Who We Are and What We Do

We are a multilateral development bank with a mission to finance the **Infrastructure for Tomorrow (I4T)**. We enable clients to build I4T—green infrastructure with sustainability, innovation and connectivity at its core. We do this by unlocking finance that brings this vision to fruition. As our clients succeed in building I4T, society shares in that success.

How We Do It

We adapt and innovate constantly to deliver customized investment solutions that overcome the challenges our clients face. Clients count on our responsiveness and resilience to help them meet their objective even during the most difficult times.

Why We Do It

Prosperity and economic development for Asia is our goal. To realize this, we facilitate the I4T that empowers regions and their people with access to physical, digital and social services. This in turn contributes to local, regional and global sustainability.
AIIB Invests in I4T

The Infrastructure for Tomorrow (I4T) reflects AIIB’s firm commitment to sustainability. I4T unlocks new capital, new technologies and new ways to address climate change and to connect Asia, and the world.
Macroeconomic Shifts Reshaping Our World

- Climate change.
- Aging population.
- Digital and information age.
- COVID-19.
- Infrastructure gap.
The Role and Opportunity of Infrastructure

Generating short-term income, long-term growth and environmental sustainability.

Enabling cost-effective multisector resilience planning.

Closing the health and education gap in developing economies.

Mobilizing investments from the private sector through innovative and flexible financing models.

Integrating technology and connectivity to avoid being left behind.
Why AIIB?

Our value-add to clients and partners

• Sound banking principles to ensure financial sustainability in our operations and projects.
• Multilateral governance and a diversified, global shareholder base to ensure accountability.
• High project standards to ensure transparency and environmental and social stewardship.
• A responsive and agile culture that helps clients achieve investment outcomes.
AIIB’s Strategic Priorities in a Post-COVID World

1. Green infrastructure.

2. Expanding into social infrastructure.

3. Private capital mobilization.

4. Connectivity and regional cooperation.

5. Technology-enabled infrastructure.

The Bank will help to mobilize much needed additional resources from inside and outside Asia and will complement the existing multilateral development banks.

**Articles of Agreement**

*Prospective founding member: These are prospective members who were original signatories to the Articles of Agreement in June 2015. Countries or territories who sought membership after that date are simply called prospective members. All prospective members have been approved by the Board of Governors but have not yet met the full requirements of membership.

• AIIB’s authorized capital stock is USD100 billion, with USD20 billion as paid-in capital made in five annual installments¹. The absolute amount of paid-in capital ranks among the highest of MDBs. Currently 98% of AIIB’s allocated capital has been subscribed.

• USD18.9 billion received as at Nov. 20, 2020.

• In view of its regional focus, AIIB’s regional members will hold the majority of capital stock—a minimum 75%.²

• In line with other MDBs, AIIB expects to benefit from preferred creditor treatment such as: in its members, it will not be required to participate in any rescheduling of national debt. Member liabilities to AIIB, such as sovereign loans or sovereign guarantees on private sector projects, rank on par with their obligations to the IMF and other MDBs.

VI. AIIB IN THE CAPITAL MARKETS

APPENDIXES AND USEFUL LINKS
**AIIB LOCAL CURRENCY FINANCING**

The aim is to deliver diversified access to local currencies through different instruments to meet clients’ needs at various stages of project and economic cycles.

For Clients Local Currency Financing represents protection from various currency risks:

- Reduction in earnings’ volatility due to FX movements
- Decrease of debt burden in case of LCY depreciation
- Better credit rating of a borrower / project
- Reduced possibility of financial distress
- Possibility of borrowing LCY in longer tenor

For AIIB Local Currency Financing represents:

- Flexibility to offer client’s currency of choice
- Stronger credit for loan book
- Lower possibility of defaults
- Access to loan markets that operate in LCY only
- Opportunity to direct LCY funds towards project finance and corporates

No currency risk for client – better asset for AIIB
AIIB LOCAL CURRENCY FINANCING FOR NON-SOVEREIGN CLIENT

General terms

- Lending is based on sound banking practice
- The terms and conditions are set on a commercial basis
- Available currencies: 26 operational currencies of which five have already been utilized for lending

