy: engaging community coordinators as intermediaries to collect missing data, conducting multiple follow-up visits and informal meetings to build trust and ensure confidentiality, and introducing simplified data collection tools to minimize respondent burden. These combined efforts gradually

improved the completeness and reliability of the database, allowing for more targeted and evidence-based interventions.

In addition, information was obtained from the second consultation survey. The consultation process gathered detailed vendor information including plans to sell in the new canteen area, current activities, type of business currently operated, current selling location, previous selling locations (if any), rental cost arrangements, number of workers, and activities undertaken since the displacement from the KBS area. The results of this second consultation provided a more comprehensive and up-to-date socio-economic profile of the affected vendors. These data, combined with qualitative insights from discussions and field observations, strengthened the evidence base for designing targeted livelihood recovery and support programs that align with vendors' actual conditions, preferences, and future livelihood plans (refer to Appendix 10).

6.2. Livelihood Recovery

a. Grant support payment

The disbursement of the agreed grant support to the affected vendors was conducted in three phases through their designated coordinators to ensure orderly distribution and proper documentation. The first phase, covering 15 vendors, was successfully completed by 26 April 2025. The second phase, targeting 13 vendors, followed shortly after and was finalized by 28 April 2025. The final phase, also covering 13 vendors, was completed by 2 May 2025. This phased approach facilitated efficient verification, minimized the risk of administrative errors, and allowed timely resolution of any payment-related issues before proceeding to subsequent batches.

b. Inform the requirements and provide opportunity to eligible vendors to work in the construction activities

To promote livelihood restoration and ensure equitable access to temporary employment opportunities, the PIUs informed all eligible affected vendors, along with their designated community coordinators, regarding the requirements and available opportunities to participate in construction-related activities within the project area. The information was disseminated through formal invitations and consultation meetings, during which the PIUs outlined the eligibility criteria, scope of work, safety requirements, and administrative procedures necessary for engagement in construction activities.

In addition to construction-related opportunities, the PIUs also offered the affected vendors the possibility to continue their previous livelihood activities as traders by operating within the canteen facilities provided by the hospital. This initiative aimed to help vendors sustain their income sources and maintain security and continuity of their small-scale businesses in a more organized and hygienic environment.

This combined approach—offering both employment and entrepreneurial opportunities—was designed to ensure transparency, inclusivity, and fair access to income-generating activities during the project implementation phase. By proactively engaging the affected vendors, the PIUs sought to mitigate livelihood disruptions, strengthen local participation in project-related initiatives, and foster a sense of ownership and collaboration among the affected communities.

c. Provide job opportunities for vendors’ coordinators

Two vendors’ coordinators were engaged to facilitate the implementation of the Resettlement Action Plan (RAP) and to strengthen communication between the affected vendors, the Project, and relevant stakeholders. Their role includes coordinating the dissemination of information, assisting in resolving operational issues, and ensuring that vendors’ concerns are promptly communicated to the Project Management Unit (PMU) for appropriate follow-up. Both coordinators have been empowered and formally assigned to work under the construction team of RSJPD Harapan Kita (they are not vendors and do not operate any business at KBS), thereby integrating their functions directly within the project’s operational framework. This arrangement enables them to effectively bridge communication between the construction management team and the affected vendors on-site, ensuring timely coordination and issue resolution during the RAP implementation process. In addition to strengthening communication and operational linkages, this engagement also provides sustainable livelihood opportunities for the coordinators themselves, while simultaneously enhancing the efficiency, accountability, and responsiveness of the RAP implementation at the project level.

d. Identify possible new places within the 3-D area for the 41 vendors & prepare the site plans and designs of the places and kiosks/stalls/facilities

The identification of potential new locations to accommodate the 41 affected street vendors (PKL) within the **Three Diamond (3-D)** hospital area has been **completed**. The planning process was undertaken collaboratively by the Project Implementation Units (PIUs) of RSAB Harapan Kita and RSK Dharmais to ensure that the proposed facilities meet operational, safety, and hygiene standards while supporting vendors’ livelihood continuity.

1). RSK Dharmais

At RS Kanker Dharmais (RSKD), the parking building area has been designated to accommodate 10 of the 41 vendors. This facility is designed as a structured and hygienic canteen space, aimed at improving food service quality for hospital staff, patients, and visitors. The canteen is expected to commence operations in December 2025, in line with the completion and official opening of the parking building. As of the current reporting period, the construction of the parking facility remains in progress, with final layout and stall allocations already identified and informed to the affected vendors.

