PUBLIC INFORMATION BOOKLET

Jambi – Rengat Toll Road Development Plan

DESCRIPTION OF THE DEVELOPMENT PLAN

The Jambi-Rengat toll road, part of the Trans Sumatra Toll Road, stretches approximately 198.13 km, connecting the city of Jambi in Jambi Province with the city of Rengat in Riau Province and is part of the Trans-Sumatra Toll Road Project (TSTR). The TSTR toll road project aims to build a 2,988 km toll road connecting Banda Aceh in the north to Bakauheni in the south. PT Hutama Karya (Persero) is leading this development under the supervision of the Ministry of Public Works and Housing, specifically the Directorate General of Highways. The project includes 24 links in the Indonesian government's Sumatra toll road development plan.

The first phase of the Jambi-Rengat Expressway is set to be 67km long with varying facilities. The road will be 60-100-meters wide based on location and requirements, featuring two lanes in the first construction phase with a width of 3.6 m each lane. The total land area required for the project is estimated at 8,924,875.76 m². Based on the results of geospatial analysis and legal studies as well as preliminary discussions with the Land Office of BPN ATR Jambi Province, the Rengat Jambi Toll Road Project phase 1 impacts 9 villages (Pijoan, Tantan, Rantau Majo, Gerugung, Bukit Baling, Suko Awin Jaya, Selat, and Teluk), located in 4 sub-districts (Jambi Luar Kota, Sakernan, Pemayung and Muara Papalik and 3 districts (Muaro Jambi, Batanghari, and Tanung Jabung Barat in Jambi Province).

BENEFIT

The Jambi-Rengat toll road to provide many benefits both economically, socially, and environmentally. Toll roads are not just transportation infrastructure, but also a driver of development and sustainable improvement in the quality of life of the community.

THE IMPACT OF DEVELOPING THE JAMBI-RENGAT TOLL ROAD

The Jambi-Rengat Toll Road Construction Project Phase 1 Sp. Ness - Merlung requires 8,924,875.76 m² of land, including 4,477,273.01 m² of privately owned land belonging to 519 AHs, 4,339,489.71 m² of land owned by 1 company, and 108,113.04 m² of government-owned land. The project will impact 37 major buildings and affect 164 AHs. A total of 120,561 diverse tree species including 78,342 palm trees, 33,146 rubber trees, 86,000 timber trees, and 473 areca nut trees were affected and categorized into small, medium, and large trees, and impacted community public assets including elementary school buildings in Pijoan and Gerunggung Villages, and one mushala in Dusun Mundo Village. 344 affected households were included in the severe impact group as they lost more than 10 percent of their assets and 247 affected households were categorized as vulnerable.

PRINCIPLE

The primary guideline in land acquisition processes is to make certain that the livelihoods of impacted communities do not decline due to the subproject. This aligns with the stipulations outlined in Law No. 2 of 2012 on land acquisition for development in the public interest, Law No. 11/2020 on Job Creation and Government Regulation No. 19 of 2021 on the Implementation of Land Acquisition for Development in the Public Interest, and AIIB's ESS.

- a. As much as possible avoid and/or minimize the impact of the subproject on the assets and livelihoods of affected people (PAPs).
- b. Conducting a Social Impact Assessment in accordance with the culture and especially vulnerable groups which include i) a household headed by a woman, ii) an elderly household head, iii) a household head with special needs iv) a poor household, v) a household that does not have a household soil.
- c. Conduct consultations with affected PAPs, host communities affected by relocation, NGOs and other stakeholders.
- d. Inform PAPs of the land acquisition process to be undertaken, resettlement planning, and incorporate all appropriate mitigation measures to improve or at least restore the livelihoods of all PAPs, especially vulnerable groups, so that PAPs' standard of living does not deteriorate compared to pre-project levels.
- e. Inform PAPs about any land acquisition process, resettlement planning, and incorporate all appropriate mitigation measures to improve or at least restore the livelihoods of all PAPs, especially vulnerable groups, so that the standard of living of PAPs does not deteriorate compared to before the project.
- f. Assist and compensate AP/without recognized legal title or title to land for non-land assets at replacement cost. Special attention will be given to women, female heads of household, and the elderly and other vulnerable people;
- g. Disclose or inform the Land Procurement Planning Document (DPPT) to PAPs and other stakeholders in an easily accessible place and in a language that is understandable.
- h. Payment of compensation and other entitlements prior to physical and economic displacement. Construction work will not start until the PAPs have received all compensation and other assistance.
- i. Monitoring of the implementation of the land acquisition plan including the implementation of the livelihood restoration program and its impact on the living standards of the PAPs.

AFFECTED PERSONS

At the planning stage, the parties entitled to compensation will be identified and will be continued at the land acquisition preparation stage. Then finalized and determined by the Land Acquisition Implementation Team at the land acquisition implementation stage. According to Law No. 2/2012, those entitled to compensation are those who own or control the object of land acquisition in the form of land, buildings, plants, objects related to land, or other things that can be valued, such as business losses and changes in profession.

LAND ACQUISITION PROCESS

- a. Preparation of land acquisition plan document
- b. Determination of the location of project activities
- c. Offering a fair and reasonable price for land and/or assets which is also based on the regulations
- d. If agreed, the next step is that the Land Acquisition Team will propose the determination of the amount of compensation based on the estimated price of an independent appraiser.
- e. The negotiated value will be paid immediately to the landowner after all documents required for the land acquisition process are completed by the landowner.
- f. Sign a statement letter regarding the relinquishment of rights to land and/or buildings and/or plants and/or other things related to the land and submit the original documents regarding land ownership/control.

ENTITLEMENT

1. Loss of Land
 - a. Loss of productive land
 - Marginal Marginal loss (losing less than 10% of total productive landholding of the household)
 - Severe loss (losing 10% or more of total productive landholding of the household) :
 - b. Loss of residential land
 - Loss of some and remaining residential land that is still sufficient to live in
 - Full or Partial loss but remaining residential land is not enough to live on - relocation required :
 - c. Government/state land and Land owned by Private Companies
2. Loss of Crops and Trees
3. Loss Structure
 - a. The main structure is fully affected or partially affected, but the remaining area is insufficient to live in
 - b. Partially affected main structures (the remaining structure is viable for continued use)
 - c. Secondary structures (fences, driveways, extended eaves, sheds, etc.)
 - d. Public facilities and infrastructure/objects attached to the land
4. Loss of Livelihood/Income
 - a. Loss of livelihood/ income opportunity
 - b. Loss of income due to crop loss
5. Temporary Impacts During Construction
6. Other loss
 - a. Waiting period compensation (interest)
 - b. Loss of the resource base (high risk of improvement)

GRIEVANCE REDRESS MECHANISM

The Grievance Redress Mechanism (GRM) is a systematic process to address grievances from project affected persons (APs) and groups. It will be implemented at the district level, with an information disclosure mechanism in Bahasa Indonesia to inform local communities about the GRM and their responsibilities in TSTR activities. The Implementing Agency (IA) will handle all benefit and assistance grievances, while negotiations will be conducted to reach consensus. Procedures for resolving grievances regarding affected assets, compensation, and other aspects of the project have been outlined, and no costs will be incurred by PAPs when making complaints. The AIIB Project Affected People Mechanism (PPM) is a platform for communities and individuals to lodge complaints against AIIB-supported projects. The PPM was established by AIIB to provide an independent review of inputs from those affected by failure to implement the Environmental and Social Policies. The PPM is managed by the Project Management Unit (PMU) and a grievance register is established to record issues raised by stakeholders during project implementation. Any serious complaints will be submitted to AIIB within 48 hours, and the PMU is responsible for the database.

MONITORING

DJBH will ensure that the monitoring and internal supervision of land acquisition is carried out in accordance with the procedures and principles of land acquisition as described above.

SUBPROJECT RESPONSIBILITY AND LAND PROCUREMENT

DJBH is responsible for the implementation and activities of land acquisition. In the land acquisition process, as regulated in Law no. 2/2012. DJBH will cooperate with the Jambi Provincial Government to prepare land acquisition (determination of subproject locations) and cooperate with the Jambi BPN (National Land Agency) Regional Office for land acquisition implementation.