Pricing is based on actual cost of funding in the currency

AIIB’s actual cost of borrowing in local currency:
1) Cost based on local market-based benchmark (government bond yield or a relevant reference rate)
2) Issuance or execution costs (underwriting fees, execution costs) for bond-funded transactions
3) Recurrent costs (listing, custody, payment fees) for bond-funded transactions

Plus
Corporate client’s or project’s credit spread, based on individual risks of the project or a corporate

Final pricing: for projects funded through cross currency swaps, AIIB hedges client’s or project credit spread back to USD, with the final rate representing all-in rate after swap
• 26 operational currencies as at December 31, 2020. All currencies are available for lending purposes
• Funded loans in Chinese Renminbi, Indian Rupee, Russian Ruble and in euro.
• Pipeline includes other operational currencies
SOURCES OF LOCAL CURRENCIES

The aim is to deliver diversified access to local currencies through different instruments to meet clients’ needs at various stages of project and economic cycles.

Phase I
BACK-TO-BACK CROSS CURRENCY SWAPS – efficient funding source for local currency financing. Currency is sourced through executing hedges as disbursements take place.

Phase II
POOL FUNDING – Management of non-USD liquidity. To achieve attractive levels, a blended mix of swaps and off-shore bonds will fund the pool. Other market instruments – repo, MM, may be used as required.

Phase III
ON-SHORE ISSUANCE – serves a dual purpose:
- to raise funding in the local markets to provide local currency to clients;
- to help development of local capital markets in member countries.
TWO MAIN SOURCES FOR BACK-TO-BACK LOCAL CURRENCY FUNDING

**Swaps**
- **Pros:**
  - Timing of the disbursement and funding is matched
  - Loans profiles can be matched precisely
  - Fast execution
- **Cons:**
  - Needs reliable counterparts and legal framework
  - Size may be limited
  - Prepayments can be accommodated

**Bonds**
- **Pros:**
  - Additional development impact
  - Local currency source where swaps market is not developed
  - Potentially larger funding pool than swaps
- **Cons:**
  - Investor demand in offshore markets is not reliable
  - Prepayments or amortizations are difficult or impossible to accommodate

Currency risk is transferred to swap counterparty / bond investor
LOCAL CURRENCY FINANCING: DELIVERABLE VS SYNTHETIC

**Deliverable local currency loans:**
Clients receive local currency on a disbursement date and repay AIIB principal and interest in local currency on loan service dates.

**Synthetic (or non-deliverable) local currency loans:**
Clients receive USD equivalent of a local currency loan amount on a disbursement date and repay USD equivalent of a local currency principal and interest on loan service dates. The FX rate is based on prevailing FX spot rate at the time of payments.

- Back-to-back funding through cross currency swaps or bonds
- Onshore or offshore source
- Pricing is based on a relevant local market reference rate
- Currency risk is passed on to a swap counterparty or bond investors

FINANCING INFRASTRUCTURE FOR TOMORROW—THEMATIC PRIORITIES

A firm commitment to sustainability in all of its dimensions—economic, financial, social and environmental

### Green Infrastructure
Promoting green infrastructure and supporting members to meet their local and national environmental and development goals, especially their commitments under the Paris Agreement and the United Nations’ Sustainable Development Goals.

### Connectivity and Regional Cooperation
Facilitating better transport, digital, energy and water connectivity within Asia and between Asia and the rest of the world. It will also support projects that facilitate trade, cross-border investment, tourism, financial and digital integration across Asian economies and beyond.

### Technology-enabled Infrastructure
Based on the enhanced recognition of the important role technology plays, AIIB will support projects where the application of technology delivers better value, quality, productivity, efficiency, resilience, sustainability, inclusion, transparency and better governance along the project cycle.

### Private Capital Mobilization
To support projects that directly or indirectly mobilize private financing into sectors within AIIB’s mandate. Includes developing infrastructure as an asset class in Asia.

Investment Operations

Loans approved since inception: USD\text{23.551} billion.
Number of projects approved: 115.

Investments in energy, transport, digital, water, sanitation and connectivity.