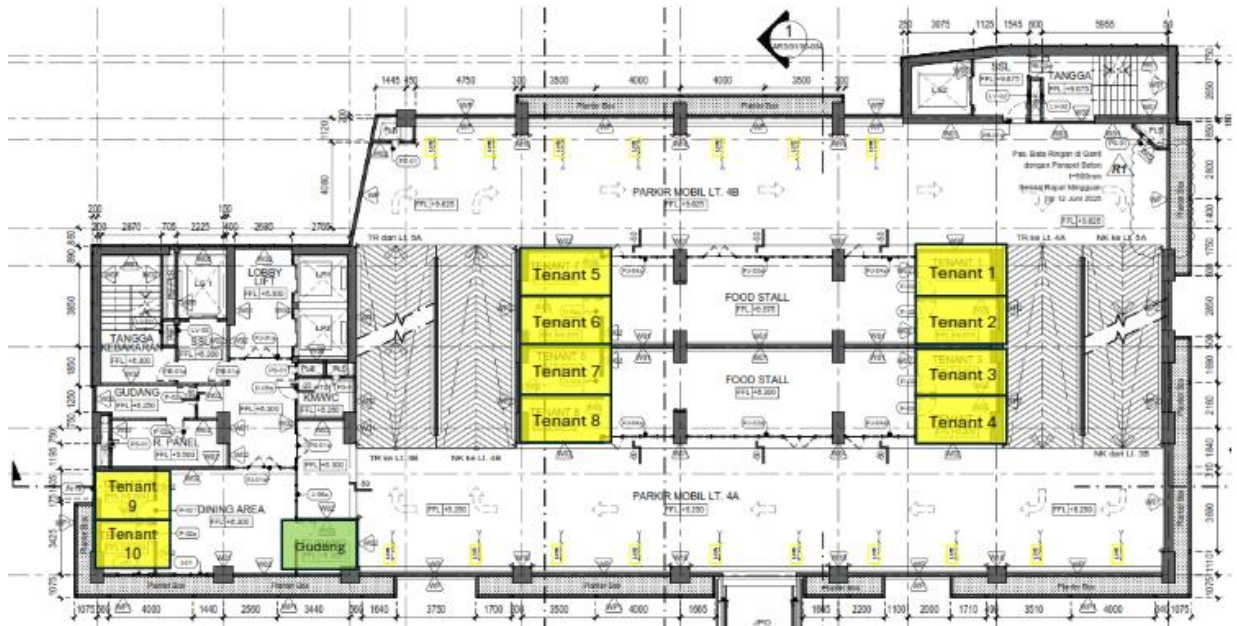

Figure 7. Identified Layout for Possible New Vendor Locations in the RSK Dharmais Canteen Building

2). RSAB Harapan Kita

Within RSAB Harapan Kita, a specific area has been identified for the development of a new canteen facility that will accommodate all 41 vendors, ensuring inclusivity and livelihood restoration within the main hospital complex. Preparatory activities—including the Terms of Reference (ToR), Budget Plan (RAB), Bill of Quantities (BoQ), and architectural layout design—were underway as of June 2025. Construction of the canteen began in early August 2025 and to be completed by the end of October 2025, with full operationalization targeted for early November 2025.

The latest layout plan features a well-organized food court concept, designed to be hygienic, accessible, and environmentally friendly, in line with hospital standards on health and safety. The canteen area will provide proper stalls, utilities, and sanitation facilities to support sustainable micro-enterprise operations.

Figure 9. 3-D Visualization of Identified Possible New Vendor Locations in RSAB Harapan Kita Parking Building

Overall, the identification and planning process were guided by the objectives of enhancing vendor livelihoods, improving hospital service environments, and supporting MSME (UMKM) development through, health-compliant small business facilities.

e. Socialize and consult the 41 vendors on the requirements, obligations and rights as well as management scheme to occupy in the possible new places

To ensure that the relocation process meets the requirements and objectives of AIIB’s Environmental and Social Standard 2 (ESS2)—particularly the principle of restoring or improving the livelihoods of affected persons—the PIUs conducted a structured series of socialization, consultation, and training activities with the 41 affected street vendors (PKL). These activities aimed to communicate clearly the requirements, obligations, and rights of the vendors as prospective occupants of the newly designated business areas within the Three Diamond (3-D) hospital complex, as well as to prepare them for sustainable operations in the hospital environment.

The socialization and consultation activities were carried out in two stages, in close coordination with the PMU, AIIB’s social consultant, and representatives from RSAB Harapan Kita, RSJPD Harapan Kita, and RS Kanker Dharmais (RSKD). The first session, held on 3 September 2025, invited all 41 affected vendors, of which 33 attended (refer to Appendix 8). The session provided detailed information on the eligibility requirements, allocation procedures, management schemes, and operational rules governing the new canteen facilities. The PIU also facilitated training on service excellence and hygiene standards to

ensure vendors' readiness to operate in a health-compliant and customer-oriented manner. Following the session, 30 vendors expressed their willingness to occupy the stalls provided at RSAB Harapan Kita and RSK Dharmais, 2 vendors declined due to personal reasons, 1 vendor had not yet provided confirmation, and 8 vendors were absent from the session.