Appendix 7. Documentation of Socio-Economic Survey

Appendix 8. Gaps between AIIB Environmental & Social Framework (Amended 2022) and GOI's Laws on Land Acquisition and Resettlement and Proposed Gap-filling Measures

No	Issues	AIIB Environmental & Safeguards Framework (Amended 2022)	GOI's Laws	Gaps between AIIB E&S Framework and GOI's Laws	Proposed Gap-filling Measures/Project Policy
1	Objective	To avoid involuntary resettlement (IR) wherever possible; to minimize involuntary resettlement by exploring project and design alternatives; to enhance, or at least restore, the livelihoods of all displaced persons in real terms relative to pre-project levels; and to improve the standards of living of the displaced poor and other vulnerable groups.	With regard to avoid involuntary resettlement wherever possible to minimize involuntary resettlement by exploring project and design alternatives, the Appendix II of Government Regulation No. 22/2021 requires assessment of alternatives (project and / or design) for the analysis of the project environmental and social impacts assessment. Article 3 of Law No. 2/2012 stipulates that one of the objectives of land acquisition in the public interest shall have the objectives is to improve the welfare and prosperity of the people, state and society by guaranteeing the legal interest of the entitled party.	There is no explicit requirement to improve the living standards of the displaced poor and other vulnerable groups after involuntary resettlement.	The project has tried to avoid IR impacts from the feasibility stage of the design by exploring alternatives. Measures which have been taken to avoid or minimize involuntary resettlement impacts are included in this LARP; The livelihood restoration measures consulted with the VAHs and SAHs during LARP preparation to enhance, or at least restore, the livelihoods of all APs; and to improve the living standards of the poor and other vulnerable groups.
2	Scope and Triggers	The involuntary resettlement safeguard cover physical displacement (relocation, loss of residential land, or loss of shelter) and economic displacement (loss of land, assets, access to assets, income sources, or means of livelihoods) because of (i) involuntary acquisition of land, or (ii) involuntary restrictions on land use or on access to legally designated parks and protected areas. It covers them whether such losses and involuntary restrictions are full or partial, permanent or temporary.	Article 7 of Government Regulation No. 19/2021 stipulates that the Land Acquisition Plan shall be prepared based on feasibility studies including social impacts that may arise as a result of land acquisition and development.	There is no explicit requirement to cover any impacts caused by restrictions on land use or on access to legally designated parks and protected areas.	The scope shall include both economic displacement and physical displacement because of (i) involuntary acquisition of land or (ii) involuntary restrictions on land use or access to legally designated parks and protected areas. It covers whether such losses and involuntary restrictions are full or partial, permanent or temporary.
3	Screening of the project	Screen the project early on to identify past, present, and future involuntary resettlement	Article 14 of Government Regulation No. 19/2021 stipulates that every agency that requires land for public-interest development shall prepare a Land Acquisition Plan which is based on (i) spatial plan, (ii) development priorities as stated in the medium-term development plan, the strategic plan, and the working plan of the relevant agencies. Article 7 of Government Regulation No. 19/2021 sets out that the Land Acquisition Plan shall be prepared based on feasibility studies which include (i) socio-economic survey; (ii) location feasibility; (iii) analysis of development costs and benefits for the region and community; (iv)	Government Regulation No. 19/2021 requires a feasibility study for land acquisition that must include a socio-economic survey and discussion of social impacts but does not explicitly require screening for involuntary resettlement. The depth of screening for socio-economic impacts as mandated for a feasibility study is not stipulated in the law. There is no explicit requirement to conduct screening and assessment of impacts when land acquisition involves easement rights, land purchase or land use restrictions, as opposed to direct acquisition.	Screen the project to identify involuntary resettlement impacts and risks in accordance with the requirements of AIIB Environmental & Social Framework (Amended 2022).

No	Issues	AIIB Environmental & Safeguards Framework (Amended 2022)	GOI's Laws	Gaps between AIIB E&S Framework and GOI's Laws	Proposed Gap-filling Measures/Project Policy
			estimated land value; (v) environmental impacts and social impacts that may arise as a result of land acquisition; and (vi) other necessary studies.		
4	Meaningful consultation	Carry out meaningful consultations with DPs, host communities, and concerned nongovernment organizations. Pay particular attention to the needs of vulnerable groups	Article 31 of Government Regulation 39/2023; Articles 29, 30, 32 of Government Regulation No. 19/2021 and Articles 59, 60, 61, 62; and 63 of Ministry Agraria/Spatial Planning (MASP) Regulation 19/2021 describe in detail the requirements of public consultation with entitled parties, property managers and/or property users and/or affected communities during land acquisition preparation. Article 71 of Government Regulation 39/2023, Articles 72, 73 and 74 of Government Regulation No. 19/2021 and Articles 112, 113 and 114 of MASP Regulation 19/2021 describe requirements of consultation with entitled parties in determining form of compensation	Government Regulation No. 19/2021 and MASP Regulation No. 19/2021 regulate consultations with the entitled parties in determining form of compensation, but not the communities surrounding. There is no mention of requirements on public consultation and community participation during monitoring of land acquisition implementation. Government Regulation No. 19/2021 requires public consultation before a decision of location determination for land acquisition, however, the law does not require consultations with host communities. Article 30 of Government Regulation No. 19/2021 stipulates that affected communities as well as those who are directly affected are invited to participate in consultations, but there is no mention of ensuring that vulnerable groups as per the definition of AIIB Environmental & Social Framework (Amended 2022) are involved in. Article 32 of Government No. 22/2021 requires the involvement of vulnerable community in the public consultation. However, "vulnerable community" is referred to the layer of community that is most potentially affected by the business and/or activity so that it requires more attention so that it does not adversely affect their lives – the definition is not clear.	Meaningful consultation and participation of APs have been conducted in accordance with the requirement of the AIIB Environmental & Social Framework (Amended 2022) during LARP preparation and implementation stages. Consultations and discussions with APs and stakeholders will be carried out continuously during the process of land acquisition and the project implementation. Vulnerable groups (the poor, the landless, the elderly, women and children, Indigenous Peoples, and those without legal title to land) will be paid particular attention during LARP preparation and implementation.
5	Information disclosure	Inform all DPs of their entitlements and resettlement options and ensure their participation in planning, implementation, monitoring and evaluation of resettlement;	Article 55 of Law No. 2/2012 regulates that the entitled parties shall have rights to (i) have knowledge of the performance of the land acquisition; and (ii) receive information about the land acquisition.	There is no provision on standalone disclosure of LARP to the APs.	All the APs, including APs without titles to land, will participate in planning, implementation, monitoring, and evaluation of resettlement and be informed of and consulted about their

No	Issues	AIIB Environmental & Safeguards Framework (Amended 2022)	GOI's Laws	Gaps between AIIB E&S Framework and GOI's Laws	Proposed Gap-filling Measures/Project Policy
			Land Law 2/2012 stipulates that one principle of land acquisition is “<i>Transparency</i>” which means land acquisition for development will be carried out by providing access to the community to obtain information related to land acquisition. Article 31 of Government Regulation No. 39/2023 and Article 61 of MASP 19/2021 regulate that a Land Acquisition Plan shall be explained during public consultation including (i) purpose and objectives of public-interest development plan; (ii) stages and time of the land acquisition process; (iii) roles of the appraiser in determining the value of compensation; (iv) incentives to be granted to entitled parties; (v) affected assets; (vi) form of compensation; and (vii) rights and obligations of entitled parties, property managers and/or property users and affected communities. Some provisions under the Law No. 2/2012 (Articles 17, 26, Article 29) and Government Regulation No. 19/2021 (Articles 48, 49, 64) regulate requirements on disclosure of the development plan, DMS result, project location determination through newspapers and electronic media. Information disclosure to DPs without titles to land is regulated in the MASP Regulation 6/2020 (article 10 and 12)		entitlements on compensation and assistance and resettlement options during consultation activities. Documents including (i) LARP endorsed by the government/EA and concurred by AIIB; (ii) new LARP, updated LARP, or addendum to the LARP, any corrective action plan prepared during implementation, if any; and (iii) semiannual safeguards monitoring reports will be made available on IA/EA and AIIB websites.
6	Grievance redress mechanism	Establish a grievance redress mechanism to receive and facilitate resolution of the DPs' concerns. Support the social and cultural institutions of DPs and their host population.	Article 135 of Government Regulation No. 19/2021 stipulates that in the event that there are reports and/or complaints from the community to the head of ministries/agencies, the Attorney General's Office of the Republic of Indonesia, the Indonesian National Police, governors, or regents/mayors regarding deviations or abuse of authority in the implementation of Land Procurement for Public-Interest development and Nationally Strategic Projects, the settlement shall be conducted by prioritizing the administrative process in accordance with provisions of laws and	There is no clear requirement on GRM records and the official appointed	A project-level GRM will be established in accordance with AIIB & IsDB requirements and the Government procedures. The GRM is a systematic process for receiving, recording, evaluating, and addressing an affected person's project-related grievances transparently and within a reasonable period;