AIIB will leverage its balance sheet to mobilize financing for the private sector.
Investment Operations

Loans approved since inception: USD23.551 billion. Number of projects approved: 115.

Investments in energy, transport, digital, water, sanitation and connectivity.

AIIB will leverage its balance sheet to mobilize financing for the private sector.
COVID-19 CRISIS RECOVERY FACILITY—UP TO USD13 BILLION

Scope—what can the facility be used for?

AIIB has created a Crisis Recovery Facility to support AIIB’s members and clients in alleviating and mitigating economic, financial and public health pressures arising from COVID-19.

**Financing of immediate health sector needs**

Support emergency public health responses, including:

- The development of health system capacity and the provision of essential medical equipment and supplies to combat COVID-19.
- Long-term sustainable development of the health sector.

**Economic resilience**

Provide financing to supplement government productive expenditures to support the social and economic response and recovery.

- This includes investments in infrastructure but also social and economic protection to prevent long-term damage to the productive capacity of the economy.
- Investment to protect and restore productive capital, including human capital.

**Financings to address liquidity constraints**

- Support clients to overcome liquidity constraints and maintain critical long-term investments which may have to be curtailed, delayed or suspended.
- Focus on clients in infrastructure and other productive sectors.
We’re helping Bangladesh build Infrastructure for Tomorrow through a USD404-million loan to improve cross-border connectivity between Bangladesh and India via a safe and efficient road between Sylhet and Tamabil.

The project is expected to have positive social impact in terms of substantial travel time and associated cost savings. The road can lead to improved connectivity to health, education, employment and other social services and opportunities.
AIIB is helping Kazakhstan generate clean electricity by mobilizing private capital and investing in a 100-megawatt wind power plant that will become central Asia’s largest.

We’re investing USD34.3 million out of the total project cost of USD139.9 million (the rest being funded by sponsors and other financial institutions) to enable the client, Zhanatas Wind-Power Station LLP, develop a wind farm infrastructure for tomorrow. The project promotes the use of renewable energy, generates approximately 319 GWh per annum (0.3 percent of total electricity generation in Kazakhstan) and avoids about 260,623 tons of carbon dioxide equivalent per year.
AIIB raised USD239.2 million non-sovereign-backed financing including B Loan to improve telecommunications connectivity in Oman.

The financing provided to Oman Broadband will be used for its rollout of a fiber optic broadband cable network to circa 406,003 homes / premises by the end of 2021.

Upon its completion, 80% of Muscat will be fiber-ready for connection with the gigabit-capable optical networks. The Project will improve Oman’s infrastructure in the information and communication technology sector, thereby increasing the attractiveness of Oman as a destination for manufacturing business and strategic logistics services. This will contribute to the diversification of the economy away from its current dependence on export of hydrocarbon products.
Sylhet to Tamabil Road Upgrade Project, Bangladesh—AIIB is providing USD404 million loan to improve cross-border connectivity between Bangladesh and India via a safe and efficient road link between Sylhet and Tamabil.

Sylhet, a special economic zone, is located in the heart of a tea growing area and is the hub of the tea industry in Bangladesh. Through the development of this project, Dhaka, the capital city of the country and Chittagong, the commercial capital will be well connected with eastern India through Tamabil.

The project will have positive impacts in terms of substantial improvements in travel time and associated cost savings; improved connectivity to health, educational and other social services; and better access to employment opportunities.
Zhanatas 100 MW Wind Power Plant, Kazakhstan—AIIB is investing USD46.7 million, to promote the use of renewable energy by mobilizing private capital.

The project is to develop, construct, and operate a 100 MW wind farm in Southern Kazakhstan. The total project cost is USD136.2 million, of which AIIB loan is about USD46.7 million and the rest is funded by sponsors and other financial institutions.

Once completed, the Zhanatas wind power plant will become the largest wind farm in Central Asia. Greenhouse gas emissions can be avoided—about 260,623 tons of carbon dioxide equivalent per year. More importantly, Kazakhstan stands to generate clean electricity, approximately 319 GWh per annum or 0.3 percent of total electricity generation in the country.
Oman Broadband Infrastructure, Oman—AIIB raised USD239.2 million non-sovereign-backed financing including B Loan to improve telecommunications connectivity in Oman.