Figure 10. Socialization, Consultation, and Training Batch I

A second round of socialization and consultation was subsequently held on 29 September 2025 (refer to Appendix 9), with the participation of 28 vendors alongside the PIUs, PMU, and AIIB social consultant. This session focused on finalizing operational arrangements, including the types of goods and food items to be sold, compliance with hygiene standards, and the allocation of stall locations. Through a transparent draw mechanism, all participating vendors agreed upon and signed the final layout and stall assignment. From the consultation outcomes, 26 vendors confirmed their decision to occupy stalls at RSAB Harapan Kita, 4 vendors opted for stalls at RSK Dharmais, 4 vendors were undecided, and 7 vendors declined relocation as they had already re-established their businesses elsewhere.

Figure 11. Socialization, Consultation, and Training Batch II

During both sessions, vendors expressed appreciation for the hospitals' proactive facilitation, acknowledging that the socialization and training reflected the institutions' commitment to social responsibility and livelihood restoration. They also confirmed having received grant support through their coordinators, which had been utilized to sustain their daily income and business activities during the transitional period prior to the completion of the new canteen facilities scheduled for October 2025 at RSAB Harapan Kita and November 2025 at RSK Dharmais. These sequential consultation and capacity-building processes not only ensured that affected vendors were well-informed and voluntarily participated in the relocation, but also strengthened mutual trust and accountability between the vendors, project implementers, and the hospital management.

Following the second consultation session, the PIU conducted follow-up outreach to vendors who had not attended or had not yet provided confirmation of their participation. This process involved actively contacting the remaining vendors through phone calls, asking information through vendors' colleagues, and coordination with other affected vendors, as well as inviting them to join a dedicated WhatsApp communication group created to facilitate ongoing updates and engagement to all affected vendors.

Through these follow-up efforts, the PIU successfully obtained updated information regarding the vendors' final decisions. As of October 2025, a total of 30 vendors confirmed their willingness to occupy stalls at RSAB Harapan Kita, while four vendors agreed to occupy stalls at RSK Dharmais, and 7 vendors declined the relocation offer, citing reasons such as having

established new businesses at alternative locations or having returned to their hometowns. This comprehensive follow-up process ensured that all affected vendors were adequately informed and given equal opportunity to participate, and that the final roster of canteen occupants reflects voluntary, well-documented decisions in line with the principles of Asian Infrastructure Investment Bank's Environmental and Social Standard 2 (ESS2) on stakeholder engagement and livelihood restoration.

f. Build the kiosks/stalls in the RSAB and RSKD area

The construction of kiosks and stalls to accommodate the affected street vendors is currently being implemented by the Project Implementation Units (PIUs) at RSAB Harapan Kita and RS Kanker Dharmais (RSKD). The works are carried out in accordance with the approved site plans and technical specifications to ensure compliance with hospital infrastructure, safety, and hygiene standards. At RS Kanker Dharmais, construction activities are focused on the canteen area within the new parking building, which has been allocated for ten vendors. The civil works have progressed in line with the overall parking facility schedule, with completion and operational readiness expected by December 2025.

At RSAB Harapan Kita, construction of the new canteen facility began in early August 2025. The works include the development of food stalls, utility connections, sanitation systems, and internal fit-outs to support operational functionality. As of October 2025, the physical construction was nearing completion, and the site is expected to become fully operational by early November 2025. Both construction activities are closely monitored by the respective PIUs and coordinated with the hospital management teams to ensure timely completion, adherence to technical standards, and readiness for vendor occupancy in alignment with the Resettlement Action Plan (RAP) schedule.

Figure 12. Canteen Construction Process

g. Invite the 41 vendors to the new places in the 3-D area

As part of the continued implementation of the Resettlement Action Plan (RAP), the Project Implementation Units (PIUs) facilitated the invitation and orientation of the 41 affected street vendors (PKL) to the newly designated business areas within the Three Diamond (3-D) hospital complex. This activity was conducted in conjunction with the second series of socialization, consultation, and training sessions held on 29 September 2025, attended by representatives from the PMU, both PIUs, and the AIIB social consultant.