No	Issues	AIIB Environmental & Safeguards Framework (Amended 2022)	GOI's Laws	Gaps between AIIB E&S Framework and GOI's Laws	Proposed Gap-filling Measures/Project Policy
			regulations in the field of government administration. Government Regulation No. 19/2021 stipulates some provisions regarding resolution of objections of DPs regarding location of the development plan, results of inventory, form of compensation, compensation amounts.		
7	Compensation unit rates	The calculation of full replacement cost will be based on the following: elements: (i) fair market value; (ii) transaction costs; (iii) interest accrued, (iv) transitional and restoration costs; and (v) other applicable payments, if any. Depreciation of structures and assets should not be taken into account The replacement cost shall be determined by an independent appraiser experienced in assessing acquired assets.	According to Article 1 of Government Regulation No. 19/2021 and Article 1 of MASP Regulation 19/2021, compensation is a reasonable and fair compensation to the entitled parties, managers and/or users of goods in the land acquisition process. According to Article 68 of Government Regulation No. 39/2023 and Article 110 of MASP Regulation 19/2021, an independent, government and professional appraiser who obtained a license of assessment practice from the minister in charge of government affairs in the state finance sector has the duty to appraise the amount of compensation per land plot covering (i) lands; (ii) aboveground space and underground spaces; (iii) buildings; (iv) plants; (v) objects related to land; and (vi) other assessable losses Article 69 of Government Regulation No. 39/2023 and Article 111 of MASP Regulation 19/2021 state that compensation to be appraised by the Appraiser is the value of the time of announcement of the Determination of Location of Public-interest development by considering the waiting period at the waiting period at the time of compensation payment.	Government Regulation No. 19/2021 is silent on the application of depreciation when calculating compensation for affected structures. MAPPI applies depreciation for structures, however, this will not be applied if the principle on “no depreciation” is included in the LARP or based on the request of the project proponent/agency requesting the appraiser service.¹ For affected buildings, MAPPI applies solatium (emotional compensation) of 10% - 30% of the total compensation for physical loss. In the case of SPI applies the depreciation, the depreciation and deduction for affected structures will be given back to the AHs and put it in the premium value component. There is no provision on compensation for people using government's land less than 10 years. Compensation for the land indicated as a destroyed land " to be provided 25% of the sales value tax object. In terms of the calculated value is less than IDR 1 million, the compensation will be given at IDR 1 million in a minimum	Compensation will cover all the impacts set forth in Article 68 of Law No. 19/2021; Compensation at full replacement cost will be applied. Depreciation of structures and assets shall not be taken into account; An independent and qualified appraiser will be mobilized to appraise the replacement cost of affected lands and non-land assets; In case of involuntary resettlement, capital gains tax and the costs of transferring ownership, including the cost of new land certificates, will not be deducted from the compensation of those who will lose lands;
8	Compensation for land users (tenant farmers / croppers / share- croppers)	Compensation for affected land and non-land assets should be provided at replacement cost	Perpres 62/2018 and MASP Regulation 6/2020 stipulate that compensation should consider the cost of mobilization, cost for moving, house rent during the transition period, and loss of income according to valuation by independent appraisal	There is no provision on compensation for people using government's land less than 10 years. Entitlements as per Government Regulation No. 19/2021 are only eligible	Compensation for sharecroppers will be provided based on losses at replacement cost prior to economic and physical displacement.

¹ Indonesia Valuation Standards 306 (SPI 306). Land Acquisition Assessment for Development for the Public Interest. Code of Ethics Indonesia Appraisers and Indonesia Standard, 2015, Jakarta, Gelora Karya Bharata, 2015.

No	Issues	AIIB Environmental & Safeguards Framework (Amended 2022)	GOI's Laws	Gaps between AIIB E&S Framework and GOI's Laws	Proposed Gap-filling Measures/Project Policy
			Compensation will only be provided to land users that can prove their physical control over the government land for at least 10 years continuously Government Regulation No. 19/2021 stipulates that owners of trees/plants are entitled for compensation of affected trees/plants.	when the land acquisition is applying location determination.	
9	Compensation and assistance to DPs without legal title or any recognizable legal rights	Ensure DPs without titles or any recognizable legal rights to land are eligible for resettlement assistance and compensation at replacement cost for loss of non-land assets	The legal framework provides compensation and assistance for DPs without title or any recognizable legal rights to land unless their legitimate claims cannot be proven/recognized prior to land LAR implementation. Perpres 68/2018 mentions compensation will be provided for buildings and plants over land that controlled by people over government-owned lands must be proved those physical control of the land at least 10 years continuously.	Application of full replacement cost for DPs without legal title or any recognizable legal rights is unclear. There is no provision on compensation for people using government's land less than 10 years. There is a principle that the APs should have better live, but no clear requirement on assistance to improve the livelihood of the APs in the article.	Compensation for non-land assets of APs without title or any recognizable legal rights at replacement cost will be applied. However, the eligibility of the APs will be defined by the cut-off date. Any informal settlers who encroach on the project area after the cut-off date will not be eligible for any compensation and assistance under the project.
10	Provide physically and economically DPs with needed assistance	Provide physically and economically DPs with needed assistance, including the following: (i) if there is relocation, secured tenure to relocation land, better housing at resettlement sites with comparable access to employment and production opportunities, integration of resettled persons economically and socially into their host communities, and extension of project benefits to host communities; (ii) transitional support and development assistance, such as land development, credit facilities, training, or employment opportunities; and (iii) civic infrastructure and community services, as required.	Law No. 1/2011 and Government Regulation 88/2014 on Housing and Settlement Area stipulate general and technical guidelines applicable to housing and settlement projects for persons displaced as a result of land acquisition for public purposes. Central, provincial, regency, and city governments are responsible for developing norms, standards, procedures and criteria for housing development. Provisions on settlement, housing, basic facilities, supporting facilities, general utilities, and other related requirements sufficiently stipulate that relocation must be conducted in an appropriate manner, including by providing secured tenure, decent housing, civic infrastructure, and community services. Article 76 of Government Regulation No 39/2023 and Article 80 of Government Regulation No. 19/2021 and Articles 115, 188 and 119 of MASP Regulation 19/2021 regulate resettlement as one of forms of compensation, however, they do not contain specific language regarding the issues of securing tenure to land ensuring better housing for DPs in resettlement	The laws and regulations state on resettlement support, yet it is limited to support for housing and settlement area development and moving cost, but does not include secured tenure to relocation land, transitional support and development assistance, such as land development, credit facilities, training, or employment opportunities	Compensation for income loss at full replacement cost based on the duration of business disruption has been included in the entitlement matrix; Physically relocated households will be provided with transitional support and be entitled to participate in the LRP.

No	Issues	AIIB Environmental & Safeguards Framework (Amended 2022)	GOI's Laws	Gaps between AIIB E&S Framework and GOI's Laws	Proposed Gap-filling Measures/Project Policy
			sites, and public facilities as stipulated by Law No. 1 (2011). There is no mention on additional transitional support/allowance		
11	High Risk of Impoverishment	Pay attention to the needs of vulnerable groups, especially those below the poverty line, the landless, the elderly, women and children, and Indigenous Peoples, and those without legal title to land. Improve the standards of living of the displaced poor and other vulnerable groups, including women, to at least national minimum standards.	Article 5 of Law No. 39/1999 on Human Rights states that all members of vulnerable groups in society, such as children, the poor and the disabled, are entitled to greater protection of human rights Articles 5 to 12 of Law No. 11/2009 on Social Welfare prioritizes social welfare for people who have a lower standard of living because of conditions including displacement. Law No. 13/2011 on Handling the poor stipulates that the poor are entitled to obtain adequate living standards. Decree No. 39/2012 states: To cover or identify vulnerable / severely impacted people by the project as early as possible it can be covered in Social Impact Assessment of AMDAL as referred in Environmental Law no. 32/2009 and other relevant Government Regulation on Environmental Permits.	Article 2 of the Law No. 2/2012 regulates a principle – “welfare” which means that the acquisition of land for development can bring added value to the viability of the entitled parties and the public in general, but no clear requirement on assistance to improve the living standards of the poor and other vulnerable groups in the article.	Livelihoods/ income restoration supports will be provided to SAHs and VAHs. Programs for vulnerable groups refer to Law No. 11/2009 and implementing regulations. In this law, the local government is responsible for addressing these issues. The livelihood restoration activities to be implemented are included in the Livelihood Restoration Programs for APs. SAHs and VAHs have been identified during LARP preparation.
12	Preparation of a resettlement plan	Prepare a resettlement plan (RP) elaborating on DPs' entitlements, the income and livelihood restoration strategy, institutional arrangements, monitoring and reporting framework, budget and time-bound implementation schedule.	Articles 6 to 10 (a) of Government Regulation No. 39/2023 require preparation of a Land Acquisition Plan based on the feasibility studies. The Land Acquisition Plan shall at least contain the following (i) purposes and objectives of the development plan; (ii) conformity of spatial utilization activities; (iii) national/regional development priorities; (iv) location of the land; (v) required land area; (vi) general description of land status; (vii) estimated period for the implementation of land acquisition; (viii) estimated land value; (ix) budgeting plan; and (x) preferred form of compensation. Article 6 of Presidential Regulation 52/2022 require the the preparation of Social Impact Handling Plan based on based on the Minutes of the Destroyed Land Research Team (Risalah Tim Peneliti Tanah Musnah). The scope of planning document shall at least contain the	There are no requirements on mentioning the income and livelihood strategy, monitoring and evaluation framework, and institutional arrangements in the Land Acquisition Plan. However, article 11 of the Government Regulation No 39/2023 and MASP 20/2020 gives room to accommodate additional content as agreed by the institution need the land (article 18 and attachment V B). Consultation plans are regulated at the land acquisition preparation and implementation phases, but not included in the Land Acquisition Plan.	This LARP has been prepared in accordance with the requirements of AIIB Environmental & Social Framework (Amended 2022) & IsDB Environmental and Social Safeguard Policy.