The financing provided to Oman Broadband will be used for its rollout of a fiber optic broadband cable network to circa 406,003 homes / premises by the end of 2021.

Upon its completion, 80% of Muscat will be fiber-ready for connection with the gigabit-capable optical networks. The Project will improve Oman’s infrastructure in the information and communication technology sector, thereby increasing the attractiveness of Oman as a destination for manufacturing business and strategic logistics services. This will contribute to the diversification of the economy away from its current dependence on export of hydrocarbon products.

APPENDIXES AND USEFUL LINKS
AIIB’S COMMITMENT TO SUSTAINABLE GROWTH
Financing Infrastructure for Tomorrow

Firm commitment to sustainability by requiring that all investments be:

- **Financially and economically sustainable** in terms of financial returns and economic impact which generates positive economic returns and does not exacerbate a country’s debt sustainability. This is assured through economic and financial analyses made for all investments of the Bank.

- **Socially sustainable and inclusive** in terms of addressing direct and indirect impacts, especially on displaced persons, vulnerable groups and community health and safety. Social sustainability promotes inclusive access to project benefits for all citizens—irrespective of age, gender, location, ethnicity and other socioeconomic characteristics and particularly to groups which are often marginalized, vulnerable or excluded from access to services.

- **Environmentally sustainable** in terms of addressing direct and indirect impacts on the physical and biological environment such as water and air quality, biodiversity, local pollution, climate change and land and water use. Environmental and social sustainability is assured through the Bank’s ESF which reflects good international practices.
AIIB’S COMMITMENT TO SUSTAINABLE GROWTH

Environmental and Social Framework (ESF) at the core of the organization

Elements of the ESF

• Vision
• Environment and Social Policy (ESP)
• Environmental and Social Standards (ESS)
• Environmental and Social Exclusion List (ESEL)

Objectives of the ESF

• Provide a robust structure for managing operational and reputational risks of the Bank and its shareholders in relation to project environmental and social risks and impacts.
• Ensure the environmental and social soundness and sustainability of projects.
• Support integration of environmental and social aspects of projects into the decision-making process by all parties.
• Provide a mechanism for addressing environmental and social risks and impacts in project identification, preparation and implementation.
• Enable Clients to identify and manage environmental and social risks and impacts of projects, including those of climate change.
• Provide a framework for public consultation and disclosure of environmental and social information in relation to projects.
AIIB’S COMMITMENT TO SUSTAINABLE GROWTH

2019 AIIB Investments Mapped Across the SDGs

AIIB approved 28 projects in 2019. These projects continued to show strong alignment with the Sustainable Development Goals (SDGs). The SDGs are inherently interlinked and a project may contribute to many SDGs. We used the same approach as our 2018 mapping activity to show alignment mainly with four infrastructure-related SDGs (6, 7, 9, and 11).

Each project is mapped to one infrastructure-related SDG with which the project has the strongest alignment. Five are cross-sectoral projects that contribute to all four SDGs.

**Clean water and sanitation**
- **Bangladesh**: Bangladesh Municipal Water Supply and Sanitation Project.
- **India**: West Bengal Major Irrigation and Flood Management.
- **Pakistan**: Karachi Water and Sewerage Services Improvement (AFMF).

**Clean energy**
- **Bangladesh**: Power System Upgrade and Expansion.
- **India**: L&T Sustainable Infrastructure On-lending Facility (MF).
- **India**: Rajasthan 250 MW Solar Project - Hero Future Energies (MF).
- **India**: Toto Ganjirait Sustainable Infrastructure On-lending Facility (MF).
- **Kazakhstan**: Zhamaltas 100 MW Wind Power Plant (MF).
- **Multicountry**: SGEI Asia Energy Transition Fund (MF).
- **Nepal**: Distribution System Upgrade and Expansion (AF).
- **Nepal**: Upper Tilikudi-1 Hydropower Project (MF).
- **Turkey**: Elek Kütahya 97 MW Geothermal Power Plant Expansion Project.
- **Turkey**: TDKB Renewable Energy and Energy Efficiency On-lending Facility (MF).