During this session, vendors were invited to participate in a guided site visit, particularly to the new canteen facility under construction at RSAB Harapan Kita. The visit aimed to provide vendors with a clear understanding of the physical layout, stall arrangements, and operational settings of the new canteen area, allowing them to visualize their future business spaces. The PIU teams and hospital management representatives explained the allocation mechanism, utilities setup, sanitation system, compliance requirements, and access to the canteen site ensuring that vendors were well-informed and prepared for eventual relocation. Through direct observation, the vendors were able to provide feedback regarding stall placement, accessibility, and layout preferences, which were taken into consideration for final on-site

adjustments. This participatory approach fostered a sense of ownership and strengthened the vendors' readiness to transition smoothly into the new facilities.

Looking ahead, the PIUs have planned a phased relocation schedule, under which vendors will begin transferring their equipment and setting up their stalls by the end of October to early November 2025, in preparation for the commencement of operations at the RSAB Harapan Kita canteen. The relocation timeline has been designed to align with the completion of construction works and final safety inspections, ensuring that all facilities are ready for occupation and business activities to resume without disruption. This invitation and familiarization process serve as an important milestone in the RAP implementation, bridging the gap between construction completion and operational readiness, and reaffirming the project's commitment to a transparent, participatory, and livelihood-restorative relocation process.

h. Include the 41 vendors in the social programs and provide hygiene training and excellent services to customers

In line with the Resettlement Action Plan (RAP) and the objectives of AIIB's Environmental and Social Standard 2 (ESS2), the Project Implementation Units (PIUs) ensured the inclusion of all 41 affected street vendors (PKL) in the hospital-supported social programs and capacity-building activities. These initiatives were designed to enhance vendors' preparedness for operating in the hospital environment and to ensure compliance with hygiene, sanitation, and customer service standards. As part of these initiatives, the PIU at RSAB Harapan Kita, in collaboration with RS Kanker Dharmais (RSKD) and the Project Management Unit (PMU), organized a series of training and awareness sessions focusing on basic hygiene practices, food safety, and service excellence. The sessions were conducted in conjunction with the second socialization and consultation meeting on 29 September 2025, attended by vendors, hospital representatives, and the AIIB social consultant.

The training covered essential topics such as personal hygiene, food handling, waste management, and customer interaction protocols, emphasizing the importance of maintaining a safe and pleasant environment for hospital staff, patients, and visitors. Vendors were also introduced to service excellence principles, including courtesy, professionalism, and responsiveness, as part of efforts to enhance customer satisfaction and the overall image of the hospital canteens. All vendors participating in the training were provided certificates and were encouraged to apply these practices in their future business operations within the newly developed canteen facilities. The hospitals also committed to integrating the vendors into ongoing social and educational programs, such as periodic health checks, food safety monitoring, and refresher courses on hygiene and service quality. Through these social and capacity-building programs, the project not only supports the livelihood recovery of the affected vendors but also contributes to improving public health standards, fostering

responsible entrepreneurship, and promoting inclusive community engagement within the hospital ecosystem.

6.3. Consultation Plan and Implementation

- a. Inform and consult vendors on the plan of possible new places; site plans and designs of the places and kiosks/stalls and facilities; management scheme; training needs and the requirements for eligibility. Inform and consult on the plan of possible new places and designs of the places and kiosks/stalls and facilities; management scheme; training needs and the requirements**

A series of consultation and socialization sessions were conducted to inform and engage vendors regarding the proposed relocation sites, site plans, stall layouts, and operational facilities within the Three Diamond (3-D) area. These sessions also covered the management scheme, training requirements, and eligibility criteria for participation in the new canteen operations. Vendors were given opportunities to review design concepts, provide feedback on layout preferences, and discuss operational arrangements. Their inputs were incorporated into the final site planning and management framework to ensure the facilities meet both functional and social needs.

- b. Inform and consult vendors on the requirements and competencies to work in the construction activities**

The PIUs also conducted targeted consultations to inform vendors about potential employment opportunities during the construction phase, including eligibility requirements, skill needs, and safety procedures for participation in project-related activities. In collaboration with the construction management team, the PIUs outlined the technical and administrative procedures required for engagement. Some vendors were subsequently offered temporary employment or vendor coordination roles under the construction team at RSAB Harapan Kita, aligning livelihood support with project implementation needs. Through these consultations, the project ensured that all affected vendors were fully informed, voluntarily involved, and equipped to participate in both the relocation and livelihood restoration processes, consistent with the principles of AIIB's ESS2 on stakeholder engagement and livelihood improvement.

6.4. Complaint Handling and Information Disclosure

To ensure transparency, accountability, and responsiveness in addressing stakeholders' concerns, the Project Management Unit (PMU) and Project Implementation Units (PIUs) have established and operationalized a comprehensive Complaint Handling and Information Disclosure Mechanism as part of the Resettlement Action Plan (RAP) implementation framework. This mechanism enables affected vendors and other stakeholders to voice their feedback, concerns, or grievances in a structured, transparent, and timely manner. The complaint handling

channel has been made accessible at both RSAB Harapan Kita and RS Kanker Dharmais (RSKD), serving as designated contact points where stakeholders can submit their concerns related to the RAP implementation.