No	Issues	AIIB Environmental & Safeguards Framework (Amended 2022)	GOI's Laws	Gaps between AIIB E&S Framework and GOI's Laws	Proposed Gap-filling Measures/Project Policy
			following (i) purposes and objectives of the development plan; (ii) national/regional development priorities, (iii) required land area; (iv) estimated period for the development , (v). estimated period for the implementation of land acquisition; (vi) estimated land value; (vii) budgeting plan		
13	Compensation and assistance payment	Pay compensation and provide other resettlement entitlements before physical or economic displacement.	Article 78 of Government Regulation No. 39/2023 stipulates that the provision of compensation shall be carried out simultaneously with the waiver of rights by entitled parties. Article 118 of Government Regulation No. 19/2021 and Article 124 of MASP Regulation 19/2021 regulate that in the event of an urgent situation due to natural disasters, widespread social conflicts, and disease outbreaks, public-interest development may be immediately implemented after a determination of location is issued by a governor/regent/mayor in accordance with their authorities. Article 79 of Government Regulation No. 39/2023 and Article 119 of MASP Regulation 19/2021 stipulate that provision of replacement land shall be carried out no later than six (6) months since the determination of the form of compensation by the Land Acquisition executor.	There is no gap identified.	Civil works at any affected area can only commence when (i) compensation is fully paid at replacement cost to all affected households; (ii) other LARP entitlements are provided; and (iii) the agreed comprehensive LRP is in place.
14	Monitoring of Project Implementation	Monitor and assess resettlement outcomes, their impacts on the standards of living of DPs, and whether the objectives of the RP have been achieved by considering the baseline conditions and the results of resettlement monitoring. Disclose monitoring reports.	Article 119 of Government Regulation No. 19/2021 and Article 142 of MASP Regulation 19/2021 stipulate that monitoring and evaluation of the performance of land acquisition for public interest development shall be conducted by the Ministry of Agrarian Affairs and Spatial Planning/ National Land Agency, both physically and based on information technology.	There is no requirement to monitor and assess resettlement impacts on livelihoods and standards of living of DPs and no requirement to assess progress achieved on resettlement outcomes and mitigating impacts on livelihoods and standards of living of DPs. There is no requirement to disclose monitoring reports.	As the project is categorized as Category A regarding Involuntary Resettlement, external resettlement monitoring of LARP implementation will be carried out by an independent and qualified monitoring agency. Resettlement monitoring reports will be posted on the AIIB website.

No	Issues	AIIB Environmental & Safeguards Framework (Amended 2022)	GOI's Laws	Gaps between AIIB E&S Framework and GOI's Laws	Proposed Gap-filling Measures/Project Policy
15	Negotiated Land Acquisition	Develop procedures in a transparent, consistent, and equitable manner if land acquisition is through negotiated settlement	Article 126 of Government Regulation No. 39/2023 and Article 146 of MASP Regulation 19/2021 states that land acquisition of an area not exceeding five (5) hectares may be carried out directly by the agency that require land with the entitled parties, by way of sale and purchase, exchange, or other agreed methods; or by using the land acquisition stages for public-interest development including (i) planning; (ii) preparation; (iii) implementation; and (iv) handover of results.	There are no requirements of transparent, consistent and equitable procedures in the negotiated land acquisition. No requirement of validation of negotiated land acquisition procedure by independent external party	Negotiated land acquisition shall be undertaken in a transparent, free from intimidation. A negotiated settlement will offer adequate and fair price for land and/or other assets. An independent external party shall be mobilized to document the negotiation and settlement process.

Appendix 9. DUE DILIGENCE ASSESSMENT 2023

1. **Background.** As reported during the mission on November 2023, the Commitment Making Officer of Land Acquisition (PPK Pengadaan Tanah) staff reported that payment of compensation has been provided for some affected households from Selat Village (STA 6+00 – STA 9 + 00) and Gerunggung Village (STA 16+000 – STA 18+500). The payment was delivered in 2021 to the 697,527 m² or 69,753 Ha owned by 128 PAPs. The entirely affected structure has been demolished by PAPs themselves and was confirmed that PAPs who received compensation has no longer access to their land/plantation. Since the displacement started before the preparation of LARP, a due diligence assessment to see if compensation complies with the AIIB E&S policy was conducted. This chapter summarizes the result of due diligence, including corrective actions to make the land acquisition implementation in the four villages compliant with the project resettlement principles.

2. **Methodology.** Due diligence assessment was conducted by interviewing the PAPs using a questionnaire on 4-9 December 2023. The data collection comprises (i). Profile of affected persons; (ii). Characteristics of affected assets in the project area, (iii). Consultations and participation during planning and implementation of land acquisition, (iv). Satisfaction level of affected persons, (v). effectiveness of DPPT-Land Acquisition Plan document; (vi). Impact of land acquisition on livelihoods of affected persons. Respondents of the interviewed are AH's head (126 land owners) and two HHs represented by their sons. In-depth interviews with the Commitment Making Officer of Land Acquisition (PPK Pengadaan Tanah) Jambi were conducted to get more information on the compensation valuation and other relevant information.

3. **Due Diligence Result,** the following are the results of the due diligence that has been carried out;

5.1 Affected Assets and People

4. **Impacts on Land.** Compensation has been provided to the 681,367 m² (128 plots) of land owned by 128 PAPs located in Selat and Gerunggung Villages. 81 out of 128 plots of land have a certificate as landownership evidence while 47 plots have informal evidence which is called '*sporadic*'. Detailed names of landowners and their loss of land are shown in **Appendix 4**

Table 5.1 Affected Land and Land Ownership Evidence

Village	Affected Land			Land ownership evidence	
	Land Total	Land Affected	%	Certificate	Informally evidence (sporadic)
Selat	417,411	187,804	45,0	42	19
Gerunggung	887,767	493,563	55,6	39	28
Total	1,305,178	681,367		81	47

Source: Primary Data Collection from DGH Consultant's, 2023

5. The affected land is mostly used for plantation (96 plots or 75%), 27 plots (20%) are farmland planted with seasonal crops, and the remaining 6 plots (5%) are residential land.

Table 5.2 Classification of Impacted Land (Parcel)

Village	Agricultural Dryland *	Plantation	Residential	Total
Selat	25	35	1	61
Gerunggung	2	61	5	67
Total	27	96	6	128

Note: *) farmland planted with seasonal crops

Source: Primary Data Collection from DGH Consultant's, 2023

6. **Impacts on the structure.** Compensation has been delivered to six affected structures (total 552 m²), all are houses. All six structures are entirely affected so the owner has to be moved. Detailed names of PAPs who lost their structures are shown in **Appendix 4**

Table 5.3 Affected Structures

Village	Occupation			Total Area of structure (m ²)	Area affected (m ²)
	House	Shop	House-shop		
Selat	1	0	0	100	100
Gerunggung	5	0	0	452	452
Total	6	0	0	552	552

Source: Primary Data Collection from DGH Consultant's, 2023

7. **Impacts on the plants.** Most of the respondents/landowners could not remember exactly the number and type of the affected trees. However, at least there were six types of trees/plants, and rice paddy was planted on the affected land where the payment was delivered as indicated in the table below.

Table 5.4 Affected Plants /Trees and Crops

Village	Rubber	Palm Oil	Areca Palm	Jengkol	Petai	Durian	Rice paddy
Selat	17	18	2	0	0	0	19
Gerunggung	44	41	4	1	3	1	1
Total	61	59	6	1	3	1	20

Source: Primary Data Collection from DGH Consultant's, 2023

5.2 Profiles of Affected Persons

8. Among a total of 128 PAPs, there were 39 PAPs (30%) were women-headed households. None of the households are reported to have any handicapped members. None of them belong to indigenous peoples. The ethnicity of the land owners mostly is Javanese and Melayu.

Table 5.5 AHs Head Gender and Ethnicity

Village	Gender of AH Head			Ethnicity			
	Men	Women	Total	Melayu	Javanese	Other	Total
Selat	44	17	61	30	27	4	61
Gerunggung	45	22	67	22	45	0	67
Total	89	39	128	52	72	4	128

Note: Other ethnicities are Minang, Bataknese and Chinese

Source: Primary Data Collection from DGH Consultant's, 2023

9. As indicated in the table below most of the AH head was not educated people, 68 – 53% of them never went to school, and 20 HHs – 16% graduated from elementary school. However, 9 AH heads (7%) have master's degrees.

Table 5.6 Education Level

Village	No School	Elementary	Junior High	Senior High	Non-degree	D4/ Bachelor	Master	Total
Selat	35	3	7	4	3	2	7	61
Gerunggung	33	17	6	3	6	0	2	67
Total	68	20	13	7	9	2	9	128

Source: Primary Data Collection from DGH Consultant's, 2023

10. Most of the AH-headed household's ages are below 60 years, and only 21 of them are categorized as elderly (their age is between 60-80 years old) as indicated in the table below.