**Industry, innovation and infrastructure**
- **Cambodia**: Fiber Optic Communication Network Project.
- **India**: Mumbai Urban Transport Project - Phase III (MUTP) (AFMF).
- **Lao PDR**: National Road 13 Improvement and Maintenance Project (AF).

**Affordable and clean energy**
- **Bangladesh**: Power System Upgrade and Expansion.
- **India**: L&T Sustainable Infrastructure On-lending Facility (MF).
- **India**: Rajasthan 250 MW Solar Project - Hero Future Energies (MF).
- **India**: Toto Ganjirait Sustainable Infrastructure On-lending Facility (MF).
- **Kazakhstan**: Zhamaltas 100 MW Wind Power Plant (MF).
- **Multicountry**: SGEI Asia Energy Transition Fund (MF).
- **Nepal**: Distribution System Upgrade and Expansion (AF).
- **Nepal**: Upper Tilikudi-1 Hydropower Project (MF).
- **Turkey**: Elek Kütahya 97 MW Geothermal Power Plant Expansion Project.
- **Turkey**: TDKB Renewable Energy and Energy Efficiency On-lending Facility (MF).

**Projects that support across all four infrastructure SDGs (6, 7, 9, 11)**
- **Egypt**: National Bank of Egypt Sustainable Infrastructure On-Lending Facility.
- **Multicountry**: SGEI Asia Energy Transition Fund.
- **Multicountry**: Asia Climate Bond Portfolio (AFMF).
- **Singapore**: Infrastructure Private Capital Mobilization Platform.

**Sustainable cities and communities**
- **China**: Beijing-Tianjin-Hebei Low Carbon Energy Transition and Air Quality Improvement Project.
- **Pakistan**: Karachi Sub Rapid Transit Red Line Project (AFMF).
- **Sri Lanka**: Reduction of Landside Vulnerability by Mitigation Measures (RLVMM) Project (AF).
- **Sri Lanka**: Support to Colombo Urban Regeneration Project.
- **Turkey**: Istanbul Seismic Risk Mitigation and Emergency Preparedness Project.
- **Uzbekistan**: Prosperous Villages Project (AF).

**NOTE**: This year, we also highlighted AIIB’s climate finance that contributes to SDG 13, Climate Action, as indicated by the green row. Climate finance amounted to USD$1.7 billion or 39% of total financing approved in 2019, representing an increase from USD$2.5 billion or 35% of total financing approved over the previous three years (2016-2018). A total of 16 out of 28 projects approved in 2019 had mitigation finance (MF) and/or adaptation finance (AF) components.
SUSTAINABLE DEVELOPMENT BONDS

Use of Proceeds

• AllIB’s Environmental and Social Framework (ESF) is the cornerstone of the Bank’s commitment to supporting environmentally and socially sustainable infrastructure projects for both sovereign and nonsovereign clients.

• The vision section of the ESF describes the Bank’s aspirations in integrating environmental and social sustainability into its mission. It is part of our mission to help our members to address their commitments to the United Nations’ Sustainable Development Goals (SDGs) and to achieve their nationally determined contributions under the Paris Agreement, as demonstrated by our investment in projects related to climate mitigation, climate adaptation and other environmental objectives.

• All debt issued to date has Use of Proceeds language highlighting the Bank’s sustainable mission and referring to the Bank’s environmental and social criteria.

• AllIB project summaries contain environmental and social information on each project. These are posted on the AllIB Website under Approved Projects and Proposed Projects.

• AllIB is rated by three ESG rating agencies; ISS ESG, Sustainalytics, and Vigeo Eiris. These ratings are solicited by investors and are based on industry-specific environmental, social and governance (ESG) criteria.