The complaint handling operates under Standard Operating Procedures (SOPs) that define clear steps for receiving, recording, verifying, and resolving complaints. The process is managed by the Social Focal Points assigned within each PIU, who coordinate with vendor coordinators and relevant hospital departments to ensure timely follow-up and resolution. Oversight and reporting are conducted in coordination with the PMU, which compiles all records into quarterly and semi-annual safeguard progress reports submitted to AIIB in accordance with project disclosure standards. To enhance accessibility and expedite stakeholder communication, a dedicated WhatsApp service, available at **0813-2007-001** has been established alongside a closed WhatsApp group specifically created to facilitate information exchange with prospective canteen partners. As of the current reporting period, no major complaints have been recorded; the WhatsApp channel has primarily been used for consultations, sharing information and operational enquiries. To maintain the effectiveness of this mechanism, the PMU and PIUs conduct regular monitoring and periodic evaluations to assess the efficiency, accessibility, and stakeholder satisfaction of the complaint system. Through this integrated approach, the project ensures that the complaint-handling and information-disclosure mechanism functions not only as a procedural safeguard but also as a platform for continuous dialogue, adaptive management, and community accountability, fully aligned with the principles of AIIB's Environmental and Social Framework (ESF).

7. Information Disclosure Plan

To ensure transparency and compliance with AIIB's Environmental and Social Policy requirements, the Project Management Unit (PMU) will undertake a structured information disclosure process to make all relevant project documents accessible to stakeholders and the public. The disclosure aims to provide clear and timely information regarding the project's environmental and social safeguards, resettlement activities, and livelihood restoration measures.

The draft of the Updated Resettlement Action Plan (RAP) will be re-disclosed by November 2025, through the official website of the Ministry of Health <https://kemkes.go.id/id>. The same version of the Draft of the Updated RAP will also be made available on the AIIB's external website for public access and review.

In addition to the public disclosure of the Draft ESIA and RAP, the Project Management Unit (PMU) and Project Implementation Units (PIUs) will ensure that updates on the RAP implementation progress and monitoring results are continuously reported and disclosed through quarterly progress reports. These reports will summarize key developments, achievements, and challenges encountered during implementation, including updates on vendor relocation, construction progress, livelihood restoration activities, and grievance resolution. The reports will be shared with AIIB and relevant stakeholders, and summary information will be made publicly available through the Ministry of Health's official website and at PIU offices to maintain transparency and accountability throughout the project cycle. This ongoing disclosure mechanism ensures that all parties remain informed about the project's performance and the extent to which the RAP objectives—particularly the restoration and improvement of affected vendors' livelihoods—are being achieved.

8. Budget

The implementation of the Action Plan and Monitoring Plan will be supported by the Three Diamond Hospitals, the Project and the PMU. The budget is a living document, which will be updated later.

Activity	Estimated Amount (IDR)	Financial Sources / Remarks
Include the 41 vendors in the social program and provide hygiene training and excellent service to sellers	11 Million / event	Three Diamond Hospitals
Provide job opportunities for the vendors' coordinators	None	Coordination between the contractor and hospitals
Provide training to the 41 affected vendors to strengthen their capacity and meeting the requirements	11 Million / event	Three Diamond Hospitals
Inform the requirements and provide opportunity to eligible vendors to work in the construction activities	None	Three Diamond Hospitals
Identify possible new places within the Three Diamond Hospitals' area for the 41 vendors and prepare the site plans and designs of the places and kiosks/stalls and facilities	200 Million	Three Diamond Hospitals
Socialize and consult the 41 vendors on the requirements, obligations and rights as well as management scheme to occupy in the possible new places	None	Three Diamond Hospitals
Build the kiosks/stalls in hospital area	10-15 Million / Stall/Kiosk	AIIB Project, Three Diamond Hospitals & third party
Invite the 41 vendors to the new places in hospital area	None	Three Diamond Hospitals

9. Follow-Up Plan

To ensure the full completion of the Resettlement Action Plan (RAP) and the sustainability of livelihood restoration measures, the Project Management Unit (PMU) and Project Implementation Units (PIUs) will continue implementing follow-up actions in coordination with relevant stakeholders, including affected vendors, coordinators, and hospital management. These actions are aimed at maintaining effective communication, supporting vendors' transition into their new business locations, and ensuring continuous monitoring and improvement of social safeguard. The follow-up plan consists of the following key activities:

1. Continuation of Action Plan Implementation

The PIUs will continue to implement pending activities listed in Table 3 of the RAP, particularly those related to livelihood recovery and vendor engagement. This includes:

- a. Maintaining regular communication with vendors through the established WhatsApp group to disseminate information, collect feedback, and document any inquiries or complaints;
- b. Facilitating the relocation and installation process for vendors moving into the newly built kiosks and stalls at RSAB and RSKD; and
- c. Coordinating with hospital management teams to ensure that the operational arrangements, stall allocations, and administrative requirements are completed prior to canteen inauguration.