Table 5.7 Age of head of family

Village	30- 40	41- 50	51- 60	61– 70	≥ 71	Total

- Household head with disabilities'	Households	0

² Poverty line for Jambi Province is IDR 452,478 per capita per month (*Jambi Province in Figures 2023*) or IDR 1,040,699 per household per month

- Poor Households	Households	56
- Elderly households head	households	21

5.3 Consultations and participation during the planning and implementation of land acquisition

13. All respondents confirmed there were about three to four times consultations held during the preparation of the Land Acquisition Plan-DPPT and implementation stage of land acquisition. Landowners/respondents acknowledged that the consultation was held by the Local Government (provincial, district as well as village level) and the consultant who prepared the DPPT. The information shared during the consultations includes: (i). project plans and objectives, (ii). land acquisition implementation procedures, (iii). the object of land acquisition and valuation asset by the appraisal, (iv). stakeholders involved in the land acquisition and (v). land acquisition and project implementation indicative schedule. Most of the respondents (74%) said that dissemination of information was done verbally with no provided written information. Nine percent of respondents said there is written information was provided, and the remaining 17% of respondents said they don't remember it. However, all respondents confirmed that they understood all the information shared during the consultations.

14. All respondents said that they were involved in a detailed measurement survey conducted by the Land Acquisition Implementation team and the valuation of compensation by appraisal. All landowners/respondents confirmed that the measurement of affected assets is accurate. Consultation to determine the type of consultation was done directly to the landowners, all landowners attended the consultation except one which represented by his son. Compensation was provided directly to the landowners by transfer to the account of each AH.

5.4 Satisfaction level of affected persons

15. All AHs confirmed that payment compensation has covered all of their losses (land and or plant and or structure) and they are satisfied with the compensation given since it is the same or higher than the market price (see table below). Supporting their satisfaction, 43 AHs said that they could buy another farmland in the surrounding area with the same fertility, wider or the same as what was affected by the project. 82 AHs expressed their satisfaction because all compensation was transferred at once times, transfer to the account of each AH (there were previous cases where compensation was given gradually over a fairly long period between one stage and another)

Table 5.11 Amount of Compensation Value

Village	Land/Building Compensation Value is Higher than Market Value	Land/Building Compensation Value Is in Accordance with Market Value	Land/ Building Compensation Value Does Not Match Market Value	Plant Compensation Value is Higher than Market Value	Plant Compensation Value Is in Accordance with Market Value	Plant Compensation Value Does Not Match Market Value
Selat	0	2	0	16	44	0
Gerunggung	4	1	0	0	67	0
Total	4	3	0	16	111	0

Source: Primary Data Collection from DGH Consultant's, 2023

16. In addition, the PPK Land Acquisition said that compensation was valued by the independent appraisal at replacement cost principles. The values paid to AHs are in accordance with the value determined by the appraisal team without any tax deduction or other administration cost. AHs understood that valuation was based on independent appraisal.

17. For the entirely affected structures, compensation was provided for the affected structure, and relocation assistance was covered by the emotional loss allowance called 'solatium' (10-30% of total compensation for the affected structure depending on the length of occupation of the structures). In addition, the AHs were allowed to collect salvage material from the affected structures. So compensation for the entirely affected structure is considered fair.

5.5 Grievance Redress Mechanism

18. As mentioned in the chapter related to the GRM, the Grievance Redress Mechanism (GRM) during the preparation and implementation stage of land acquisition refers to the mechanisms stipulated in the law/regulation on land acquisition. And 124 AHs (97%) said that they knew about those mechanisms from the local government or Land Acquisition Implementation Team (LAIT), and 50 AHs have experienced raising their complaint through the mechanism. Complaints are related to the correction of the inventory of affected assets. Further, they said that they received a timely response to their complaint, but some resolutions did not satisfy them without a clear explanation of what was meant by not satisfied.

19. The remaining 78 AHs said they have no experience of using the mechanisms because they didn't have any complaints to be raised.

5.6 Perceptions about the project

20. Almost AHs (122 households -95 %) said got compensation for their affected asset and had a positive impact from the project, however at the same time they also said that land acquisition caused a decrease in their agricultural land. Further, they expected to get more opportunities to involve in the project-related jobs. Thus, it is concluded that the land acquisition and subsequent compensation payments are quite good but refrain from reflecting upon the impact on livelihoods.

Appendix 10. Livelihood Restoration Framework

Executive Summary

This Livelihood Restoration Framework (LRF) has been prepared as a recommendation arising from the review of the existing Land Acquisition and Resettlement Plan (LARP), socio-economic survey and baseline materials, and the Land Acquisition and Resettlement Due Diligence Enquiry Report, supported by selected field observations and consultations undertaken during the due diligence process. The Framework is intended to provide a more structured and operational basis for livelihood restoration in the revised LARP and to respond to lender expectations for a clearer and more actionable livelihood restoration approach.

Phase I of the Jambi–Rengat Toll Road is expected to affect 519 households, including 344 severely affected households and 247 vulnerable households. The project affects land, productive trees, structures, and other livelihood-related assets, while compensation has only been partially delivered, with some households already compensated and others still remaining under outstanding compensation status. The socio-economic survey confirms that affected households are predominantly dependent on land-based livelihoods, with 88.2% of affected household heads identifying farming as their primary occupation. These conditions indicate that livelihood restoration should be treated as a core safeguard requirement rather than as a supplementary measure following compensation.

The review further indicates that the current project documentation already provides a useful baseline for livelihood restoration planning, but that the existing approach is not yet sufficiently operational. In particular, the assessment identified the need for clearer targeting of severely affected and vulnerable households, stronger differentiation of support packages, more explicit implementation arrangements, improved grievance handling for livelihood-related issues, and more outcome-oriented monitoring. The Framework therefore recommends that the revised LARP incorporate a formal Livelihood Restoration Program (LRP) structure covering target groups, eligibility logic, program streams, implementation responsibilities, monitoring indicators, and linkage with the project grievance mechanism.

The recommended framework proposes a combination of agriculture and plantation restoration, livestock and land-based diversification, non-farm skills support, microenterprise and home-based business support, and transitional agriculture- and plantation support for both compensated and non-compensated households, including affected households (AHs) with outstanding compensation that require support to restore productive capacity due to prolonged uncertainty. This transitional support should be delivered through training with provision of in-kind inputs, technical assistance, and practical agriculture- and plantation-related support, rather than through direct cash assistance.

This LRF is not intended to replace household-level verification or a subsequent LRP Action Plan. Rather, it is intended to provide a practical, forward-looking, and appraisal-ready framework that

can be integrated into the revised LARP, while allowing household-level validation and package refinement to be undertaken during implementation. In this sense, the Framework is presented as a safeguard strengthening measure designed to help ensure that livelihood restoration is addressed in a more structured, operational, and implementation-oriented manner.

1. Introduction

This Livelihood Restoration Framework (LRF) has been prepared as a recommendation arising from the review of the existing Land Acquisition and Resettlement Plan (LARP), socio-economic survey and baseline materials, and the Land Acquisition and Resettlement Due Diligence Enquiry Report, supported by selected field observations and consultations undertaken during the due diligence process. The Framework is intended to provide a more structured and operational basis for livelihood restoration in the revised LARP. It is not presented as a final implementation manual, but as a practical framework to guide the design, targeting, delivery, and monitoring of the Livelihood Restoration Program (LRP).

The need for a dedicated framework is clearly established by the scale and nature of project impacts. For Phase I, the project is expected to affect 519 affected households, including 344 severely affected households and 247 vulnerable households. Project impacts include loss of land, productive trees, structures, and livelihood sources, particularly for households dependent on agriculture and plantation activities. Compensation has been partially delivered to some affected households, while many others remain with outstanding compensation. These conditions indicate that livelihood restoration should be treated as a core safeguard requirement rather than as an optional post-compensation measure.

The socio-economic evidence reinforces this conclusion. The SES covered affected households in Phase I and found that 88.2% of affected household heads identify farming as their main livelihood. This confirms that the majority of affected households remain highly dependent on land-based income, especially plantation livelihoods. The due diligence review further notes that prolonged uncertainty and delayed compensation have already contributed to constraints in restoring productive capacity among households affected by unresolved compensation and declining plantation productivity in some areas. Together, these findings support the recommendation that a structured and actionable LRP framework be incorporated into the revised LARP.

Objectives of the Framework

The purpose of this Framework is to provide a strategic and operational basis for restoring, and where feasible improving, the livelihoods and living standards of project-affected households. More specifically, it aims to:

- provide a structured and implementable basis for livelihood restoration under the revised LARP;
- define target groups and priority categories for support;
- establish a practical framework for matching support measures to different types of livelihood impact;
- set out indicative institutional, monitoring, grievance, and financing arrangements; and
- support appraisal readiness in response to lender comments requiring a clearer and more operational livelihood restoration approach.

2. Project Overview

The Jambi–Rengat Toll Road is part of the Trans-Sumatra Toll Road network. Phase I covers the Simpang Ness–Merlung segment with a length of approximately 67.45 km in Jambi Province. According to the LARP, this phase crosses nine villages in four sub-districts and three regencies. The project requires significant land acquisition and affects predominantly rural households in a corridor characterized by plantation-based livelihoods.

Land acquisition has progressed unevenly. The due diligence report confirms that compensation was partially implemented in Selat and Gerunggung Villages in 2021, covering 128 PAPs, while other affected households remain with outstanding compensation. This distinction remains important, but both groups should be considered eligible for livelihood restoration support. Households that have not yet received compensation continue to face uncertainty regarding payment timing and therefore may not use or maintain their land productively. At the same time, some households that have already received compensation continue to face uncertainty because certificate updating remains incomplete and the final status and boundaries of their remaining land are still unclear. As a result, both compensated and non-compensated households may require transitional livelihood support under the LRP.