OVERVIEW OF CAPITAL AND RISK MANAGEMENT

Economic capital is the fundamental measure of risk appetite

Key financial and risk management policies

- Prudent risk management policies with economic capital being the fundamental measure of risk appetite utilization.
- Manage risks, such that AIIB is financially sustainable on a standalone basis, preventing the need to require recourse to its callable capital.
- All risks are managed to defend, preserve and protect AIIB’s triple-A ratings.
- AIIB’s Risk Appetite Statement requires that AIIB risk appetite is allocated below its capacity, determined by the Bank’s available capital (i.e. received paid-in capital, reserves and retained earnings).
- Total amount outstanding of loans, equity investments, guarantees and other types of financings shall not exceed the total amount of the Bank’s unimpaired subscribed capital, reserves and retained earnings¹.
- Market risk is managed within internally set Value-at-Risk (VaR) and duration limits.

Notes: 1. Source: Article 12.1, Chapter III, AIIB Articles of Agreement.
2. Economic Capital is defined as the capital required to withstand losses over one year to a 99.99 percentile level of confidence.
3. The following financial risks are managed outside the economic capital framework: liquidity risk and model risk.
   No economic capital is allocated for other nonfinancial risks (compliance risk, integrity risk, and environmental and social risk).
4. Based on current usage of USD3,470 million of economic capital, as at September 30, 2020.
OVERVIEW OF LIQUIDITY MANAGEMENT

Prudent liquidity risk management

Liquidity Portfolio

• Managed to ensure liquidity available via conservative and stress-tested models.

• Eligible investments:
  • Money market funds (AAA rating)
  • Sovereign, Supranational, Agency (SSA)—senior debt (minimum A rating)
  • Corporate—senior debt (minimum AAA rating)
  • Other Financials (minimum A minus rating)

• External managers used for portfolio diversification.

Liquidity Risk

• Liquidity portfolio should cover at least 40% of net cash requirements for the upcoming 36 months and 100% of stressed net cash requirements for any upcoming 12-month period.

• Liquidity expected to be well in excess of policy requirements for first five years of operations.

<th>Outlook</th>
<th>Commentary</th>
<th>Summary Rating Rationale</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standard &amp; Poor's</td>
<td>AAA</td>
<td>A-1+</td>
<td>Stable</td>
<td>“AIIB continues making progress on delivering on its mandate by building up its operational capacity and increasing loan commitments to the region. We are affirming our ‘AAA/A-1+’ ratings on AIIB. The stable outlook reflects our expectation that, over the next 12-24 months, AIIB will continue achieving key targets as part of its start-up phase and will adhere to sound governance and risk management principles supported by an extremely strong financial profile” Dec. 16, 2019</td>
<td>✓ Strong capital commitment from diversified sovereign shareholder base.</td>
</tr>
<tr>
<td>Moody’s</td>
<td>Aaa</td>
<td>P-1</td>
<td>Stable</td>
<td>“The credit profile of the Asian Infrastructure Investment Bank (AIIB, Aaa stable) reflects our view that the bank is evolving in a manner consistent with the highest-rated multilateral development banks (MDBs), as it incorporates changes to operational capabilities, governance and market access. Investment operations have accelerated as the bank has built up its staff, developed its internal processes and systems and focuses more on sector-specific strategies. In 2019, AIIB formally commenced its borrowing program, establishing access to international capital market funding well ahead of any imminent need, given the bank’s ample liquidity. Shareholder support will also remain strong as the bank’s membership and, consequently, its capital base, expand beyond the levels at its founding in 2015.” Oct. 12, 2020</td>
<td>✓ Strong governance and risk management framework. ✓ Excellent capitalization with very high projected liquidity position.</td>
</tr>
<tr>
<td>Fitch Ratings</td>
<td>AAA</td>
<td>F1+</td>
<td>Stable</td>
<td>“AIIB’s ‘AAA’ IDR continues to reflect its intrinsic credit strengths. Given the relatively early years of development at AIIB, Fitch bases its projections on an eight-year forecast period (2020-2028). Based on this, the bank’s ‘excellent’ capitalisation and ‘low’ risk profile translate into a ‘aa+’ assessment of solvency. Liquidity is assessed at ‘aaa’. AIIB’s ‘medium’ risk business environment leads to a one-notch uplift over the lower of solvency and liquidity, to ‘aaa’ for the bank’s intrinsic assessment. Our assessment of the bank’s solvency, liquidity and business environment are unchanged from last year. Shareholders’ support, assessed at ‘a+’ (unchanged from last year), does not provide a rating uplift.” Jul. 2, 2020</td>
<td>✓ Very high strength of member support. ✓ Preferred creditor status. ✓ 0% risk weight.</td>
</tr>