2. Capacity Building and Vendor Empowerment

The PIUs will continue providing training and mentoring programs for vendors. These include refresher courses on hygiene practices, food safety, and service excellence, as well as business management skills to strengthen the vendors' operational capacity and sustainability. The trainings will be held periodically to ensure compliance with hospital standards and enhance the vendors' competitiveness within the new business environment.

3. Monitoring and Evaluation of Vendor Operations

After the relocation process is completed, the PMU and PIUs will monitor vendors' activities in their new business locations. The monitoring will focus on business continuity, customer satisfaction, and hygiene compliance. Regular monitoring reports will be compiled quarterly, with findings incorporated into ongoing adjustments to ensure that livelihood restoration objectives are met.

4. Grievance Handling and Continuous Communication

The dedicated complaint handling channel—including the WhatsApp number **(+62 813-2007-001)** and the vendors' WhatsApp group will remain active to facilitate two-way communication, consultation, and issue resolution. Minor operational or administrative

concerns will be addressed promptly by the Social Focal Points at each PIU, with oversight and documentation managed by the PMU.

5. Integration into Hospital Programs

Vendors will continue to be included in the hospitals' broader social programs and community engagement activities, such as health promotion events, hygiene audits, and small business empowerment initiatives. This ongoing inclusion aims to foster long-term collaboration, social cohesion, and shared accountability between vendors and hospital management.

Through this follow-up plan, the project ensures that all resettlement and livelihood restoration commitments remain effectively implemented, monitored, and continuously improved in alignment with the principles of AIIB's Environmental and Social Standard 2 (ESS2) on stakeholder engagement and livelihood recovery.

APPENDIXES

Appendix 1 – Survey Results on Affected Assets

Sample based on 19 vendors (out of a total of 41 vendors)- **Street vendors on the side of RSJPD Harapan Kita**

Appendix 3 – Consultation Summary

The results of all consultation activities carried out by RSJPD Harapan Kita, RSKD and RSAB Harapan Kita with street vendors and local government authorities

- RSKD has been conducting consultation and communication activities with related parties since 2022 and has paid grant support to 9 street vendors in 2023.
- RSKD will again make grant support payments for 7 street vendors in 2024.
- A total of 16 street vendors have received grant support until 2024
- RSJPD Harapan Kita Carries out consultation and communication activities with Regional Government Authorities to control street vendors on Jl. Kota Bambu Selatan related to the safety of the 2024 Tokhusukai RSJPD Building Construction Project
- RSAB Harapan Kita conducts consultation and communication activities with street vendors and villages related to the plan to build 3 hospitals. (Three Diamond Hospitals) in February 2025

Appendix 4 – Feedback from Individual Vendors attending the meeting on March 21, 2025

No	Vendors Name	Business Type	Expectations and Feedback
1	Mr. Simin	Fried Vendor	- Suggest that safety during construction is a top priority
			- Street vendors are not considered to be neglected, not because the quality of their government is harmed
			- Expect to be respected and pay attention to their rights and obligations, as they have paid all their contributions
2	Mrs. Yuyun	Fried banana vendor	- Complaining about the fate if the place of business is evicted, because they still need income for daily needs
			- If you're looking for new land for your business, it can be difficult to find customers because you're starting from scratch
3	M Rido	Cake shop	- Questioning the redirect
			- Whether the road closure is correct or just a plan. Therefore, road access for local residents
			- Street vendors are asking for the relocation of their businesses.
			- It's up to the government to build anything, but we just need a place to do business again, not money or grant support
4	Head of SATPOL PP	SATPOL PP	-Relocation of sterilization places from street vendor business buildings to accelerate development.
5	Mrs. Linda	SATPOL PP	- Most important relocation
			- With the reason that not all hospital visitors do not only eat in the canteen provided. Most of them eat at street vendors outside the hospital.