The project affects 519 households and approximately 1,703 people. It affects 37 main structures and a large number of productive trees, including oil palm and rubber. The SES confirms that affected households are predominantly dependent on agriculture and plantation activities, with only modest diversification into non-farm livelihoods. This means that income recovery cannot be assumed to occur automatically through compensation alone, particularly where productive land and tree crops form the core of household livelihoods.

Table 1. Key Project and Impact Profile

Item	Indicative Information
Project section	Jambi–Rengat Phase I (Simpang Ness–Merlung)
Approximate length	67.45 km
Administrative coverage	9 villages, 4 sub-districts, 3 regencies
Affected households	519 households
Affected persons	Approx. 1,703 persons

Severely affected households	344 households
Vulnerable households	247 households
Main structures affected	37 structures
Main livelihood profile	Predominantly agriculture / plantation
Households already compensated	Partial, including 128 PAPs in Selat and Gerunggung
Outstanding compensation	Still applies to many affected households

3. Policy and Safeguard Context

The project is subject both to the Government of Indonesia's land acquisition framework and to AIIB ESS2. While national regulation provides the legal basis for compensation, ESS2 requires the project also to address livelihood restoration, particularly for severely affected and vulnerable households, with the objective of restoring, and where feasible improving, pre-project living standards. This creates a safeguard obligation that extends beyond compensation payment alone.

In this context, the LRF is guided by the following principles:

- livelihood restoration should go beyond cash compensation;
- support should be inclusive of vulnerable and otherwise at-risk groups;
- assistance should be matched to livelihood type and impact severity;
- support should be practical, phased, and feasible under project implementation conditions;
- women and vulnerable groups should be meaningfully included;
- livelihood support should aim for sustainability and market relevance; and
- household-level validation should refine delivery, not delay program establishment.

4. Scope and Methodology

This Framework has been prepared on the basis of a review of the available project documentation, including the existing LARP, socio-economic survey and baseline materials, due diligence findings, and other relevant project records. The assessment also draws on selected stakeholder consultations and field observations undertaken during the due diligence process. The overall approach is consistent with the Terms of Reference and is intended to support alignment with applicable lender safeguard requirements, particularly AIIB ESS2.

The purpose of this approach is not to replicate the detailed household-level planning that would normally be undertaken during LARP updating and implementation, but rather to identify the main livelihood issues, assess the adequacy of the current approach, and recommend a more structured and operational framework for livelihood restoration. In this regard, the Framework reflects a combination of document review, analytical assessment, and field-based observations, and is intended to provide a practical basis for integrating livelihood restoration into the revised LARP.

5. Limitations

This Framework is based on available documentation, stakeholder consultations, and selected field observations undertaken during the due diligence process. In the course of the assessment, several data gaps and evolving conditions were identified that are relevant to livelihood restoration planning and to the finalization of the revised LARP.

These include:

- pending finalization and confirmation of land acquisition boundaries and related administrative processes;
- absence of updated socio-economic survey data reflecting current household conditions;
- limited availability of documented grievance records and GRM tracking;
- and ongoing verification of affected assets, eligibility, and compensation status.

These issues do not invalidate the findings or recommendations presented in this Framework. However, they indicate areas where further validation and refinement will be required during LARP updating and implementation. Accordingly, this Framework should be understood as a forward-looking and operational recommendation based on the best available information at the time of review, rather than as a substitute for household-level verification during implementation.

6. Livelihood Profile and Impact Assessment

The SES and socio-economic baseline provide a sufficiently robust basis for framework-level planning. The SES covered all affected households in Phase I and was conducted in parallel with the IOL process. It was explicitly designed not only to profile affected households, but also to identify severely affected and vulnerable households and to provide the basis for future impact management strategies and livelihood development.

The results show that 88.2% of affected household heads are farmers, confirming a heavy dependence on land-based livelihoods. Household members are not highly diversified in employment terms, and non-farm skills exist only in a smaller subset of the affected population. This suggests that while diversification support is needed, land-based restoration will likely remain the core stream for many households.

The main livelihood impacts arising from the project include:

- loss of agricultural and plantation land;

- loss of productive trees, especially oil palm and rubber;
- disruption of small businesses and informal income sources;
- economic disruption linked to physical displacement; and
- reduced plantation maintenance and productivity caused by uncertainty in compensation timing.

The main livelihood risks include:

- decline in household income after asset loss;
- incomplete recovery where compensation is used for short-term consumption rather than productive reinvestment;
- limited ability of some households to shift to alternative livelihoods;
- risk of deeper poverty among vulnerable households; and
- constraints in restoring productive capacity among households affected by unresolved compensation, incomplete certificate updating, or continued uncertainty in productive land use.

Table 2. Summary of Livelihood Impacts and Risks

Dimension	Main Findings
Livelihood base	Predominantly land-based, especially oil palm and rubber
Main direct impacts	Loss of land, trees, structures, and income sources
Main affected categories	Severely affected households (including physically displaced households), vulnerable households, and households with outstanding compensation requiring support to restore productive capacity.
Key risks	Income decline, delayed recovery, weak diversification, misuse of compensation, exclusion of vulnerable groups
Immediate concern	Constraints in restoring productive capacity are already observed among both compensated and non-compensated households .due to prolonged uncertainty

7. Livelihood Restoration Framework

7.1 Objective of the LRP

The objective of the LRP should be to restore, and where feasible improve, the livelihoods and living standards of project-affected households whose productive assets, income sources, or economic activities are disrupted by land acquisition, relocation, or prolonged compensation uncertainty. This should be treated as a core safeguard obligation and integrated into the revised LARP as an operational component.

7.2 Targeting and Eligibility

The LRP should use a structured targeting approach based on the existing SES, LARP, and due diligence findings, supplemented by household-level verification during implementation. Verification should be used to confirm current livelihood status, compensation status, severity of impact, vulnerability status, and the most suitable support package. Eligibility is not precluded by prior receipt of compensation: households that have already been compensated but continue to experience livelihood or productive recovery constraints remain eligible for LRP support, as reflected in Table 3 below

Table 3. Indicative Targeting and Eligibility Matrix

Target Category	Indicative Basis for Inclusion	Main Livelihood Concern	Priority Level	Indicative Support Focus
Severely affected households	Loss of 10% or more of productive assets/income sources and relocated households (physically displaced households)	Significant reduction in productive capacity and income; loss of residence	High	Agriculture restoration, livestock, diversification, mentoring
Vulnerable households	Poverty, women-headed, elderly-headed, low labor capacity, landless, non-title holder, other at-risk status	Limited recovery capacity and risk of exclusion	High	Tailored support, microenterprise, home-based support, social protection linkage
Households with outstanding compensation	Compensation remains unresolved and households require support to restore productive capacity.	Declining productivity, delayed recovery, prolonged uncertainty	High	Agriculture and plantation restoration, transitional agriculture support, short-cycle inputs, interim productive assistance
Compensated households with livelihood loss	Compensation received, but household-level verification against the pre-project baseline confirms that livelihood or productive recovery remains constrained — for example due to incomplete certificate updating, unclear remaining land boundaries, or continuing loss of productive assets. Receipt of compensation does not, by itself, preclude eligibility for this category	Incomplete recovery and continued uncertainty in productive land use	High	Agriculture and plantation restoration, transitional agriculture support where justified, diversification, financial literacy
Non-farm affected persons	Existing skill profile or transition potential	Limited land-based recovery option	Medium	Vocational support, tools, job linkage
Small business / home-based activity households	Existing or potential small enterprise activity	Business disruption or limited diversification	Medium	Enterprise support, financial literacy, mentoring

Final eligibility should be confirmed through household-level verification during implementation. This applies equally to all target categories in Table 3, including households that have already received compensation; eligibility disputes may be raised through the project GRM.

7.3 Program Components

The LRP should be designed as a menu of complementary support streams rather than a single standard intervention. This is necessary because affected households differ in livelihood profile, impact severity, and recovery capacity.

Table 4. Indicative Livelihood Restoration Program Menu

Program Stream	Main Target Group	Indicative Support Package	Expected Outcome	Delivery Modality
Agriculture and plantation restoration	Land-based households, especially severely affected households	Seedlings, fertilizer, tools, short-cycle crops, replanting support, extension services	Resumed cultivation and stabilization of plantation-based income	Household or group-based input package plus field mentoring
Transitional Agriculture and Plantation Support	Households with outstanding compensation, as well as compensated households, that require support to restore productive capacity due to prolonged uncertainty.	Short-cycle crop inputs, seedlings, fertilizer, basic farm tools, simple productive support, and technical facilitation	Reduced short-term constraints in restoring productive capacity and stabilization of productive activity	Quick-start in-kind support with field facilitation
Livestock and land-based diversification	Severely affected households with reduced landholding	Small livestock package, feed support, husbandry training, follow-up mentoring	Alternative income source	Group or household package with follow-up visits
Non-farm skills support	Affected persons with existing non-farm skills or transition potential	Short vocational training, tools, practical coaching, job linkage	Transition to wage or service-based work	Training plus technical follow-up
Microenterprise and home-based business support	Women-headed households and low-risk self-employment households	Business training, starter kits, productive tools, financial literacy, market linkage	Establishment or strengthening of small business income	Training, kit support, mentoring
Tailored support for vulnerable households	Vulnerable households with limited capacity for mainstream support	Home-based support, simplified productive package, closer facilitation	Improved access to livelihood recovery	Individual or small-group facilitation
Financial literacy and compensation use	All LRP participants, especially compensated households	Financial planning, savings awareness, productive use of compensation	Better long-term recovery decisions	Group sessions and coaching
Post-training mentoring	All supported households	Technical follow-up, troubleshooting, reinforcement visits	Higher sustainability of support	Ongoing mentoring

These components build on the SES findings, review observations, and due diligence recommendations, while remaining at framework level rather than becoming a final action plan. All program streams under the LRP should be understood as livelihood support delivered through training, coaching, technical assistance, facilitation, productive inputs, starter kits, basic tools, livestock starter packages, and other in-kind support. In particular, transitional support should not be provided in cash, but through practical agriculture- and plantation-related support packages.