</table>

Credit ratings do not constitute investment or financial advice, and credit ratings are not recommendations to purchase, hold or sell particular securities. Credit ratings do not comment on the suitability of an investment for any particular investor. There is no assurance that any rating will remain in effect for any given period of time or that any rating will not be revised or withdrawn entirely by a rating agency in the future if, in its judgment, circumstances so warrant.
FUNDING STRATEGY

AllIB as a prime, frequent issuer in international markets

- Two main pillars of capital market funding:
  - Public transactions - global benchmark format as well as smaller public offerings, and
  - Reverse enquiry issues.
- Develop a broad range of unsecured funding instruments and sources of liquidity.
- Diversify in terms of currency and investor type.
- Deliver comprehensive and continuous investor marketing.
- Utilize money market funding for bridge financing.
- Current 2020 borrowing authority is USD9 billion. This is expected to reach in excess of USD10 billion per annum in the mid 2020s.
- AllIB was added to the EU Capital Requirements Regulation (CRR) Article 117, paragraph 2 list of MDBs, resulting in a 0% risk weight assignment and the same HQLA1 treatment as other MDBs in the EU.

Note: 1. AllIB Global Borrowing Authority 2020 (as amended and restated), September 10, 2020.

### AllIB USD3 billion 3-year Global Sustainable Development Bond in the context of COVID-19

**Highlights**

- Priced USD3 billion with a spread of m/s+9bps equivalent to UST+16.5bps. This transaction represents AllIB’s inaugural 3-year benchmark, and its second USD global benchmark of 2020, reinforcing its commitment to investors to further establish a liquid USD curve.
- Over 4.2 billion in orders from 70 investors across the globe representing 29 countries.
- Pricing cements AllIB’s positioning among its MDB peers.
- Well diversified book by investor type and geography.
- Very high-quality orderbook, evidenced by the significant proportion of allocations going to central banks and official institutions (76.7%); the highest percentage distribution into these investors in a 3-year USD benchmark year-to-date.
- Prior to issuance, AllIB met with investors who made up 96% of the allocated book in USD terms.

GLOBAL BEST PRACTICE IN MDB GOVERNANCE

Transparency, independence and accountability

| Board of Governors | • Each AIIB member appoints a Governor.  
|                    | • All powers of the AIIB are vested in the Board of Governors.  
|                    | • Members’ voting power is the sum of basic votes, share votes and founding member votes.  
|                    | • Basic votes: Each member has the same number of basic votes calculated to sum to 12 percent of members’ total share votes.  
|                    | • Share votes: Each member has one vote for each share of capital stock held.  
|                    | • Founding member votes: 600 votes allocated to each founding member.  

| Board of Directors | • Composed of 12 Directors, 9 elected by regional members and 3 elected by nonregional members.  
|                    | • Supervise the management and the operation of the Bank.  
|                    | • Two-year terms and may be re-elected.  

| President | • Elected by the Board of Governors.  
|           | • National of a regional member.  
|           | • May serve up to two 5-year terms.  

| Vice Presidents | • Appointed by the Board of Directors upon the recommendation of the President.  

---

### Major decisions require a Super Majority vote of the Board of Governors

| • Election, suspension or removal of the President.  
| • Increase in the Bank’s authorized capital stock.  
| • Changes to the regional capital stock ownership percentage.  
| • Increase a member’s capital subscription at its request.  
| • Increase the Bank’s gearing ratio above 1:1.  
| • Allocation of net income to purposes other than retained earnings.  
| • Revise the composition of the Board of Directors.  
| • Amendments to the Articles of Agreement.  

Note: 1. A Super Majority vote of the Board of Governors shall require an affirmative vote of two-thirds of the total number of Governors, representing no less than three-fourths of the total voting power of the members.