No	Vendors Name	Business Type	Expectations and Feedback
-			<ul style="list-style-type: none"> - From the government, even though it is not their place, we as the government still demand the construction of hospitals to be relocated and should not be left alone, and it is recommended to provide a place for street vendors
			<ul style="list-style-type: none"> - Hospitals must also set aside land for street vendors
			<ul style="list-style-type: none"> - It is also advisable to think that zoning is not permanently closed to local residents
			<ul style="list-style-type: none"> - The construction, why not from the beginning, if it is possible to get to the back, do not type again and please pay attention to developments that are not sudden like this and are delivered early, not half-heartedly.
6	Head of Sub-district		<ul style="list-style-type: none"> - The area of the hospital point for the road was widened so that shophouses could be made, but fences were made so that access could not pass
			<ul style="list-style-type: none"> - The connecting line can be used as a stall or shophouse business place
			<ul style="list-style-type: none"> - Or want to take advantage of the back path that leads to the doctor's house. To be safe from parking, cars are used and widened to create stalls

MINUTES OF MEETING

Ref. No.: KN.01.03/D.XXII/4987/2025

On this day, Wednesday, the third of September, two thousand and twenty-five, at RSAB Harapan Kita, a Socialization and Discussion Meeting was held with the Street Vendors (PKL) affected by the RSAB Harapan Kita Building Construction Project, and Area Arrangement of 3 Berlian Hospitals. This event was organized by the Project Implementation Unit (PIU) and was attended by 33 (thirty-three) participants out of the 41 (forty-one) invited.

The Socialization and Discussion proceeded smoothly and orderly, and during the discussion, the following was discussed:

- 1). The street vendors expressed their appreciation for the socialization, training activities conducted by the hospital, and for the provision of kiosks in the permanent sites as a form of the hospital's concern and responsibility for the continuation of the livelihood of the affected vendors.
- 2). The vendors also stated that the relocation sites under the hospital's management provides a greater sense of secure compared to their previous selling locations.
- 3). During the consultation sessions, the vendors confirmed that they had received grant support (a monetary compensation) through the coordinators, which has been used to their livelihood and support their business activities during the transitional period, prior to the completion of the new sites in the RSABHK and RSKD areas.
- 4). The PIU explained to the affected street vendors in detail the entitlement matrix the draft Resettlement Action Plan, including detailed lay out and facilities of the kiosks, terms and conditions for the use of the kiosks, and information about the grievance redress mechanism (GRM).
- 5). 30 (thirty) street vendors agreed to occupy and run a kiosk in the RSAB Harapan Kita canteen or in the RSKD canteen; 2 (two) street vendors did not agree to occupy a kiosk in the RSAB Harapan Kita canteen because one had already moved to and has conducted business outside Jakarta, while the other had chosen to continue running a business from home; 1 (one) street vendor did not return the statement letter to accept or refuse the kiosk offered as she was still in discussions with her family before making a decision; while 8 (eight) street vendors did not attend the meeting (Attachment 1) because their addresses have changed from those written in their ID cards.
- 6). In addition, terms and conditions of the utilization of the kiosks located in the RSAB Harapan Kita (RSABHK) and RSK Dharmais (RSKD) canteens were explained to

affected street vendors in detail and they agreed with these terms and conditions (Attachment 2).

a. Follow-up plan:

- 1) Follow-up consultation will invite the 41 traders. Discussion will involve the eight vendors who were not present in the previous consultation meeting, the 30 vendors who are willing to occupy one of the kiosks in the hospital canteens, the hospital's legal team, and hospital management to gain a comprehensive perspective. The goal is to formulate a payment scheme that is fair, proportional, in accordance with applicable regulations, and supports the continued operation of the canteens and the principles of good governance. To follow up on the absent street vendors, the PIU will contact them through phone calls and WhatsApp messages, and, if necessary, seek information from their neighbours or close vendors' colleagues to determine their current whereabouts, particularly if they have moved from the addresses stated on their ID card.
- 2) Reaffirm the commitment of affected vendors who are willing to occupy the hospital canteens.
- 3) The kiosk rental payment mechanism, specifically the proposed instalment option, will be discussed further at the next meeting, either in an open consultation session or in private consultations between prospective partners and management.
- 4) The hospital will establish a zoning system for distributing canteen slots according to the type of merchandise sold.
- 5) Establish a communication forum (WhatsApp group) with affected street vendors/potential canteen partners.

Accordingly, these Minutes of Meeting are hereby prepared to serve as an official record and for such purposes as may be appropriate.