7.4 Institutional Arrangements

The LRP should be implemented through the project's consulting services mechanism, other institutional arrangement agreed with the financiers, with the PMC (or equivalent designated entity) responsible for overall coordination, oversight, and reporting. The PMC should engage qualified NGOs or service providers with expertise in community facilitation,

economic empowerment, and livelihood restoration. Local government agencies should provide complementary technical support and convergence where feasible, but should not be treated as the sole delivery mechanism.

Table 5. Indicative Delivery and Institutional Responsibility Matrix

Function	Lead Entity	Supporting Entity	Main Responsibility
Overall safeguards oversight	PMU/DGH	PMC	Compliance, approval, coordination, reporting
Program planning and sequencing	Local government	TIU/DGH	Operational planning, package structuring, work planning
Beneficiary verification	Local government	TIU/DGH, village focal points	Verify status, profile, priority category, support needs
Delivery of training and support packages	Local government	Related local government agencies	Implement livelihood support
Technical support and convergence	Related local government agencies	Service Provider/NGO	Link to agriculture, livestock, MSME, women's empowerment programs
Mentoring and follow-up	Related local government agencies	Service Provider/NGO	Post-training support and sustainability follow-up
Monitoring and reporting	Related local government agencies	DGH	Consolidate outputs and outcomes
Grievance handling	TIU/DGH	Local government//village focal points	Receive, track, and resolve LRP-related grievances

This structure reflects the recommendation that PMC oversight should be combined with specialized NGO expertise to strengthen implementation effectiveness and safeguards compliance.

7.5 Implementation Phasing

Implementation should follow a phased approach so that urgent livelihood needs can be addressed without waiting for completion of all verification and compensation processes.

- **Phase 1: Preparation**
Update and verify affected households, confirm compensation status, assess current livelihood conditions, and identify urgent cases requiring early support.
- **Phase 2: Program Design**
Classify households by profile and priority category, assign indicative support packages, and finalize delivery arrangements.
- **Phase 3: Delivery**
Implement support packages, maintain beneficiary engagement, and provide technical support and mentoring.
- **Phase 4: Monitoring and Adjustment**
Track results, identify households requiring additional support, and refine interventions where needed.

8. Monitoring, Grievance, and Budget Considerations

8.1 Monitoring and Evaluation

Monitoring should be outcome-oriented and not limited to activity counting.

Table 6. Indicative Monitoring and Evaluation Matrix

Indicator	Baseline Source	Frequency	Responsibility	Means of Verification
% of eligible households verified	SES / updated verification	Once at start, updated as needed	Local government (supported by TIU)	Verification records
% of SAHs, VAHs, and displaced households enrolled	LARP + updated verification	Quarterly	Local government (supported by TIU)	Participant registry
Number and type of support packages delivered	Program records	Quarterly	Local government (supported by TIU)	Delivery logs
% of participants completing training and mentoring	Program records	Quarterly	Local government (supported by TIU)	Attendance and mentoring records

Indicator	Baseline Source	Frequency	Responsibility	Means of Verification
% of households with resumed productive activity	Baseline + follow-up	Semi-annual	Local government (supported by TIU)	Field verification, interviews
% of households reporting restored or improved livelihood stability	Baseline + follow-up	Annual	Local government (supported by TIU)	Outcome survey
Number and resolution rate of LRP-related grievances	GRM records	Quarterly	Local government (supported by TIU)	Grievance register
Beneficiary satisfaction with support	Beneficiary feedback	Annual	Local government (supported by TIU)	Satisfaction survey

Monitoring should include baseline updating, periodic follow-up, and adaptive refinement of support where outcomes are weak.

8.2 Linkage with GRM

The LRP should be explicitly linked to the project-level GRM. This is important because the due diligence review identified limited GRM documentation as a material concern. PAPs should be able to raise complaints related to eligibility, exclusion, package mismatch, delays in delivery, and quality of support. These complaints should be recorded and tracked in a manner that supports transparency and corrective action.

8.3 Indicative Financing and Resource Requirements

Indicative main resource categories that will need to be funded.

Table 7. Indicative Financing and Resource Requirements

Cost Category	Main Cost Elements	Indicative Financing Approach	Remarks
Beneficiary verification and updating	Verification, profiling, validation meetings, package assignment	Local government budget	Needed early to confirm final participant list
Program delivery – agriculture	Inputs, seedlings, fertilizer, tools, extension support	Local government budget, with potential convergence with relevant local agriculture programs.	Core stream for land-based households
Program delivery – livestock	Livestock package, feed support, training	Local government budget, possible technical support from livestock agencies	For diversification cases
Program delivery – non-farm and enterprise	Training, tools, starter kits, coaching, market linkage	Local government budget ; possible convergence with MSME/skills programs	Important for diversification
Targeted support for vulnerable households	Tailored packages, home-based activities, facilitation	Local government budget, possible social protection linkage	Should not depend solely on government budget
Transitional agriculture and plantation support	Short-cycle crop inputs, seedlings, fertilizer, basic farm tools, technical facilitation, and simple productive support	Local government budget	For both households with outstanding compensation and compensated households requiring support to restore productive capacity, delivered through training, in-kind inputs, and technical support.
Financial literacy	Training, materials, coaching	Local government budget	Cross-cutting support

Cost Category	Main Cost Elements	Indicative Financing Approach	Remarks
Mentoring and technical assistance	Follow-up visits, troubleshooting	Local government budget/NGO contract	Essential for sustainability
Monitoring and evaluation	Baseline update, progress review, outcome tracking	Local government budget	Outcome-oriented monitoring required
GRM strengthening for LRP	Case tracking, documentation, communication	Local government budget	Should be integrated into LRP delivery

This table is not intended to present a detailed budget. It is included to demonstrate that the Framework has considered delivery requirements and funding logic at a high level. Core LRP financing, including transitional agriculture and plantation support, should be planned and confirmed through the project's approved financing arrangements, which may draw on a combination of sources — including project financing, government counterpart contributions, and/or convergence with relevant local government programs — as determined by the PIU/DGH in consultation with the financiers.

9. Corrective Action Plan

The corrective actions below are recommended on the basis of the review of the existing LARP, SES, and socio-economic baseline materials, due diligence findings, and selected field observations. They are intended to strengthen the revised LARP and support appraisal readiness by addressing the main gaps identified in relation to livelihood restoration, GRM, beneficiary verification, and implementation arrangements. Detailed budgeting is not included in this table, as this remains the responsibility of the Client. However, the actions below are framed to support practical implementation planning and sequencing.

No.	Key Issue Identified	Recommended Corrective Action	Responsibility	Timeline
1	Livelihood restoration approach is not yet sufficiently structured or operational in the current LARP	Integrate a formal Livelihood Restoration Framework into the revised LARP, including target groups, eligibility logic, program streams, implementation arrangements, monitoring indicators, and GRM linkage	TIU/DGH with CSC support	Immediate, during LARP revision
2	Current LRP concept is not yet supported by a clear implementation structure	Develop an implementation-oriented LRP section in the revised LARP and prepare a subsequent LRP Action Plan during early implementation	TIU/DGH with Local Government as Implementing Agency	Immediate to short term
3	Existing household data provide a useful baseline, but updated verification is still needed	Conduct household-level verification and updating of livelihood conditions, compensation status, and priority categories before full LRP roll-out	Local government with TIU/DGH support	Immediate
4	Outstanding compensation and prolonged uncertainty may already be affecting household livelihoods	Identify households with outstanding compensation and compensated households requiring support to restore productive capacity, and provide early transitional agriculture and plantation support, delivered through training, in-kind inputs and technical assistance rather than direct cash assistance.	Local government with TIU/DGH support	Immediate to short term
5	Severely affected and vulnerable households require differentiated support rather than uniform treatment	Apply a structured targeting and package assignment process to ensure that SAHs, VAHs, physically displaced households, and other priority cases receive tailored assistance	Local government with TIU/DGH support	Immediate to short term
6	Heavy dependence on land-based livelihoods requires a strong agriculture-oriented recovery stream	Include agriculture and plantation restoration as a core livelihood restoration component, supported by diversification options where needed	Local government with NGO support (if needed)	Short term