Attachment 2

a. Kiosk placement priority

- 1) Prospective canteen partners are listed on a priority list of 41 vendors affected by the RSAB Harapan Kita Building Construction Project, and Area Arrangement of 3 Berlian Hospitals;
- 2) Existing vendors from the area affected by the RSAB Harapan Kita Building Construction Project, and Area Arrangement of 3 Berlian Hospitals will receive priority for available canteen kiosk slots;
- 3) A total of 42 canteen kiosk slots at RSABHK, with each canteen zone having an area of 8 units (8 units for existing vendors at the RSABHK canteen, and 34 units for affected vendors);
- 4) An additional 10 canteen kiosk slots for other affected vendors will be allocated at RSKD;
- 5) Prospective canteen partners can only choose one location at RSABHK or RSKD

b. Prospective Partner Registration Procedure

- 1) Must submit an ID card and Taxpayer Identification Number (NPWP);
- 2) Complete a statement of commitment to comply with RSABHK and RSKD regulations;
- 3) Sign a statement not to transfer the canteen kiosk to another party.

c. Operational Rules

- 1) Canteen kiosk operating hours: 6:00 AM to 6:00 PM WIB;
- 2) Partners must provide a clear menu and price list;
- 3) Provide a cashless payment system;
- 4) Full cooking is not permitted on-site (except with management permission), only food heating is permitted;
- 5) No changes or additions to facilities are permitted without written permission from hospital management;
- 6) The existing eight vendors currently operate in the canteen area of RSABHK will be prioritized to be located in the front area in the new canteen.

d. Kiosk Rental Payment Obligations

- 1) **RSABHK:** Rental price is **IDR 137,000/m²/month** or **IDR 8,220,000 per year** (5m² x IDR 137,000), paid in advance for a period of one year or as agreed upon. The rental price does not include electricity and water;

- 2) **RSKD:** Rental price is **IDR 500,000/m²/month**, paid in advance based on the area of land used. The rental price does not include electricity and water;
- 3) Payment for electricity and water usage is based on electricity meter readings, converted into a calculation of costs incurred by the hospital each month;
- 4) Late payment fine: **1‰ (one per thousand) per calendar** day of the amount due;
- 5) Tiered administrative sanctions apply: Warning I, Warning II, and Warning III. If the canteen partner remains negligent, the hospital has the right to suspend operations and terminate the contract;
- 6) The cost of any damage to facilities due to negligence by the canteen partner is borne by the partner;
- 7) Canteen partners cannot sublet or transfer their kiosks to other parties.

e. Compliance with hygiene, health, and environmental standards

- 1) Maintain the cleanliness of the canteen area daily and dispose of waste at the waste disposal site (TPS) within the hospital area;
- 2) Must turn off electricity, gas, and water after operating hours;
- 3) Electrical/gas equipment may only be used with the approval of the hospital;
- 4) Food handlers are required to undergo a health check before work and once every year (the hospital will facilitate to include them in the routine free health check program);
- 5) Periodically, every six months, food safety inspections will be conducted at a third-party laboratory;
- 6) Food/drinks must be stored in a clean, closed, hygienic place, and must not contain expired/hazardous materials.

f. Human Resources & Work Behavior Requirements

- 1) Each kiosk must have at least one person in charge;
- 2) Food handlers must wash their hands before working, wear uniforms, aprons, head coverings, and gloves;
- 3) Be free from infectious diseases;
- 4) Hold a Service Excellent and Hygiene certificate; training will be facilitated by the hospital.

g. Training & Capacity Building

Partners are required to attend training/workshops organized by the hospital, including: **Service Excellent, Basic Hygiene & Sanitation, Hand Hygiene, BHD (Basic Life Support), and Fire Extinguishers.**

h. Partnership & Food Court Management Rules

- 1). Kiosk variety must include healthy, halal, and nutritious food, with a diverse menu and affordable prices;
- 2). Vendors must maintain good cooperation, avoid detrimental duplication of business, and play a role in building a positive image of the hospital;
- 3). The canteens must be environmentally friendly, reduce single-use plastics, and implement a segregated waste management system;
- 4). The sale and consumption of cigarettes, vapes, e-cigarettes, alcohol, and similar products are prohibited on the hospital premises;
- 5). Prospective canteen partners are only permitted to partner with 41 (forty-one) other vendors;
- 6). There is no limit to the number of menu items sold, as long as the vendor's name is registered and they have an official contract with the hospital.

i. Management Principles

This agreement serves as the basis for organizing a canteen that is orderly, healthy, professional, and sustainable, and provides benefits to patients, visitors, healthcare workers, the hospital, and vendors as business partners.

j. Unagreement/Pending Matters

The kiosk rental payment mechanism has not yet been finalized. According to the ToR, kiosk rental payments at RSABHK are **IDR 137,000/m²/month** or **IDR 8,220,000 per year** (5m² x IDR 137,000), and at RSKD, **IDR 500,000/m² per month**, paid in advance for a one-year period, excluding electricity and water. However, some vendors have proposed a payment option in instalment to reduce the burden. This proposal is still under discussion and has not been finalized at today's meeting.