No.	Key Issue Identified	Recommended Corrective Action	Responsibility	Timeline
7	Some households have limited potential for land-based recovery and may need alternative livelihood options	Include non-farm training, microenterprise support, and livelihood diversification measures in the revised LARP/LRP framework	Local government with NGO support (if needed)	Short term
8	Vulnerable households may face barriers in accessing mainstream livelihood support	Establish tailored support measures for vulnerable households, including home-based options, closer facilitation, and linkage to relevant social assistance programs where feasible	Local government with TIU/DGH support	Short term
9	Compensation alone may not be translated into productive recovery without follow-up support	Include financial literacy and productive use of compensation as a cross-cutting element of the LRP	Local government with TIU/DGH support	Short term
10	Effective implementation requires clearer field-level delivery arrangements	Implement the LRP through the project's consulting services mechanism, with PMC oversight and qualified NGO/service provider engagement for delivery, mentoring, and follow-up	TIU/DGH with CSC support	Immediate to short term
11	Post-training follow-up is not yet clearly embedded in the current approach	Require post-training mentoring and technical assistance as part of LRP delivery to improve uptake and sustainability of support	Local government with TIU/DGH support	Short term to medium term
12	GRM documentation and traceability remain limited	Strengthen the project-level GRM for livelihood-related complaints, including complaint intake, tracking, resolution, and reporting	TIU/DGH with CSC support and PMC Oversight	Immediate
13	Livelihood-related complaints are not yet clearly distinguished within the GRM	Establish clear procedures for handling grievances related to eligibility, package selection, delays, exclusion, and quality of support	TIU/DGH with CSC support and PMC Oversight	Immediate to short term
14	Monitoring is currently more focused on process than on livelihood outcomes	Establish an outcome-oriented monitoring system for the LRP, covering verification, participation, package delivery, mentoring, grievance resolution, and livelihood recovery outcomes	Local government with TIU/DGH support	Short term
15	Client budgeting responsibility remains separate from framework design, but implementation planning still requires indicative resource logic	Reflect indicative financing categories in the revised LARP and subsequent LRP Action Plan, including confirmation that core LRP delivery—particularly transitional agriculture and plantation support—will be confirmed through the project's approved financing structure and delivered through in-kind inputs, technical assistance, and related livelihood support packages.	PMU / DGH with PMC support	During LARP revision and implementation planning

The corrective actions above are intended to address the most material gaps identified through the review process and to provide a practical pathway for strengthening the revised LARP. In particular, they respond to the need for a more structured livelihood restoration approach, improved targeting of severely affected and vulnerable households, clearer implementation arrangements, stronger GRM documentation, and more outcome-oriented monitoring. Together, these measures are expected to improve safeguard readiness and provide a more operational basis for livelihood restoration in line with lender expectations.

10. Integration with Revised LARP and Next Steps

This Framework should be integrated into the revised LARP as the strategic and operational basis for the LRP. It should not be treated as a standalone concept paper, but as part of the project's safeguard package. The revised LARP should therefore include the objective of the LRP, target groups, eligibility logic, program streams, institutional arrangements, implementation phasing, monitoring indicators, and linkage with GRM.

The next step after adoption of this Framework should be preparation of a more detailed LRP Action Plan during LARP updating and early implementation. That stage should finalize beneficiary lists, package assignment, implementation scheduling, and client budgeting. This sequencing would directly address AIIB's concern that a structured framework should already exist at this stage, while still allowing household-level validation to refine final implementation details.

The revised LARP should also explicitly clarify that LRP support will be delivered through in-kind inputs, training, facilitation, and technical assistance, that transitional agriculture and plantation support may apply to both compensated and non-compensated households experiencing livelihood stress, and that core LRP financing arrangements will be confirmed through the project's approval financing structure.

11. Conclusion

Based on the review of the LARP, SES, socio-economic baseline, and due diligence findings, it is recommended that the project incorporate a structured Livelihood Restoration Framework into the revised LARP. The available evidence already provides a sufficiently robust basis for framework-level planning, even though household-specific package assignment still requires validation during implementation. In this sense, the present LRF is offered as a recommendation arising from the review process to help ensure that livelihood restoration is translated into a practical, operational, and appraisal-ready safeguard structure.

Appendix 11. Proposed Livelihood Restoration Program Framework

LRP Component	Target Group	Indicative Eligibility / Trigger	Main Support Measures	Delivery Modality	Lead Responsibility	Timing	Indicative Monitoring Indicator
Beneficiary Verification and Updating	All eligible affected households, with priority to severely affected households, including physically displaced households, vulnerable households and households with outstanding compensation	Existing household list requires confirmation of current compensation status, livelihood condition, severity of impact, and vulnerability profile	Household verification, updating of livelihood profile, priority classification, package matching	Household visits, validation meetings, field verification	Local government with NGO/service provider support under TIU oversight	Immediate / pre-implementation	% of eligible households verified; % classified by compensation status and priority category
Agriculture and Plantation Restoration including Transitional Agriculture and Plantation Support	Land-based households, especially severely affected households, and Households with outstanding compensation and compensated households requiring support to restore productive capacity due to prolonged uncertainty.	Loss of productive agricultural or plantation land, trees, or related income sources Unresolved compensation, incomplete certificate updating, unclear remaining land boundaries, declining plantation maintenance, or delayed livelihood recovery	Seedlings, fertilizer, tools, short-cycle crops, replanting support, extension services	Household or group-based support with field mentoring	Local government with NGO/service provider support under TIU oversight	Short to medium term, with priority implementation to Households with outstanding compensation and compensated households requiring support to restore productive capacity due to prolonged uncertainty.	% of eligible households receiving agriculture support; evidence of resumed cultivation or productive activity
Livestock and Land-Based Diversification	Severely affected households with reduced landholding or households requiring an alternative land-based income source	Reduced productive landholding; need for diversification beyond plantation-based income	Small livestock package, feed support, husbandry training, follow-up mentoring	Group or household-based package with follow-up visits	Local government with NGO/service provider support under TIU oversight	Short to medium term	% of households receiving livestock support; evidence of productive use of livestock package

LRP Component	Target Group	Indicative Eligibility / Trigger	Main Support Measures	Delivery Modality	Lead Responsibility	Timing	Indicative Monitoring Indicator
Non-Farm Skills and Employment Support	Affected persons with existing non-farm skills or realistic transition potential	Existing or potential livelihood pathway in carpentry, mechanics, construction, services, or other wage-based work	Short vocational training, practical coaching, starter tools, job linkage	Training plus technical follow-up	Local government with NGO/service provider support under TIU oversight	Short term	Number of participants trained; % applying skills or accessing employment opportunities
Microenterprise and Home-Based Business Support	Women-headed households, low-risk self-employment households, and households with small business potential	Existing or potential small enterprise activity; limited capacity or interest for land-based recovery	Business training, starter kits, productive tools, financial literacy, market linkage, mentoring	Training, kit support, mentoring	Local government with NGO/service provider support under TIU oversight	Short to medium term	Number of supported businesses started or strengthened; % of participants continuing enterprise activity
Tailored Support for Vulnerable Households	Vulnerable households, including elderly-headed, poor, low labor capacity, non-title holder, and other at-risk households	Limited capacity to benefit from mainstream livelihood programs; risk of exclusion	Simplified productive package, home-based support, individual facilitation, linkage to social protection	Individual or small-group facilitation	Local government with NGO/service provider support under TIU oversight	Short to medium term	% of vulnerable households reached; % receiving tailored support appropriate to need
Financial Literacy and Compensation Use	All LRP participants, especially households that have received compensation	Risk of non-productive use of compensation and weak household financial planning	Training on compensation utilization, household budgeting, savings, productive reinvestment, financial awareness	Group training and coaching	Local government with NGO/service provider support under TIU oversight	Early to medium term	Number of participants completing financial literacy sessions; evidence of productive planning or reinvestment
Post-Training Mentoring and Technical Assistance	All supported households, especially severely affected and vulnerable households	Completion of training or receipt of support package	Technical follow-up, troubleshooting,	Ongoing mentoring	Local government with NGO/service provider support	Ongoing through implementation	% of supported households receiving follow-up mentoring;

LRP Component	Target Group	Indicative Eligibility / Trigger	Main Support Measures	Delivery Modality	Lead Responsibility	Timing	Indicative Monitoring Indicator
			reinforcement visits, coaching		under TIU oversight		evidence of continued use of support provided
LRP-Related Grievance Handling	All LRP participants and other eligible affected households	Complaints related to eligibility, exclusion, package selection, delays, or support quality	Complaint intake, registration, tracking, response, case resolution	Linked to project-level GRM	TIU with CSC support and PMC oversight	Ongoing	Number and resolution rate of LRP-related grievances; average resolution time
Monitoring and Outcome Review	All participating households and program streams	Need to assess delivery and livelihood recovery outcomes over time	Progress monitoring, field verification, beneficiary feedback, outcome tracking	Routine monitoring and periodic review	TIU with CSC, with possible independent monitoring support	Ongoing	% of households with restored or improved livelihood stability; beneficiary satisfaction level
